NOTICES TO AIRMEN
CONTENT CRITERIA
Revised 1985

ALL AIRPORTS

TABLE 1

Information Category	Content Criteria
Airports	Abandonments (If currently listed in Airport/Facility Directory), Openings, Closings.
Runways	Openings, Closings, Commissionings, Permanent Closures.

NOTAM D AIRPORTS

TABLE 2

Information Category	Content Criteria
Airport Operating Restriction	CFR, ACR, etc.
Approach Light Systems	Commissionings, Changes, Decommissionings, Outages (with Effective Dates), Pilot Control (Commissionings, Decommissionings, Outages (with Effective Dates)).
Control Zones	Hours of Operation (in Local Time).
Displaced Thresholds	Implementation and Changes.
Runways	Ident Changes, Length, Width, Surface Composition Changes.
Runway Light Systems	Commissionings, Changes, Outages (with Effective Dates), Pilot Control (Commissionings, Decommissionings, Outages (with Effective Dates)).

NAVAIDS, COMMUNICATIONS, OTHER SERVICES

TABLE 3

Information Category	Content Criteria
Navigational Facilities	Commissionings (including Ident and Frequency), Decommissionings (including Ident and Frequency), Frequency Changes, Changes in Monitoring Facility and/or Status, Restrictions, Outages (with Effective Dates).
Air Traffic Control Towers, Approach Controls	Commissionings (including Frequencies), Hours of Operation, Decommissionings.
Flight Service Stations	Commissionings, Decommissionings, Hours of Operation; Commissionings, Decommissionings of RCO; Changes in Monitoring Status of RCO; Outages of RCO (with Effective Dates).
Weather	AWOS (System and Frequency).

TD 4.12/2:

FOREWORD

The primary references for changes to the National Airspace System (NAS) are Aeronautical Charts and Airport/Facility Directories (A/FD) published for the affected area(s). Ideally, most changes to the NAS that meet NOTAM criteria are known sufficiently in advance to allow publication in these publications. When this cannot be done, changes are carried in the Notices to Airman Class II publication, or as a last resort, on the Service A telecommunications system as a NOTAM D item.

NOTAM D information printed in this publication will not be included on the Service A system and will not be provided during pilot briefings unless specifically requested by the pilot.

National Flight Data Center (FDC) NOTAMs primarily reflect changes to Standard Instrument Approach Procedures (SIAPs), Flight Restrictions, and aeronautical chart revisions. The last FDC NOTAM included in this issue is indicated by number and date above. This information insures that subsequent FDC NOTAMs, issued after the cutoff date, can be identified.

The Class II publication contains information of a temporary nature, which is expected to remain for an extended period. This temporary information is carried until it expires or is cancelled. Data of a permanent nature is sometimes carried in the Class II publication as an interim step prior to publication on the appropriate charts or in the A/FD.

The Class II publication is issued every 14 days. The A/FD is published every 56 days. Data in the Class II publication that is current on the effective date of the next A/FD will be transferred to the A/FD and removed from the Class II publication.

Facilities are responsible for forwarding data to the National Flight Data Center (NFDC). Data, still current for the next available Class II publication date, will be published.

This publication is divided into two sections:

1. Section One contains information divided into four categories:

   a. GENERAL

   b. AIRWAYS

   c. FLIGHT RESTRICTIONS

   d. AIRPORTS / FACILITIES / PROCEDURAL NOTAMS

The first subsection is listed in descending FDC NOTAM numerical order. The econd and third subsections are listed by state. The fourth subsection is ordered by state, city, and airport name.

2. The second section contains special notices that are too long or that concern a wide or unspecified geographical area (which may overlap several states) and are not suitable for inclusion in the first section.

The content of these notices vary widely and are included because of their significant impact on flight safety.

NOTES

1. All times are indicated as UTC or local. During periods of Daylight Savings Time, effective hours in local time will be one hour earlier than shown. All states observe Daylight Savings Time except Arizona, that portion of Indiana in the Eastern Time Zone, Puerto Rico, and the Virgin Islands.

2. (¦) Vertical line items indicate new information.

FDC NOTAM LEGEND

Code	Explanation
5/103	Accountability number assigned to the message originator.
FI/T	Flight information of a temporary nature.
FI/P	Flight information of a permanent nature.

(A) Information for Section 1 should be submitted to the National Flight Data Center (ATO-250).
(B) Camera-ready copy for Section 2 should be submitted to ATO-200.

ADDRESSING INFORMATION FOR SECTION 1

Federal Aviation Administration, National Flight Data Center (ATO-250), 800 Independence Ave, SW., Washington, DC 20591.

Phone: Commercial—(202)426-3813/3390.

Phone: FTS—426-3288/3390.

ADDRESSING INFORMATION FOR SECTION 2

Federal Aviation Administration, ATO-200, 800 Independence Ave, SW., Washington, DC 20591.

Phone: Commercial—(202)426-3731.

Phone: FTS—426-3731.

SUBSCRIPTION INFORMATION

HOW TO ORDER

The Notices to Airmen publication is available by subscription through the Superintendent of Documents. Subscriptions are accepted for a 1 year period. Remittance must be made in advance of shipment. Your check or money order must be made payable to the Superintendent of Documents. Orders can also be charged to your VISA or MASTERCARD account. Orders should be addressed to:

Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402,

or

Phone: (202)783-3238 (Order Desk).

ABBREVIATIONS

The following abbreviations are those most commonly used within this publication. Other abbreviations may be found in the Contraction Handbook, 7340.1.

Note: An "s" may be added for plural. Abbreviations used in FDC NOTAMs are italicized.

A

/	and
AAS	Airport Advisory Service
A/C	Approach Control
acft	aircraft
ACR	Air Carrier
ADF	Automatic Direction Finder
AER	Approach End Runway
AGL	above ground level
AIM	Airmen's Information Manual
ALS	Approach light system
ALSF-1	Standard 2400' High-intensity Approach Lighting System with Sequenced Flashers, Category I Configuration
ALSF-2	Standard 2400' High-intensity Approach Lighting System with Sequenced Flashers, Category II Configuration
alt	altitude
altm	altimeter
altn	alternate
ALSTG	altimeter setting
amdt	amendment
apch	approach
apchg	approaching
aprx	approximate
arpt	airport
arr	arrive or arrival
ARSR	Air Route Surveillance Radar
ARTCC	Air Route Traffic Control Center
ASDE	airport surface detection equipment
ASR	Arpt Surveillance Radar
ATC	air traffic control
ATCT	air traffic control tower
ATIS	Automatic Terminal Information Service
avbl	available
awy	airway

B

BC	back course
bcn	beacon
bcst	broadcast
bldg	building
brg	bearing
btn	between
byd	beyond

C

cat	category
CFR	crash fire rescue
clnc	clearance
clsd	closed
cmsnd	commissioned
cntr	center
cntrln	centerline
Comlo	Compass locator
const	construction
cpty	capacity
crs	course
ctc	contact
CTLZ	Control Zone

D

dalgt	daylight
dcmsnd	decommissioned
degs	degrees
dep	depart, departure
DF	direction finder
DH	decision height
DME	UHF standard TACAN compatible distance measuring equipment
dsplcd	displaced
dstc	distance
durg	during
DVFR	Defense Visual Flight Rule

E

E	east
EFAS	Enroute Flight Advisory Service
elev	elevation
emerg	emergency
equip	equipment
excp	except

F

FAF	final approach fix
FAR	Federal Aviation Regulation
FDC	Flight Data Center
FI/P	flight information (permanent)
FI/T	flight information (temporary)
FL	Flight Level
FM	from
freq	frequency
FSS	Flight Service Station
ft	feet/foot

G

govt	government
GS	glide slope
GWT	gross weight

H

HAA	height above airport
HAT	height above touchdown
HIRL	High intensity Runway Lights
hol	holiday
hwy	highway

I

IAF	initial approach fix
IAP	initial approach procedure
ident	identification
IF	intermediate fix
IFR	Instrument Flight Rules
IFSS	International Flight Service Station
ILS	instrument landing system
info	information
inop	inoperative
int	intersection
intl	international
intst	intensity
ISMLS	Interim Standard Microwave Landing System

J

J-Bar	jet runway barrier

K

kHz	kilohertz

L

L	left (used only to designate rwys) eg. rwy 12L
lat	latitude
lb	pounds (weight)
lctd	located
LDA	Localizer type directional aid
LDIN	Lead-in Lighting System
lgtd	lighted
LMM	compass locator at middle marker ILS
lndg	landing
loc	localizer
LOM	compass locator at outer marker ILS
long	longitude

M

MAA	maximum authorized altitude
mag	magnetic
maint	maintain, maintenance
MALS	Medium Intensity Approach Light System
MALSR	Medium Intensity Approach Light System with Runway Alignment Indicator Lights
MAP	missed approach point
max	maximum
MCA	minimum crossing altitude
MDA	minimum descent altitude
MEA	minimum enroute IFR altitude
MHz	megahertz
min	minimum or minute
MIRL	Medium Intensity Runway Edge Lights
MLS	Microwave Landing System
MM	middle marker ILS
MOCA	minimum obstruction clearance altitude
MRA	minimum reception altitude
MSA	minimum safe altitude
MSL	mean sea level
muni	municipal

N

N	north
NA	not authorized
natl	national
navaid	navigational aid
NDB	Non-directional Radio Beacon
NM	nautical mile(s)
NOPT	no procedure turn required
Nr	number

O

obstn	obstruction
ODALS	Omnidirectional Approach Lighting System
OM	outer marker ILS
oper	operate
opn	operation
orig	original
OTS	Out of Service
ovrn	overrun

P

PAR	Precision Apch Radar
pat	pattern
permly	permanently
PPR	Prior Permission Required
proc	procedure

Q

quad	quadrant

R

R	right (used only to designate rwys) eg. rwy 19R
RAPCON	radar approach control (USAF)
RCAG	Remote Center air/ground
RCLS	Runway Centerline Lights System
RCO	Remote Communications Outlet
rcv	receive
rcvg	receiving
REIL	Runway End Identifier Lights
req	request
RNAV	Area Navigation
RRP	Runway Reference Point
rstrd	restricted
RTS	returned to service
RVR	runway visual range
RVRM	Runway Visual Range Midpoint
RVRT	Runway Visual Range Touchdown
RVRR	Runway Visual Range Rollout
RVV	runway visibility values
rwy	Runway

S

S	south/snow
SDF	Simplified Directional Facility
sec	second
sfc	surface
SFL	Sequenced Flashing Lights
SI	straight-in approach
SM	statute mile(s)
SR	sunrise
SS	sunset
SSAFL	Simplified Short Approach Lighting System with Sequenced Flashers
SSALS	Simplified Short Approach Lighting System
SSALR	Simplified Short Approach Lighting System with Runway Alignment Indicator Lights
STOL	Short take-off & landing runway
svc	service

T

T	true (after a bearing)
TAC	Terminal Area Chart
TACAN	UHF navigational facility—omnidirectional course and distance information
TCA	Terminal Control Area
TCH	Threshold Crossing Height
tfc	traffic
thr	threshold
thru	through
tkof	take-off
tmprly	temporarily
tmpry	temporary
TPA	Traffic Pattern Altitude
TRACON	Terminal Radar approach control
trml	terminal
TRSA	Terminal Radar Service Area
tsnt	transient
TWEB	transcribed weather bcst
twr	tower
twy	taxiway

U

UHF	Ultra high frequency
unavbl	unavailable
unlgtd	unlighted
unmon	unmonitored
unusbl	unusable

V

VASI	Visual Approach Slope Indicator
VDP	visual descent point
VFR	visual flight rules
VHF	Very high frequency
vis	visibility
VOR	VHF Omni-Directional Radio Range
VORTAC	Combined VOR and TACAN System
VOT	a VOR Receiver testing facility
vsby	visibility

W

W	west
wea	weather
wkday	weekday
wkend	weekend
wp	waypoint
wt	weight

Z

Z	Greenwich mean time

GENERAL

FDC 5/2889 FDC CHART CORRECTION DALLAS FT WORTH SECTIONAL 34TH EDITION DATED JULY 4 1985. ADD OBSTRUCTIONS 1920 FT MSL /1000 FT AGL/ 333858 970233W.

FDC 5/2888 FDC CHART CORRECTION OMAHA SECTIONAL 32ND EDITION DATED AUGUST 29 1985. ADD OBSTRUCTION 1392 FT MSL /275 FT AGL/AND ASSOCIATED TYPE-OVERHEAD PIPELINE 423548N 964135W.

FDC 5/2509 AUTOMATED VOICE AIRPORT RESERVATION SYSTEM../AVARS/. IN ORDER TO IMPROVE THE AVARS CAPACITY THE FAA HAS INSTALLED TWO ADDITIONAL NON-TOLL FREE NUMBERS..617-275-4837/8. EFFECTIVE NOVEMBER 1 1985 TWO ADDITIONAL TOLL FREE LINES WILL BE AVAILABLE TO BE PART OF 1-800-FAA-1212 NUMBER. FAA PLANS TO CONTINUE THE DUAL /ARO/SYSTEM USING THE AUTOMATED SYSTEM ON 1-800-FAA-1212 AND THE MANUAL ARO SYSTEM WITH NEW YORK 718-632-7808/CHICAGO 312-263-2575 AND WASHINGTON DC 202-426-9347 UNTIL FURTHER NOTICE. IN AREAS WHERE TOUCH TONE PHONE SYSTEMS ARE NOT AVAILABLE USERS MAY EITHER CONTACT THE NEAREST FAA FLIGHT SERVICE STATION OR THE /ARO/ AT THE NUMBERS LISTED ABOVE AND REQUEST A RESERVATION. USERS DEPARTING A TRANS-ATLANTIC AIRPORT FOR ARRIVAL TO A HIGH DENSITY AIRPORT SHOULD CONTINUE TO USE THE PROCEDURES OUTLINED IN ADVISORY CIRCULAR AC 90-43F PARA 8 DATED APRIL 22 1985 WHICH STATES CONTACT THE NEAREST FLIGHT SERVICE STATION.

FDC 5/2193 FI/P MTR CORRECT IR-501 MILITARY TRAINING ROUTE/POINT AJ. CHANGE FAC/RAD/DIST POINT AJ TO GLD 354/35.

FDC 5/2136 FI/T CORRECT U.S. GOVT SECTIONAL CHART ANCHORAGE, AK. 36TH EDITION DATED JULY 4, 1985. CHANGE ELEVATION FOR BIG LAKE AIRPORT, AK. FROM 750 FEET TO 150 FEET. COORDINATES ARE 61 DEGREES 32 MIN. 10 SEC. NORTH/ 149 DEGREES 48 MIN. 42 SEC. WEST.

FDC 5/2130........SPECIAL NOTICE.........INTERNATIONAL FLIGHT PLAN FORM.........INSTRUCTIONS FOR USING FAA FORM 7233-4. ICAO DOCUMENT 4444 AMENDMENT 6 EFFECTIVE NOVEMBER 21 1985 SPECIFIES SEVERAL CHANGES IN ICAO INTERNATIONAL FLIGHT PLAN FORMAT. FAA WILL ACCEPT THE NEW ICAO FORMAT EXCEPT AIRCRAFT SPEED/ALTITUDE FILED IN METRIC TERMS. THEREFORE TO COMPLY AS CLOSELY AS POSSIBLE WITH AMENDMENT 6 THE FOLLOWING ADDITIONAL PROCEDURES WILL APPLY BEGINNING NOVEMBER 21 WHEN USING FAA FORM 7233-4.........1. FAA FORM 7233-4, ITEM 13, HAS A SPACE FOR FIR BOUNDARIES AND ESTIMATED TIMES. FAA REQUIRES FILED FIR BOUNDARIES AND ESTIMATED TIMES, HOWEVER, PUT THAT INFORMATION IN ITEM 18, OTHER INFORMATION AS SPECIFIED IN ICAO FORMAT.......2. CONCERNING FAA FORM 7233-4, ITEM 15, THE U.S. AIR TRAFFIC SERVICE DOES NOT ACCEPT AIRCRAFT SPEED/ALTITUDE FILED IN METRIC TERMS.......3. IN ITEM 17, IN THE SECTION LABELED ETA, INSTEAD PUT TOTAL ESTIMATED ELASPED TIME/TOTAL EET/.......THE PRESENT SUPPLY OF FAA FORM 7233-4 WILL BE USED UNTIL EXHAUSTED AND REPLACED BY A NEW REVISED FAA INTERNATIONAL FLIGHT PLAN FORM.....DETAILED FAA POLICY, EXPLANATION OF CHANGES, DEFINITIONS, AND RESPONSIBILITIES CONCERNING THESE ICAO FLIGHT PLAN FORMAT CHANGES WILL BE ISSUED TO FAA AIR TRAFFIC PERSONNEL IN THE NATIONAL HEADQUARTERS DIRECTIVE NEAR THE END OF SEPTEMBER.

FDC 5/594 AIRPORT RESERVATION OFFICE/ARO/OPERATIONS.... EFF APR 1, 1985...THE FOLLOWING GUIDELINES SHALL BE IN EFFECT.... /ARO/WILL ACCEPT RSVNS FOR WASHINGTON NATIONAL AIRPORT /DCA, JOHN F. KENNEDY INTL ARPT /JFK, LA GUARDIA ARPT/LGA, AND CHICAGO O HARE INTL ARPT /ORD BEGINNING 48 HRS PRIOR TO THE PROPOSED TIME OF OPERATION AT THE AFFECTED ARPT. E.G REQ FOR 11 A.M. OPERATION ON THURSDAY WILL BE ACCEPTED STARTING 11 A.M. ON THE PRECEDING TUESDAY. AN EXCEPTION TO THE 48 HR LIMITATION IS MADE FOR WEEKENDS TO RECOGNIZE NORMAL BUSINESS HOURS. A RSVN REQ FOR AN IFR OPERATION ON MONDAY WILL BE ACCEPTED ON THE PREVIOUS THURSDAY STARTING AT THE PROPOSED HR OF OPERATION. REQUESTS FOR IFR OPERATION ON TUESDAY WILL BE ACCEPTED ON THE PREVIOUS FRIDAY STARTING AT THE PROPOSED HR OF OPERATION. E.G. REQ FOR 11 A.M. RSVN ON TUESDAY WOULD BE ACCEPTED BEGINNING 11 A.M. ON FRIDAY. IF THE PREVIOUS FRIDAY IS AN OBSERVED HOLIDAY THE PROCEDURE WILL BE IN EFFECT ON THURSDAY. A MAXIMUM OF TWO RSVNS PER PHONE CALL WILL BE ACCEPTED. E.G. A PILOT MAY REQ A RSVN FOR ARRIVAL AND DEPARTURE DURING THE SAME PHONE CALL PROVIDING BOTH FALL ON THE SAME CALENDAR DAY. E.G. A RSVN REQ FOR 11 A.M. ARRIVAL ON FRIDAY AND 4 P.M. DEPARTURE ON THE SAME DAY MAY BE MADE BEGINNING AT 11 A.M. ON WEDNESDAY.

FDC 4/3277 NOTAM /D/REGARDING RWY SNOW CONDITIONS AND BRAKING ACTION REPORTS FOR CANADIAN AIRPORTS WILL NO LONGER BE ENTERED INTO THE DOMESTIC NOTAM SYSTEM OR SERVICE A BY NFDC. CONTACT THE ASSOCIATED CANADIAN FLIGHT SERVICE STATION FOR THESE REPORTS.

FDC 4/1725 FDC U.S. NOTAM OFFICE POLICY ON FDC NOTAM STORAGE IN CONSOLIDATED NOTAM SYSTEM /CNS/DATA BASE/. ALL CURRENT FDC NOTAMS ARE STORED AND AVAILABLE UPON REQUEST. FDC NOTAMS WHICH ARE STRAIGHT CANCELLATIONS ARE STORED FOR THREE /3/ DAYS. BASED ON COMPUTER DEMANDS SIGNIFICANT TIME DELAYS ON RETRIEVALS CAN BE EXPECTED. NOTE...REPEATED REQUESTS WILL FURTHER COMPOUND DELAYS. THEREFORE FSS AND USER GROUPS ARE ADVISED TO COLLECT AND STORE REQUIRED FDC NOTAM/S ON INITIAL SERVICE /A/ DISTRIBUTION SUPPLEMENTED BY CLASS 2 NOTAM PUBLICATION.

HAZARDOUS INFLIGHT WEATHER ADVISORY SERVICE (HIWAS)

HIWAS is a national program for broadcasting hazardous weather information (SIGMET's, convective SIGMET's, Center Weather Advisories (CWA), AIRMET's, and urgent PIREP's) on a continuous basis over selected VOR's. The program is operational in the Jacksonville, Miami, and Houston Air Route Traffic Control Center (ARTCC) areas. The chart on the following page identifies the current broadcast outlet locations and frequencies. Frequencies shown in the Atlanta ARTCC area are for planning purposes only. HIWAS will be expanded on an ARTCC by ARTCC basis.

Pilots should be aware that:

* Flight service stations broadcast information on hazardous weather not yet covered by an advisory and make an announcement on their frequencies that new HIWAS information is available.

* Controllers in ARTCC's and air traffic control terminals announce updates to HIWAS information on all appropriate frequencies.

* Controllers and specialists will not routinely broadcast SIGMET's, convective SIGMET's, CWA's, AIRMET's, and urgent PIREP's in the commissioned HIWAS areas.

User comments regarding the effectiveness of the HIWAS program and any proposed revision to HIWAS procedures are solicited.

Mail comments to:

Department of Transportation
Federal Aviation Administration
ATTN: ATO-360
800 Independence Ave. S.W.
Washington, DC 20591

Note: For further information on the HIWAS program, refer to the Airman's Information Manual (AIM) and Airport/Facility Directory (AFD). Operational sites are published in the AFD under radio aids to navigation.

The Interim Voice Response System

The Federal Aviation Administration has leased an Interim Voice Response System (IVRS) that enables pilots throughout the country to obtain selected weather information directly from a computer. The pilot enters requests for specific weather reports for locations of interest by depressing the keys on a Touchtone (R) telephone or keypad adapter on non-Touchtone (R) telephones. The computer will "listen" to telephone signalling tones and will respond with a spoken message derived from stored human speech.

The IVRS is a national system consisting of a network of 16 locations with "speaking" computers, and prepaid telephone access from an additional 8. The locations and telephone numbers are listed below. Call the telephone number nearest you at any time day or night, using any standard 12-key touch-tone phone. For long distance numbers outside your area code, call 1 plus Area Code and number. For assistance or trouble reporting call toll free 1-800-FOR-IVRS at any time.

	Area Code	Number

IVRS Weather Products

1. SEVERE WEATHER FORECAST ALERTS (AWW) inform pilots of forthcoming severe thunderstorms or tornadoes. They are available automatically when you enter a location identifier (LOCID) or TWEB route number for a state in which a Severe Weather Forecast Alert is in effect.

   ISSUED: As necessary.

2. **CONVECTIVE SIGMETS (WST) concern thunderstorms and related phenomena. They are available automatically when you enter a LOCID or TWEB route number for a state in which a Convective SIGMET is in effect.**

   ISSUED: Hourly at 55 minutes past the hour and as needed.

3. **SURFACE OBSERVATIONS (SA) provide observed surface weather conditions for the LOCIDs entered.**

   ISSUED: Hourly on the hour and as needed.

4. **TERMINAL FORECASTS (FT) provide a forecast of weather conditions for the LOCIDs entered.**

   ISSUED: Approximately 1000, 1500, and 2200 GMT and as necessary.

5. **WINDS ALOFT FORECASTS (GF) describe winds and temperatures for the LOCIDs entered. You specify the altitude and number of hours into the future and receive winds and temperatures at your requested altitude plus an altitude above and one below the requested altitude.**

   ISSUED: Unscheduled, but typically at 0400 and 1600 GMT.

6. **TWEB ROUTE FORECASTS (TR) provide a forecast of weather conditions within a 50-mile-wide corridor along a route and within a 50-mile radius for local vicinity forecasts.**

   ISSUED: Approximately 1200, 1800, and 2400 GMT and as needed.

How to Use IVRS

The instructions on how to use IVRS are contained in A Pilot's Guide to IVRS published by the Federal Aviation Administration. You may obtain a copy from any FAA Flight Standards District Office or Flight Service Station.

COLORADO SKI COUNTRY AIRPORTS
SPECIAL AIR TRAFFIC MANAGEMENT PROGRAM

Aspen, Colorado
  Aspen-Pitkin County/Sardy Field Airport (ASE)
Eagle, Colorado
  Eagle County Airport (EGE)
Gunnison, Colorado
  Gunnison Country Airport (GUC)

In anticipation of the large number of aircraft operating into the Aspen-Pitkin County/Sardy Field, Eagle County, and Gunnison County airports during ski season, the following procedures have been implemented November 22, 1985 through April 6, 1986 to enhance safety and minimize traffic delays:

IFR ARRIVALS

Due to the additional volume of unscheduled IFR traffic expected to be generated within the Denver Center airspace, a special traffic management program will be in effect through April 6, 1986.

TRAFFIC MANAGEMENT PROGRAM

Unscheduled IFR flights operating into a Colorado Ski Country Airport should file an appropriate preferred route during the hours 1400 UTC and 0300 UTC (0700 MST -2000 MST) daily.

To Aspen, Colorado (ASE)

Route 1....FROM OVER FIXES BETWEEN CHE CLOCKWISE TO IOC: FILE VIA RLG.V421.SKIER..ASE

*Route 1....FROM OVER FIXES BETWEEN DEN CLOCKWISE TO COS: FILE VIA DEN..DBL..ASE

+Route 2....FROM OVER FIXES BETWEEN IOC CLOCKWISE TO FMN: FILE VIA GUC.V421.SKIER..ASE

*Route 2....FROM OVER FIXEX BETWEEN COS CLOCKWISE TO GUC: FILE VIA GUC..DBL..ASE

+Route 3....FROM OVER FIXES BETWEEN FMN CLOCKWISE TO PUC: FILE VIA JNC.V134.GLENO..ASE

*Route 3....FROM OVER FIXES BETWEEN GUC CLOCKWISE TO DEN: FILE VIA DBL..ASE

+Route 4....FROM OVER FIXES BETWEEN PUC CLOCKWISE TO CHE: FILE VIA EKR.EKR120R.SKIER..ASE

To Eagle, Colorado (EGE)

#Route 1....FROM OVER FIXES BETWEEN CHE CLOCKWISE TO IOC: FILE VIA RLG.RLG189R.STUPE..EGE

#Route 2....FROM OVER FIXES BETWEEN IOC CLOCKWISE TO FMN: FILE VIA GUC.V421.HAMPS..EGE

+Route 3....FROM OVER FIXES BETWEEN FMN CLOCKWISE TO PUC: FILE VIA JNC.V8.RLG.RLG189R.STUPE..EGE

*Route 3....FROM OVER FIXES BETWEEN FMN CLOCKWISE TO PUC: FILE VIA JNC.V134.DBL.V421.HAMPS..EGE

#Route 4....FROM OVER FIXES BETWEEN PUC CLOCKWISE TO CHE: FILE VIA EKR.V200.RLG.RLG189R.STUPE..EGE

To Gunnison, Colorado (GUC)

VIA AIRWAYS

EXCEPTION: TRAFFIC WILL NOT BE ROUTED DEN J10/J128 GUC

ADVISE ATC OF ALTERNATE AIRPORT PRIOR TO STARTING APPROACH.

Additional routing may be assigned by ATC based on weather and traffic density.

Pilots destined for ski country airports are encouraged to plan their arrivals Monday through Thursday to avoid extensive arrival delays. Extensive arrival delays can be anticipated between the hours of 1900 UTC and 0100 UTC (1200 MST-1800 MST) Friday, Saturday and Sunday.

Pilots may obtain additional traffic management information from the nearest flight service station (FSS).

FSS's can obtain traffic management information from Denver Center Traffic Management Unit, telephone FTS 323-4246 or commercial 303-651-4246.

* Amended routes effective January 16, through April 6, 1986.

Routes valid daily through April 6, 1986

+ Routes not valid after January 15, 1986

Project GALE Meteorological Study

A large scale meteorological study will be conducted from January 15 to March 15, 1986, in the Carolinas and Southeastern Virginia including the adjacent coastal offshore airspace.

The project is known as "GALE--Genesis of Atlantic Low Experiment." The GALE study will investigate the explosive development of East Coast storms which present a serious forecasting problem and often cause severe thunderstorms over the east and northeastern United States. Particular attention will be paid to the role of the air-sea-land interactions and mesocale effects in the rapid development of coastal cyclones. Scientists, meteorologists, and aviators from some 35 or more governmental agencies and state and private universities are committed to the GALE Project.

Some ten or more research aircraft will be deployed to fly routes and flight patterns, both overland and offshore, within the GALE Project Study Area. Most of these aircraft will be based at Raleigh, North Carolina during the GALE study. Offshore activities will include dropwindsonde releases along predetermined tracks located in the United States Gulf and Atlantic offshore areas between 90° West longitude and 70° West longitude. All dropwindsonde releases will occur more than 60NM offshore.

Operations will be directed from the National Center for Atmospheric Research, GALE Project, Boulder, Colorado (303-497-100). During the study period, an Operations Office will be located at the Raleigh-Durham Airport. A phone number will be published later for the GALE Operations Office."

Actual flight operating times will depend on developing storm conditions. Pilots operating within the GALE Project Study Area may receive status information from the appropriate ATC facility.

AIRPORT RADAR SERVICE AREAS (ARSA)

The National Airspace Review Terminal Airspace Task Group 1-2.2 recommended the ARSA Program as a replacement for the existing Terminal Radar Service Area Program and the FAA has adopted that recommendation. ARSA designations have been made, and effective dates established, for the locations listed below. The following is a summary of the pilot requirements and the ATC procedures for ARSA's. Graphic depictions of each ARSA are also included.

Unless otherwise authorized or required by ATC, the following provisions apply to aircraft operating within an ARSA:

1. Aircraft approaching that would penetrate the ARSA must establish two-way radio communications with ATC prior to entering the ARSA and maintain that communication while operating within the ARSA.

2. Aircraft departing the primary airport within the ARSA must establish two-way communications with ATC prior to departure and maintain that communication while operating within the ARSA. Aircraft departing a satellite airport within the ARSA must contact ATC as soon as practicable after takeoff.

3. Except in an emergency, all operations must be in compliance with ATC clearances and instructions.

4. All arrivals and departures within the ARSA must be in compliance with FAA arrival and departure traffic patterns.

5. Ultralight vehicles and parachute operations may not be conducted within the ARSA except under the terms of an ATC authorization.

6. NOTAM's pertaining to flight within the ARS must be reviewed as a part of preflight action required by FAR 91.5.

Within ARSA's, ATC will provide the following services:

1. Radar sequencing of all arrivals.

2. Standard separation between all instrument flight rules (IFR) flights.

3. Traffic advisories and safety advisories to all aircraft.

4. Resolve any potential conflict between an aircraft operating IFR and an aircraft operating under visual flight rules (VFR).

ARSA's have been designated at the following locations to be effective December 19, 1985.

Albany County Airport, NY
Anchorage International Airport, AK
Bradley International Airport, Windsor Locks, CT
Corpus Christi International Airport, TX
Long Island MacArthur Airport, Islip, NY

SUPER BOWL XX

SPECIAL TRAFFIC MANAGEMENT PROGRAM

NEW ORLEANS, LOUISIANA

JANUARY 23 THROUGH 27, 1986

In anticipation of the large number of aircraft operating to/from the New Orleans, Louisiana, area during the week of Super Bowl XX, special traffic management procedures will be used to enhance safety and minimize air traffic delays at New Orleans International/Moisant Field (MSY) and New Orleans Lakefront (NEW) Airports .

TRAFFIC MANAGEMENT PROGRAM

Traffic management EDCT's are to be obtained prior to filing an IFR flight plan to MSY or NEW for arrivals with ETA's between the hours of 1300-0300 UTC (0700 CST-2100 CST) daily. EDCT's may be obtained from the the nearest flight service station or by calling Houston Center 713-230-5561 or 713-230-5566 during the hours 1300 -0300 UTC (0700 CST-2100 CST), January 22 through January 26. EDCT's will not be assigned more than 48 hours in advance of proposed time of departure.

Adherence to an EDCT within plus or minus 10 minutes is essential to preclude substantial delays.

Flight plans should be filed with the nearest flight service station (FSS) AFTER receiving an EDCT and at least 4 hours prior to the proposed time of departure. Include the EDCT in the remarks section of the flight plan. (Flight Plans may be filed concurrently with EDCT requests made with flight service stations.)

Except for emergency situations, Houston Center will not accept IFR flight plans to New Orleans airports from airborne aircraft while this program is in effect. Airborne IFR flight plans filed with other facilities may experience extensive delays awaiting integration into the IFR system.

IFR ARRIVAL

Due to the expected increased volume of IFR traffic within Houston Center airspace, a special traffic management program will be in effect from January 23 through January 26, 1986. Houston Center will assign an Expected Departure Clearance Time (EDCT) for each unscheduled flight destined for New Orleans International/Moisant Field or New Orleans Lakefront Airports. Turbojet can expect speed and altitude crossing restrictions within 30 miles of New Orleans (MSY) VORTAC

ATIS

Monitor ATIS prior to initial contact inbound and engine start up outbound.

Moisant 126.7mHz Lakefront 124.9mHz

VFR ARRIVALS

NEW ORLEANS TERMINAL CONTROL AREA (TCA)

Due to the anticipated increased volume of traffic, enroute aircraft desiring to traverse the TCA may expect delays, alternate route outside the TCA are recommended (See New Orleans VFR Terminal Area Chart). Contact New Orleans Approach Control between 30-40 miles of MSY VORTAC for advisories and/or TCA clearance.

IFR/VFR DEPARTURES

POST GAME

DO NOT request IFR departure clearance prior to 20 minutes before estimated time of departure (ETD).

Expect gate hold procedures to be in effect.

Do not begin taxiing until clearance is received from Ground Control.

Do not contact tower for take off until in the #1 position for take off.
(State complete aircraft identification and departure runway.)

FLIGHT SERVICE STATION INFORMATION

VFR aircraft are encouraged to cancel/activate flight plans with DeRidder Flight Service Station (FSS) when approaching/departing the City of New Orleans.

FREQUENCIES

122.6 mHz transmit/receive
255.4 mHz transmit/receive

FLIGHT PLAN AND PILOT BRIEFING TELEPHONE NUMBERS

504-528-9393
800-522-3325

Departure flight plans should be filed with DeRidder Flight Service Station at least 4 hours prior to proposed time of departure.

OVERFLIGHT

Aircraft not landing in the New Orleans area are requested to avoid overflight below 16,000 feet within 40 nautical miles of MSY VORTAC between the hours of 1300-0300 UTC (0700 CST-2100 CST) January 23 through January 27.

WAKE TURBULENCE ADVISORY

Due to the numbers of large aircraft operating in the vicinity of New Orleans International and Lakefront Airports, pilots should be aware that wake turbulence may exist. Pilots are urged to be vigilant and exercise extreme caution when operating within 30 nautical miles of New Orleans.

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAMS AND ARRIVAL/DEPARTURE PROCEDURES PRIOR TO CONDUCTING FLIGHT.

TD 4.12/2:

FOREWORD

The primary references for changes to the National Airspace System (NAS) are Aeronautical Charts and Airport/Facility Directories (A/FD) published for the affected area(s). Ideally, most changes to the NAS that meet NOTAM criteria are known sufficiently in advance to allow publication in these publications. When this cannot be done, changes are carried in the Notices to Airman Class II publication, or as a last resort, on the Service A telecommunications system as a NOTAM D item.

NOTAM D information printed in this publication will not be included on the Service A system and will not be provided during pilot briefings unless specifically requested by the pilot.

National Flight Data Center (FDC) NOTAMs primarily reflect changes to Standard Instrument Approach Procedures (SIAPs), Flight Restrictions, and aeronautical chart revisions. The last FDC NOTAM included in this issue is indicated by number and date above. This information insures that subsequent FDC NOTAMs, issued after the cutoff date, can be identified.

The Class II publication contains information of a temporary nature, which is expected to remain for an extended period. This temporary information is carried until it expires or is cancelled. Data of a permanent nature is sometimes carried in the Class II publication as an interim step prior to publication on the appropriate charts or in the A/FD.

The Class II publication is issued every 14 days. The A/FD is published every 56 days. Data in the Class II publication that is current on the effective date of the next A/FD will be transferred to the A/FD and removed from the Class II publication.

Facilities are responsible for forwarding data to the National Flight Data Center (NFDC). Data, still current for the next available Class II publication date, will be published.

This publication is divided into two sections:

1. Section One contains information divided into four categories:

   a. GENERAL
   b. AIRWAYS
   c. FLIGHT RESTRICTIONS
   d. AIRPORTS / FACILITIES / PROCEDURAL NOTAMS

The first subsection is listed in descending FDC NOTAM numerical order. The second and third subsections are listed by state. The fourth subsection is ordered by state, city, and airport name.

2. The second section contains special notices that are too long or that concern a wide or unspecified geographical area (which may overlap several states) and are not suitable for inclusion in the first section.

The content of these notices vary widely and are included because of their significant impact on flight safety.

NOTES

1. All times are indicated as UTC or local. During periods of Daylight Savings Time, effective hours in local time will be one hour earlier than shown. All states observe Daylight Savings Time except Arizona, that portion of Indiana in the Eastern Time Zone, Puerto Rico, and the Virgin Islands.

2. (¦) Vertical line items indicate new information.

FDC NOTAM LEGEND

Code	Explanation
5/103	Accountability number assigned to the message originator.
FI/T	Flight information of a temporary nature.
FI/P	Flight information of a permanent nature.

(A) Information for Section 1 should be submitted to the National Flight Data Center (ATO-250).
(B) Camera-ready copy for Section 2 should be submitted to ATO-200.

ADDRESSING INFORMATION FOR SECTION 1

Federal Aviation Administration, National Flight Data Center (ATO-250), 800 Independence Ave, SW., Washington, DC 20591.

Phone: Commercial—(202)426-3813/3390.

Phone: FTS—426-3238/3390.

ADDRESSING INFORMATION FOR SECTION 2

Federal Aviation Administration, ATO-200, 800 Independence Ave, SW., Washington, DC 20591.

Phone: Commercial—(202)426-3731.

Phone: FTS—426-3731.

SUBSCRIPTION INFORMATION

HOW TO ORDER

The Notices to Airmen publication is available by subscription through the Superintendent of Documents. Subscriptions are accepted for a 1 year period. Remittance must be made in advance of shipment. Your check or money order must be made payable to the Superintendent of Documents. Orders can also be charged to your VISA or MASTERCARD account. Orders should be addressed to:

Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402,

or

Phone: (202)783-3238 (Order Desk).

ABBREVIATIONS

The following abbreviations are those most commonly used within this publication. Other abbreviations may be found in the Contraction Handbook, 7340.1.

Note: An "s" may be added for plural. Abbreviations used in FDC NOTAMs are italicised.

A	
/	and
AAS	Airport Advisory Service
A/C	Approach Control
acft	aircraft
ACR	Air Carrier
ADF	Automatic Direction Finder
AER	Approach End Runway
AGL	above ground level
AIM	Airman's Information Manual
ALS	Approach light system
ALSF-1	Standard 2400' High-intensity Approach Lighting System with Sequenced Flashers, Category I Configuration
ALSF-2	Standard 2400' High-Intensity Approach Lighting System with Sequenced Flashers, Category II Configuration
alt	altitude
altm	altimeter
altn	alternate
ALSTG	altimeter setting
amdt	amendment
apch	approach
apchg	approaching
aprx	approximate
arpt	airport
arr	arrive or arrival
ARSR	Air Route Surveillance Radar
ARTCC	Air Route Traffic Control Center
ASDE	airport surface detection equipment
ASR	Arpt Surveillance Radar
ATC	air traffic control
ATCT	air traffic control tower
ATIS	Automatic Terminal Information Service
avbl	available
awy	airway
B	
BC	back course
bcn	beacon
bcst	broadcast
bldg	building
brg	bearing
btn	between
byd	beyond
C	
cat	category
CFR	crash fire rescue
clnc	clearance
clsd	closed
cmsnd	commissioned
cntr	center
cntrln	centerline
Comlo	Compass locator
const	construction
cpty	capacity
crs	course
ctc	contact
CTLZ	Control Zone
D	
dalgt	daylight
dcmsnd	decommissioned
degs	degrees
dep	depart, departure
DF	direction finder
DH	decision height
DME	UHF standard TACAN compatible distance measuring equipment
dsplcd	displaced
dist	distance
durg	during
DVFR	Defense Visual Flight Rule
E	
E	east
EFAS	Enroute Flight Advisory Service
elev	elevation
emerg	emergency
equip	equipment
excp	except
F	
FAF	final approach fix
FAR	Federal Aviation Regulation
FDC	Flight Data Center
FI/P	flight information (permanent)
FI/T	flight information (temporary)
FL	Flight Level
FM	from
freq	frequency
FSS	Flight Service Station
ft	feet/foot
G	
govt	government
GS	glide slope
GWT	gross weight
H	
HAA	height above airport
HAT	height above touchdown
HIRL	High Intensity Runway Lights
hol	holiday
hwy	highway
I	
IAF	initial approach fix
IAP	initial approach procedure
ident	identification
IF	intermediate fix
IFR	Instrument Flight Rules
IFSS	International Flight Service Station
ILS	instrument landing system
info	information
inop	inoperative
int	intersection
intl	international
intst	intensity
ISMLS	Interim Standard Microwave Landing System
J	
J-bar	jet runway barrier
K	
kHz	kilohertz
L	
L	left (used only to designate rwys) eg. rwy 12L
lat	latitude
lb	pounds (weight)
locd	located
LDA	Localizer type directional aid
LDIN	Lead-in Lighting System
lgtd	lighted
LMM	compass locator at middle marker ILS
lndg	landing
loc	localizer
LOM	compass locator at outer marker ILS
long	longitude
M	
MAA	maximum authorized altitude
mag	magnetic
maint	maintain, maintenance
MALS	Medium Intensity Approach Light System
MALSR	Medium Intensity Approach Light System with Runway Alignment Indicator Lights
MAP	missed approach point
max	maximum
MCA	minimum crossing altitude
MDA	minimum descent altitude
MEA	minimum enroute IFR altitude
MHz	megahertz
min	minimum or minute
MIRL	Medium Intensity Runway Edge Lights
MLS	Microwave Landing System
MM	middle marker ILS
MOCA	minimum obstruction clearance altitude
MRA	minimum reception altitude
MSA	minimum safe altitude
MSL	mean sea level
muni	municipal
N	
N	north
NA	not authorized
natl	national
navaid	navigational aid
NDB	Non-directional Radio Beacon
NM	nautical mile(s)
NOPT	no procedure turn required
Nr	number
O	
obstn	obstruction
ODALS	Omnidirectional Approach Lighting System
OM	outer marker ILS
oper	operate
opn	operation
orig	original
OTS	Out of Service
ovrn	overrun
P	
PAR	Precision Apch Radar
pat	pattern
permly	permanently
PPR	Prior Permission Required
proc	procedure
Q	
quad	quadrant
R	
R	right (used only to designate rwys) eg. rwy 19R
RAPCON	radar approach control (USAF)
RCAG	Remote Center air/ground
RCLS	Runway Centerline Lights System
RCO	Remote Communications Outlet
rcv	receive
rcvg	receiving
REIL	Runway End Identifier Lights
req	request
RNAV	Area Navigation
RRP	Runway Reference Point
rstrd	restricted
RTS	returned to service
RVR	runway visual range
RVRM	Runway Visual Range Midpoint
RVRT	Runway Visual Range Touchdown
RVRR	Runway Visual Range Rollout
RVV	runway visibility values
rwy	Runway
S	
S	south/snow
SDF	Simplified Directional Facility
sec	second
sfc	surface
SFL	Sequenced Flashing Lights
SI	straight-in approach
SM	statute mile(s)
SR	sunrise
SS	sunset
SSAFL	Simplified Short Approach Lighting System with Sequenced Flashers
SSALS	Simplified Short Approach Lighting System
SSALR	Simplified Short Approach Lighting System with Runway Alignment Indicator Lights
STOL	Short take-off & landing runway
svc	service
T	
T	true (after a bearing)
TAC	Terminal Area Chart
TACAN	UHF navigational facility—omnidirectional course and distance information
TCA	Terminal Control Area
TCH	Threshold Crossing Height
tfc	traffic
thr	threshold
thru	through
tkof	take-off
tmprly	temporarily
tmpry	temporary
TPA	Traffic Pattern Altitude
TRACON	Terminal Radar approach control
trml	terminal
TRSA	Terminal Radar Service Area
trnst	transient
TWEB	transcribed weather bcst
twr	tower
twy	taxiway
U	
UHF	Ultra high frequency
unavbl	unavailable
unlgtd	unlighted
unmon	unmonitored
unusbl	unusable
V	
VASI	Visual Approach Slope Indicator
VDP	visual descent point
VFR	visual flight rules
VHF	Very high frequency
vis	visibility
VOR	VHF Omni-Directional Radio Range
VORTAC	Combined VOR and TACAN System
VOT	a VOR Receiver testing facility
vsby	visibility
W	
W	west
wea	weather
wkday	weekday
wkend	weekend
wp	waypoint
wt	weight

Z	Greenwich mean time

GENERAL

FDC 5/2609 FDC CHART CORRECTION DALLAS FT WORTH SECTIONAL 34TH EDITION DATED JULY 4 1985. ADD OBSTRUCTIONS 1920 FT MSL /1000 FT AGL/ 333606 970233W.

FDC 5/2606 FDC CHART CORRECTION OMAHA SECTIONAL 32ND EDITION DATED AUGUST 29 1985. ADD OBSTRUCTION 1302 FT MSL /275 FT AGL/AND ASSOCIATED TYPE-OVERHEAD PIPELINE 423545N 964135W.

FDC 5/2608 AUTOMATED VOICE AIRPORT RESERVATION SYSTEM../AVARS/. IN ORDER TO IMPROVE THE AVARS CAPACITY THE FAA HAS INSTALLED TWO ADDITIONAL NON-TOLL FREE NUMBERS..617-275-4837/8. EFFECTIVE NOVEMBER 1 1985 TWO ADDITIONAL TOLL FREE LINES WILL BE AVAILABLE TO BE PART OF 1-800-FAA-1212 NUMBER. FAA PLANS TO CONTINUE THE DUAL /ARO/SYSTEM USING THE AUTOMATED SYSTEM ON 1-800-FAA-1212 AND THE MANUAL ARO SYSTEM WITH NEW YORK 718-632-7806/CHICAGO 312-263-2575 AND WASHINGTON DC 202-426-8347 UNTIL FURTHER NOTICE. IN AREAS WHERE TOUCH TONE PHONE SYSTEMS ARE NOT AVAILABLE USERS MAY EITHER CONTACT THE NEAREST FAA FLIGHT SERVICE STATION OR THE /ARO/ AT THE NUMBERS LISTED ABOVE AND REQUEST A RESERVATION. USERS DEPARTING A TRANS-ATLANTIC AIRPORT FOR ARRIVAL TO A HIGH DENSITY AIRPORT SHOULD CONTINUE TO USE THE PROCEDURES OUTLINED IN ADVISORY CIRCULAR AC 90-43F PARA 5 DATED APRIL 22 1985 WHICH STATES CONTACT THE NEAREST FLIGHT SERVICE STATION.

FDC 5/2193 FI/P MTR CORRECT IR-501 MILITARY TRAINING ROUTE/POINT AJ. CHANGE FAC/RAD/DIST POINT AJ TO GLD 354/35.

FDC 5/2136 FI/T CORRECT U.S. GOVT SECTIONAL CHART ANCHORAGE, AK. 36TH EDITION DATED JULY 4, 1985. CHANGE ELEVATION FOR BIG LAKE AIRPORT, AK. FROM 750 FEET TO 150 FEET. COORDINATES ARE 61 DEGREES 32 MIN. 10 SEC. NORTH/ 149 DEGREES 48 MIN. 42 SEC. WEST.

FDC 5/2130.........SPECIAL NOTICE...........INTERNATIONAL FLIGHT PLAN FORM...........INSTRUCTIONS FOR USING FAA FORM 7233-4. ICAO DOCUMENT 4444 AMENDMENT 6 EFFECTIVE NOVEMBER 21 1985 SPECIFIES SEVERAL CHANGES IN ICAO INTERNATIONAL FLIGHT PLAN FORMAT. FAA WILL ACCEPT THE NEW ICAO FORMAT EXCEPT AIRCRAFT SPEED/ALTITUDE FILED IN METRIC TERMS. THEREFORE TO COMPLY AS CLOSELY AS POSSIBLE WITH AMENDMENT 6 THE FOLLOWING ADDITIONAL PROCEDURES WILL APPLY BEGINNING NOVEMBER 21 WHEN USING FAA FORM 7233-4..........1. FAA FORM 7233-4, ITEM 13, HAS A SPACE FOR FIR BOUNDARIES AND ESTIMATED TIMES. FAA REQUIRES FILED FIR BOUNDARIES AND ESTIMATED TIMES, HOWEVER, PUT THAT INFORMATION IN ITEM 18, OTHER INFORMATION AS SPECIFIED IN ICAO FORMAT........2. CONCERNING FAA FORM 7233-4, ITEM 15, THE U.S. AIR TRAFFIC SERVICE DOES NOT ACCEPT AIRCRAFT SPEED/ALTITUDE FILED IN METRIC TERMS........3. IN ITEM 17, IN THE SECTION LABELED ETA, INSTEAD PUT TOTAL ESTIMATED ELASPED TIME/TOTAL EET/........THE PRESENT SUPPLY OF FAA FORM 7233-4 WILL BE USED UNTIL EXHAUSTED AND REPLACED BY A NEW REVISED FAA INTERNATIONAL FLIGHT PLAN FORM.....DETAILED FAA POLICY, EXPLANATION OF CHANGES, DEFINITIONS, AND RESPONSIBILITIES CONCERNING THESE ICAO FLIGHT PLAN FORMAT CHANGES WILL BE ISSUED TO FAA AIR TRAFFIC PERSONNEL IN THE NATIONAL HEADQUARTERS DIRECTIVE NEAR THE END OF SEPTEMBER.

FDC 5/594 AIRPORT RESERVATION OFFICE/ARO/OPERATIONS... EFF APR 1, 1985...THE FOLLOWING GUIDELINES SHALL BE IN EFFECT... /ARO/WILL ACCEPT RSVNS FOR WASHINGTON NATIONAL AIRPORT /DCA, JOHN F. KENNEDY INTL ARPT /JFK, LA GUARDIA ARPT/LGA, AND CHICAGO O HARE INTL ARPT /ORD BEGINNING 48 HRS PRIOR TO THE PROPOSED TIME OF OPERATION AT THE AFFECTED ARPT. E.G REQ FOR 11 A.M. OPERATION ON THURSDAY WILL BE ACCEPTED STARTING 11 A.M. ON THE PRECEDING TUESDAY. AN EXCEPTION TO THE 48 HR LIMITATION IS MADE FOR WEEKENDS TO RECOGNIZE NORMAL BUSINESS HOURS. A RSVN REQ FOR AN IFR OPERATION ON MONDAY WILL BE ACCEPTED ON THE PREVIOUS THURSDAY STARTING AT THE PROPOSED HR OF OPERATION. REQUESTS FOR IFR OPERATION ON TUESDAY WILL BE ACCEPTED ON THE PREVIOUS FRIDAY STARTING AT THE PROPOSED HR OF OPERATION. E.G. REQ FOR 11 A.M. RSVN ON TUESDAY WOULD BE ACCEPTED BEGINNING 11 A.M. ON FRIDAY. IF THE PREVIOUS FRIDAY IS AN OBSERVED HOLIDAY THE PROCEDURE WILL BE IN EFFECT ON THURSDAY. A MAXIMUM OF TWO RSVNS PER PHONE CALL WILL BE ACCEPTED. E.G. A PILOT MAY REQ A RSVN FOR ARRIVAL AND DEPARTURE DURING THE SAME PHONE CALL PROVIDING BOTH FALL ON THE SAME CALENDAR DAY. E.G. A RSVN REQ FOR 11 A.M. ARRIVAL ON FRIDAY AND 4 P.M. DEPARTURE ON THE SAME DAY MAY BE MADE BEGINNING AT 11 A.M. ON WEDNESDAY.

FDC 4/3277 NOTAM /D/REGARDING RWY SNOW CONDITIONS AND BRAKING ACTION REPORTS FOR CANADIAN AIRPORTS WILL NO LONGER BE ENTERED INTO THE DOMESTIC NOTAM SYSTEM ON SERVICE A BY NFDC. CONTACT THE ASSOCIATED CANADIAN FLIGHT SERVICE STATION FOR THESE REPORTS.

FDC 4/1725 FDC U.S. NOTAM OFFICE POLICY ON FDC NOTAM STORAGE IN CONSOLIDATED NOTAM SYSTEM /CNS/DATA BASE/. ALL CURRENT FDC NOTAMS ARE STORED AND AVAILABLE UPON REQUEST. FDC NOTAMS WHICH ARE STRAIGHT CANCELLATIONS ARE STORED FOR THREE /3/ DAYS. BASED ON COMPUTER DEMANDS SIGNIFICANT TIME DELAYS ON RETRIEVALS CAN BE EXPECTED.
NOTE...REPEATED REQUESTS WILL FURTHER COMPOUND DELAYS. THEREFORE FSS AND USER GROUPS ARE ADVISED TO COLLECT AND STORE REQUIRED FDC NOTAM/S ON INITIAL SERVICE /A/ DISTRIBUTION SUPPLEMENTED BY CLASS 2 NOTAM PUBLICATION.

HAZARDOUS INFLIGHT WEATHER ADVISORY SERVICE (HIWAS)

HIWAS is a national program for broadcasting hazardous weather information (SIGMET's, convective SIGMET's, Center Weather Advisories (CWA), AIRMET's, and urgent PIREP's) on a continuous basis over selected VOR's. The program is operational in the Jacksonville, Miami, and Houston Air Route Traffic Control Center (ARTCC) areas. The chart on the following page identifies the current broadcast outlet locations and frequencies. Frequencies shown in the Atlanta ARTCC area are for planning purposes only. HIWAS will be expanded on an ARTCC by ARTCC basis.

Pilots should be aware that:

- Flight service stations broadcast information on hazardous weather not yet covered by an advisory and make an announcement on their frequencies that new HIWAS information is available.

- Controllers in ARTCC's and air traffic control terminals announce updates to HIWAS information on all appropriate frequencies.

- Controllers and specialists will not routinely broadcast SIGMET's, convective SIGMET's, CWA's, AIRMET's, and urgent PIREP's in the commissioned HIWAS areas.

User comments regarding the effectiveness of the HIWAS program and any proposed revision to HIWAS procedures are solicited.

Mail comments to:

Department of Transportation
Federal Aviation Administration
ATTN: ATO-360
800 Independence Ave. S.W.
Washington, DC 20591

Note: For further information on the HIWAS program, refer to the Airman's Information Manual (AIM) and Airport/Facility Directory (AFD). Operational sites are published in the AFD under radio aids to navigation.

The Interim Voice Response System

The Federal Aviation Administration has leased an Interim Voice Response System (IVRS) that enables pilots throughout the country to obtain selected weather information directly from a computer. The pilot enters requests for specific weather reports for locations of interest by depressing the keys on a Touchtone (R) telephone or keypad adapter on non-Touchtone (R) telephones. The computer will "listen" to telephone signalling tones and will respond with a spoken message derived from stored human speech.

The IVRS is a national system consisting of a network of 16 locations with "speaking" computers, and prepaid telephone access from an additional 8. The locations and telephone numbers are listed below. Call the telephone number nearest you at any time day or night, using any standard 12-key touch-tone phone. For long distance numbers outside your area code, call 1 plus Area Code and number. For assistance or trouble reporting call toll free 1-800-FOR-IVRS at any time.

	Area Code Number
Atlanta	(404) 876-2311
Boston	(617) 890-7475
Chicago	(312) 767-4800

IVRS Weather Products

1. SEVERE WEATHER FORECAST ALERTS (AWW) inform pilots of forthcoming severe thunderstorms or tornadoes. They are available automatically when you enter a location identifier (LOCID) or TWEB route number for a state in which a Severe Weather Forecast Alert is in effect.

   ISSUED: As necessary.

2. **CONVECTIVE SIGMETS (WST) concern thunderstorms and related phenomena. They are available automatically when you enter a LOCID or TWEB route number for a state in which a Convective SIGMET is in effect.**

   ISSUED: Hourly at 55 minutes past the hour and as needed.

3. **SURFACE OBSERVATIONS (SA) provide observed surface weather conditions for the LOCIDs entered.**

   ISSUED: Hourly on the hour and as needed.

4. **TERMINAL FORECASTS (FT) provide a forecast of weather conditions for the LOCIDs entered.**

   ISSUED: Approximately 1000, 1500, and 2200 GMT and as necessary.

5. **WINDS ALOFT FORECASTS (GF) describe winds and temperatures for the LOCIDs entered. You specify the altitude and number of hours into the future and receive winds and temperatures at your requested altitude plus an altitude above and one below the requested altitude.**

   ISSUED: Unscheduled, but typically at 0400 and 1600 GMT.

6. **TWEB ROUTE FORECASTS (TR) provide a forecast of weather conditions within a 50-mile-wide corridor along a route and within a 50-mile radius for local vicinity forecasts.**

   ISSUED: Approximately 1200, 1800, and 2400 GMT and as needed.

How to Use IVRS

The instructions on how to use IVRS are contained in A Pilot's Guide to IVRS published by the Federal Aviation Administration. You may obtain a copy from any FAA Flight Standards District Office or Flight Service Station.

COLORADO SKI COUNTRY AIRPORTS

SPECIAL AIR TRAFFIC MANAGEMENT PROGRAM

Aspen, Colorado
Aspen-Pitkin County/Sardy Field Airport (ASE)

Eagle, Colorado
Eagle County Airport (EGE)

Gunnison, Colorado
Gunnison Country Airport (GUC)

In anticipation of the large number of aircraft operating into the Aspen-Pitkin County/Sardy Field, Eagle County, and Gunnison County airports during ski season, the following procedures have been implemented to enhance safety and minimize traffic delays during the period January 16 through April 6, 1986.

IFR ARRIVALS

Due to the additional volume of unscheduled IFR traffic expected to be generated within the Denver Center airspace, a special traffic management program will be in effect through April 6, 1986.

TRAFFIC MANAGEMENT PROGRAM

Unscheduled IFR flights operating into a Colorado Ski Country Airport should file an appropriate preferred route during the hours 1400 UTC and 0300 UTC (0700 MST-2000 MST) daily.

To Aspen, Colorado (ASE)

Route 1....FROM OVER FIXES BETWEEN DEN CLOCKWISE TO COS: FILE VIA DEN..DBL..ASE

Route 2....FROM OVER FIXES BETWEEN COS CLOCKWISE TO GUC: FILE VIA GUC..DBL..ASE

Route 3....FROM OVER FIXES BETWEEN GUC CLOCKWISE TO DEN: FILE VIA DBL..ASE

To Eagle, Colorado (EGE)

Route 1....FROM OVER FIXES BETWEEN CHE
CLOCKWISE TO IOC: FILE VIA

To Gunnison, Colorado (GUC)

VIA AIRWAYS
EXCEPTION: TRAFFIC WILL NOT BE ROUTED DEN
J10/J128 GUC

ADVISE ATC OF ALTERNATE AIRPORT PRIOR TO STARTING APPROACH.

Additional routing may be assigned by ATC based on weather and traffic density.

Pilots destined for ski country airports are encouraged to plan their arrivals Monday through Thursday to avoid extensive arrival delays.
Extensive arrival delays can be anticipated between the hours of 1900 UTC and 0100 UTC (1200 MST-1800 MST) Friday, Saturday and Sunday.

Pilots may obtain additional traffic management information from the nearest flight service station (FSS).

FSS's can obtain traffic management information from Denver Center Traffic Management Unit, telephone FTS 323-4246 or commercial 303-651-4246.

Project GALE Meteorological Study

A large scale meteorological study will be conducted from January 15 to March 15, 1986, in the Carolinas and Southeastern Virginia including the adjacent coastal offshore airspace.

The project is known as "GALE--Genesis of Atlantic Low Experiment." The GALE study will investigate the explosive development of East Coast storms which present a serious forecasting problem and often cause severe thunderstorms over the east and northeastern United States. Particular attention will be paid to the role of the air-sea-land interactions and mesocale effects in the rapid development of coastal cyclones. Scientists, meteorologists, and aviators from some 35 or more governmental agencies and state and private universities are committed to the GALE Project.

Some ten or more research aircraft will be deployed to fly routes and flight patterns, both overland and offshore, within the GALE Project Study Area. Most of these aircraft will be based at Raleigh, North Carolina during the GALE study. Offshore activities will include dropwindsonde releases along predetermined tracks located in the United States Gulf and Atlantic offshore areas between 90° West longitude and 70° West longitude. All dropwindsonde releases will occur more than 60NM offshore.

Operations will be directed from the National Center for Atmospheric Research, GALE Project, Boulder, Colorado (303-497-100). During the study period, an Operations Office will be located at the Raleigh-Durham Airport. A phone number will be published later for the GALE Operations Office."

Actual flight operating times will depend on developing storm conditions. Pilots operating within the GALE Project Study Area may receive status information from the appropriate ATC facility.

GALE PROJECT STUDY AREA

COORDINATED UNIVERSAL TIME (UTC)

Coordinated Universal Time (UTC) has replaced Greenwich Mean Time (GMT) as the accepted international standard for clock time. UTC is the basis for civil time in most countries of the world rather than GMT. The Federal Aviation Administration has concurred with this change and advised the International Civil Aviation Organization that the conversion would become effective January 16, 1986. The letter "Z" will be retained to indicate "UTC". All United States Government Aeronautical charts and publications that are effective on January 16, 1986, will indicate UTC vice GMT.

AIRPORT RADAR SERVICE AREAS (ARSA)

The National Airspace Review Terminal Airspace Task Group 1-2.2 recommended the ARSA Program as a replacement for the existing Terminal Radar Service Area Program and the FAA has adopted that recommendation. ARSA designations have been made, and effective dates established, for the locations listed below. The following is a summary of the pilot requirements and the ATC procedures for ARSA's. Graphic depictions of each ARSA are also included.

Unless otherwise authorized or required by ATC, the following provisions apply to aircraft operating within an ARSA:

1. Aircraft approaching that would penetrate the ARSA must establish two-way radio communications with ATC prior to entering the ARSA and maintain that communication while operating within the ARSA.
2. Aircraft departing the primary airport within the ARSA must establish two-way communications with ATC prior to departure and maintain that communication while operating within the ARSA. Aircraft departing a satellite airport within the ARSA must contact ATC as soon as practicable after takeoff.
3. Except in an emergency, all operations must be in compliance with ATC clearances and instructions.
4. All arrivals and departures within the ARSA must be in compliance with FAA arrival and departure traffic patterns.
5. Ultralight vehicles and parachute operations may not be conducted within the ARSA except under the terms of an ATC authorization.
6. NOTAM's pertaining to flight within the ARS must be reviewed as a part of preflight action required by FAR 91.5.

Within ARSA's, ATC will provide the following services:

1. Radar sequencing of all arrivals.
2. Standard separation between all instrument flight rules (IFR) flights.
3. Traffic advisories and safety advisories to all aircraft.
4. Resolve any potential conflict between an aircraft operating IFR and an aircraft operating under visual flight rules (VFR).

ARSA's have been designated at the following locations to be effective December 19, 1985.

Albany County Airport, NY
Anchorage International Airport, AK
Bradley International Airport, Windsor Locks, CT
Corpus Christi International Airport, TX
Long Island MacArthur Airport, Islip, NY
Pensacola Naval Air Station, FL
Pensacola Regional Airport, FL
San Antonio International Airport, TX
Syracuse Hancock International Airport, NY

SUPER BOWL XX

SPECIAL TRAFFIC MANAGEMENT PROGRAM

NEW ORLEANS, LOUISIANA

JANUARY 23 THROUGH 27, 1986

In anticipation of the large number of aircraft operating to/from the New Orleans, Louisiana, area during the week of Super Bowl XX, special traffic management procedures will be used to enhance safety and minimize air traffic delays at New Orleans International/Moisant Field (MSY) and New Orleans Lakefront (NEW) Airports .

TRAFFIC MANAGEMENT PROGRAM

Traffic management EDCT's are to be obtained prior to filing an IFR flight plan to MSY or NEW for arrivals with ETA's between the hours of 1300-0300 UTC (0700 CST-2100 CST) daily. EDCT's may be obtained from the the nearest flight service station or by calling Houston Center 713-230-5561 or 713-230-5566 during the hours 1300 -0300 UTC (0700 CST-2100 CST), January 22 through January 26. EDCT's will not be assigned more than 48 hours in advance of proposed time of departure.

Adherence to an EDCT within plus or minus 10 minutes is essential to preclude substantial delays.

Flight plans should be filed with the nearest flight service station (FSS) AFTER receiving an EDCT and at least 4 hours prior to the proposed time of departure. Include the EDCT in the remarks section of the flight plan. (Flight Plans may be filed concurrently with EDCT requests made with flight service stations.)

Except for emergency situations, Houston Center will not accept IFR flight plans to New Orleans airports from airborne aircraft while this program is in effect. Airborne IFR flight plans filed with other facilities may experience extensive delays awaiting integration into the IFR system.

IFR ARRIVAL

Due to the expected increased volume of IFR traffic within Houston Center airspace, a special traffic management program will be in effect from January 23 through January 26, 1986. Houston Center will assign an Expected Departure Clearance Time (EDCT) for each unscheduled flight destined for New Orleans International/Moisant Field or New Orleans Lakefront Airports. Turbojet can expect speed and altitude crossing restrictions within 30 miles of New Orleans (MSY) VORTAC

ATIS

Monitor ATIS prior to initial contact inbound and engine start up outbound.

Moisant 126.7mHz Lakefront 124.9mHz

VFR ARRIVALS

NEW ORLEANS TERMINAL CONTROL AREA (TCA)

Due to the anticipated increased volume of traffic, enroute aircraft desiring to traverse the TCA may expect delays, alternate route outside the TCA are recommended (See New Orleans VFR Terminal Area Chart). Contact New Orleans Approach Control between 30-40 miles of MSY VORTAC for advisories and/or TCA clearance.

IFR/VFR DEPARTURES

POST GAME

DO NOT request IFR departure clearance prior to 20 minutes before estimated time of departure (ETD).

Expect gate hold procedures to be in effect.

Do not begin taxiing until clearance is received from Ground Control.

Do not contact tower for take off until in the #1 position for take off.
(State complete aircraft identification and departure runway.)

FLIGHT SERVICE STATION INFORMATION

VFR aircraft are encouraged to cancel/activate flight plans with DeRidder Flight Service Station (FSS) when approaching/departing the City of New Orleans.

FREQUENCIES

122.6 mHz transmit/receive
255.4 mHz transmit/receive

FLIGHT PLAN AND PILOT BRIEFING TELEPHONE NUMBERS

504-528-9393
800-522-3325

Departure flight plans should be filed with DeRidder Flight Service Station at least 4 hours prior to proposed time of departure.

OVERFLIGHT

Aircraft not landing in the New Orleans area are requested to avoid overflight below 16,000 feet within 40 nautical miles of MSY VORTAC between the hours of 1300-0300 UTC (0700 CST-2100 CST) January 23 through January 27.

WAKE TURBULENCE ADVISORY

Due to the numbers of large aircraft operating in the vicinity of New Orleans International and Lakefront Airports, pilots should be aware that wake turbulence may exist. Pilots are urged to be vigilant and exercise extreme caution when operating within 30 nautical miles of New Orleans.

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAMS AND ARRIVAL/DEPARTURE PROCEDURES PRIOR TO CONDUCTING FLIGHT.

SUPER BOWL XX

SPECIAL TRAFFIC MANAGEMENT PROGRAM

NEW ORLEANS, LOUISIANA

JANUARY 23 THROUGH 27, 1986

In anticipation of the large number of aircraft operating to/from the New Orleans, Louisiana, area during the week of Super Bowl XX, special traffic management procedures will be used to enhance safety and minimize air traffic delays at New Orleans International/Moisant Field (MSY) and New Orleans Lakefront (NEW) Airports .

TRAFFIC MANAGEMENT PROGRAM

Traffic management EDCT's are to be obtained prior to filing an IFR flight plan to MSY or NEW for arrivals with ETA's between the hours of 1300-0300 UTC (0700 CST-2100 CST) daily. EDCT's may be obtained from the the nearest flight service station or by calling Houston Center 713-230-5561 or 713-230-5566 during the hours 1300 -0300 UTC (0700 CST-2100 CST), January 22 through January 26. EDCT's will not be assigned more than 48 hours in advance of proposed time of departure.

Adherence to an EDCT within plus or minus 10 minutes is essential to preclude substantial delays.

Flight plans should be filed with the nearest flight service station (FSS) AFTER receiving an EDCT and at least 4 hours prior to the proposed time of departure. Include the EDCT in the remarks section of the flight plan. (Flight Plans may be filed concurrently with EDCT requests made with flight service stations.)

Except for emergency situations, Houston Center will not accept IFR flight plans to New Orleans airports from airborne aircraft while this program is in effect. Airborne IFR flight plans filed with other facilities may experience extensive delays awaiting integration into the IFR system.

IFR ARRIVAL

Due to the expected increased volume of IFR traffic within Houston Center airspace, a special traffic management program will be in effect from January 23 through January 26, 1986. CONTENT CRITERIA

Revised 1985

ALL AIRPORTS

TABLE 1

Information Category	Content Criteria
Airports	Abandonments (If currently listed in Airport/Facility Directory), Openings, Closings.
Runways	Openings, Closings, Commissionings, Permanent Closures.

NOTAM D AIRPORTS

TABLE 2

Information Category	Content Criteria
Airport Operating Restriction	CFR, ACR, etc.
Approach Light Systems	Commissionings, Changes, Decommissionings, Outages (with Effective Dates), Pilot Control (Commissionings, Decommissionings, Outages (with Effective Dates)).
Control Zones	Hours of Operation (in Local Time).
Displaced Thresholds	Implementation and Changes.
Runways	Ident Changes, Length, Width, Surface Composition Changes.
Runway Light Systems	Commissionings, Changes, Outages (with Effective Dates), Pilot Control (Commissionings, Decommissionings, Outages (with Effective Dates)).

NAVAIDS, COMMUNICATIONS, OTHER SERVICES

TABLE 3

Information Category	Content Criteria
Navigational Facilities	Commissionings (including Ident and Frequency), Decommissionings (including Ident and Frequency), Frequency Changes, Changes in Monitoring Facility and/or Status, Restrictions, Outages (with Effective Dates).
Air Traffic Control Towers, Approach Controls	Commissionings (including Frequencies), Hours of Operation, Decommissionings.
Flight Service Stations	Commissionings, Decommissionings, Hours of Operation; Commissionings, Decommissionings of RCO; Changes in Monitoring Status of RCO; Outages of RCO (with Effective Dates).
Weather	AWOS (System and Frequency).

TD4.12/2:

FOREWORD

The primary references for changes to the National Airspace System (NAS) are Aeronautical Charts and Airport/Facility Directories (A/FD) published for the affected area(s). Ideally, most changes to the NAS that meet NOTAM criteria are known sufficiently in advance to allow publication in these publications. When this cannot be done, changes are carried in the Notices to Airman Class II publication, or as a last resort, on the Service A telecommunications system as a NOTAM D item.

NOTAM D information printed in this publication will not be included on the Service A system and will not be provided during pilot briefings unless specifically requested by the pilot.

National Flight Data Center (FDC) NOTAMs primarily reflect changes to Standard Instrument Approach Procedures (SIAPs), Flight Restrictions, and aeronautical chart revisions. The last FDC NOTAM included in this issue is indicated by number and date above. This information insures that subsequent FDC NOTAMs, issued after the cutoff date, can be identified.

The Class II publication contains information of a temporary nature, which is expected to remain for an extended period. This temporary information is carried until it expires or is cancelled. Data of a permanent nature is sometimes carried in the Class II publication as an interim step prior to publication on the appropriate charts or in the A/FD.

The Class II publication is issued every 14 days. The A/FD is published every 56 days. Data in the Class II publication that is current on the effective date of the next A/FD will be transferred to the A/FD and removed from the Class II publication.

Facilities are responsible for forwarding data to the National Flight Data Center (NFDC). Data, still current for the next available Class II publication date, will be published.

This publication is divided into two sections:

1. Section One contains information divided into four categories:

a. GENERAL

b. AIRWAYS

c. FLIGHT RESTRICTIONS

d. AIRPORTS / FACILITIES / PROCEDURAL NOTAMS

The first subsection is listed in descending FDC NOTAM numerical order. The second and third subsections are listed by state. The fourth subsection is ordered by state, city, and airport name.

2. The second section contains special notices that are too long or that concern a wide or unspecified geographical area (which may overlap several states) and are not suitable for inclusion in the first section.

The content of these notices vary widely and are included because of their significant impact on flight safety.

NOTES

1. All times are indicated as UTC or local. During periods of Daylight Savings Time, effective hours in local time will be one hour earlier than shown. All states observe Daylight Savings Time except Arizona, that portion of Indiana in the Eastern Time Zone, Puerto Rico, and the Virgin Islands.

2. (¦) Vertical line items indicate new information.

FDC NOTAM LEGEND

Code	Explanation
5/103	Accountability number assigned to the message originator.
FI/T	Flight information of a temporary nature.
FI/P	Flight information of a permanent nature.

……

ABBREVIATIONS

The following abbreviations are those most commonly used within this publication. Other abbreviations may be found in the Contraction Handbook, 7340.1.

Note: An "s" may be added for plural. Abbreviations used in FDC NOTAMs are italicized.

A	
/	and
AAS	Airport Advisory Service
A/C	Approach Control
acft	aircraft
ACR	Air Carrier
ADF	Automatic Direction Finder
AER	Approach End Runway
AGL	above ground level
AIM	Airman's Information Manual
ALS	Approach light system
ALSF-1	Standard 2400' High-intensity Approach Lighting System with Sequenced Flashers, Category I Configuration
ALSF-2	Standard 2400' High-intensity Approach Lighting System with Sequenced Flashers, Category II Configuration
alt	altitude
altm	altimeter
altn	alternate
ALSTG	altimeter setting
amdt	amendment
apch	approach
apchg	approaching
aprx	approximate
arpt	airport
arr	arrive or arrival
ARSR	Air Route Surveillance Radar
ARTCC	Air Route Traffic Control Center
ASDE	airport surface detection equipment
ASR	Arpt Surveillance Radar
ATC	air traffic control
ATCT	air traffic control tower
ATIS	Automatic Terminal Information Service
avbl	available
awy	airway
B	
BC	back course
bcn	beacon
bcst	broadcast
bldg	building
brg	bearing
btn	between
byd	beyond
C	
cat	category
CFR	crash fire rescue
clnc	clearance
clsd	closed
cmsnd	commissioned
cntr	center
cntrln	centerline
Comlo	Compass locator
const	construction
cpcty	capacity
crs	course
ctc	contact
CTLZ	Control Zone
D	
dalgt	daylight
dcmsnd	decommissioned
degs	degrees
dep	depart, departure
DF	direction finder
DH	decision height
DME	UHF standard TACAN compatible distance measuring equipment
dsplcd	displaced
dist	distance
durg	during
DVFR	Defense Visual Flight Rule
E	
E	east
EFAS	Enroute Flight Advisory Service
elev	elevation
emerg	emergency
equip	equipment
excp	except
F	
FAF	final approach fix
FAR	Federal Aviation Regulation
FDC	Flight Data Center
FI/P	flight information (permanent)
FI/T	flight information (temporary)
FL	Flight Level
FM	from
freq	frequency
FSS	Flight Service Station
ft	feet/foot
G	
govt	government
GS	glide slope
GWT	gross weight
H	
HAA	height above airport
HAT	height above touchdown
HIRL	High Intensity Runway Lights
hol	holiday
hwy	highway
I	
IAF	initial approach fix
IAP	initial approach procedure
ident	identification
IF	intermediate fix
IFR	Instrument Flight Rules
IFSS	International Flight Service Station
ILS	instrument landing system
info	information
inop	inoperative
int	intersection
intl	international
intst	intensity
ISMLS	Interim Standard Microwave Landing System
J	
J-bar	jet runway barrier
K	
kHz	kilohertz
L	
L	left (used only to designate rwys) eg. rwy 12L
lat	latitude
lb	pounds (weight)
lctd	located
LDA	Localizer type directional aid
LDIN	Lead-in Lighting System
lgtd	lighted
LMM	compass locator at middle marker ILS
ldg	landing
loc	localizer
LOM	compass locator at outer marker ILS
long	longitude
M	
MAA	maximum authorized altitude
mag	magnetic
maint	maintain, maintenance
MALS	Medium Intensity Approach Light System
MALSR	Medium Intensity Approach Light System with Runway Alignment Indicator Lights
MAP	missed approach point
max	maximum
MCA	minimum crossing altitude
MDA	minimum descent altitude
MEA	minimum enroute IFR altitude
MHz	megahertz
min	minimum or minute
MIRL	Medium Intensity Runway Edge Lights
MLS	Microwave Landing System
MM	middle marker ILS
MOCA	minimum obstruction clearance altitude
MRA	minimum reception altitude
MSA	minimum safe altitude
MSL	mean sea level
muni	municipal
N	
N	north
NA	not authorized
natl	national
navaid	navigational aid
NDB	Non-directional Radio Beacon
NM	nautical mile(s)
NOPT	no procedure turn required
Nr	number
O	
obstn	obstruction
ODALS	Omnidirectional Approach Lighting System
OM	outer marker ILS
oper	operate
opn	operation
orig	original
OTS	Out of Service
ovrn	overrun
P	
PAR	Precision Apch Radar
pat	pattern
pmnty	permanently
PPR	Prior Permission Required
proc	procedure
Q	
quad	quadrant
R	
R	right (used only to designate rwys) eg. rwy 16R
RAPCON	radar approach control (USAF)
RCAG	Remote Center airground
RCLS	Runway Centerline Lights System
RCO	Remote Communications Outlet
rcv	receive
rcvg	receiving
REIL	Runway End Identifier Lights
req	request
RNAV	Area Navigation
RRP	Runway Reference Point
rstd	restricted
RTS	returned to service
RVR	runway visual range
RVRM	Runway Visual Range Midpoint
RVRT	Runway Visual Range Touchdown
RVRR	Runway Visual Range Rollout
RVV	runway visibility values
rwy	Runway
S	
S	south/snow
SDF	Simplified Directional Facility
sec	second
sfc	surface
SFL	Sequenced Flashing Lights
SI	straight-in approach
SM	statute mile(s)
SR	sunrise
SS	sunset
SSAFL	Simplified Short Approach Lighting System with Sequenced Flashers
SSALS	Simplified Short Approach Lighting System
SSALR	Simplified Short Approach Lighting System with Runway Alignment Indicator Lights
STOL	Short take-off & landing runway
svc	service
T	
T	true (after a bearing)
TAC	Terminal Area Chart
TACAN	UHF navigational facility—omnidirectional course and distance information
TCA	Terminal Control Area
TCH	Threshold Crossing Height
tfc	traffic
thr	threshold
thru	through
tkof	take-off
tmply	temporarily
tmpry	temporary
TPA	Traffic Pattern Altitude
TRACON	Terminal Radar approach control
trml	terminal
TRSA	Terminal Radar Service Area
tsnt	transient
TWEB	transcribed weather bcst
twr	tower
twy	taxiway
U	
UHF	Ultra high frequency
unavbl	unavailable
unlgtd	unlighted
unmon	unmonitored
unusbl	unusable
V	
VASI	Visual Approach Slope Indicator
VDP	visual descent point
VFR	visual flight rules
VHF	Very high frequency
vis	visibility
VOR	VHF Omni-Directional Radio Range
VORTAC	Combined VOR and TACAN System
VOT	a VOR Receiver testing facility
vsby	visibility
W	
W	west
wea	weather
wkday	weekday
wkend	weekend
wp	waypoint
wt	weight
Z	
Z	Greenwich mean time

GENERAL

FDC 6/09 OMEGA STATION F ARGENTINA WILL BE OFF AIR FROM MARCH 101200Z-171200Z AND FROM MARCH 17TH-24TH 1200-2100Z DAILY.

FDC 6/08 OMEGA STATION B LIBERIA WILL BE OFF AIR FROM FEB 010800Z-042200Z. ALSO FROM FEB 5TH-9TH 0800-1800Z DAILY AND FROM FEB 10TH-28TH 0800-1800Z DAILY.

FDC 5/2889 FDC CHART CORRECTION DALLAS FT WORTH SECTIONAL 34TH EDITION DATED JULY 4 1985. ADD OBSTRUCTIONS 1820 FT MSL /1000 FT AGL/ 333608 970233W.

FDC 5/2888 FDC CHART CORRECTION OMAHA SECTIONAL 32ND EDITION DATED AUGUST 29 1985. ADD OBSTRUCTION 1382 FT MSL /275 FT AGL/AND ASSOCIATED TYPE-OVERHEAD PIPELINE 423548N 964138W.

FDC 5/2808 AUTOMATED VOICE AIRPORT RESERVATION SYSTEM../AVARS/. IN ORDER TO IMPROVE THE AVARS CAPACITY THE FAA HAS INSTALLED TWO ADDITIONAL NON-TOLL FREE NUMBERS..617-275-4837/8. EFFECTIVE NOVEMBER 1 1985 TWO ADDITIONAL TOLL FREE LINES WILL BE AVAILABLE TO BE PART OF 1-800-FAA-1212 NUMBER. FAA PLANS TO CONTINUE THE DUAL /ARO/SYSTEM USING THE AUTOMATED SYSTEM ON 1-800-FAA-1212 AND THE MANUAL ARO SYSTEM WITH NEW YORK 718-832-7808/CHICAGO 312-263-2575 AND WASHINGTON DC 202-426-8347 UNTIL FURTHER NOTICE. IN AREAS WHERE TOUCH TONE PHONE SYSTEMS ARE NOT AVAILABLE USERS MAY EITHER CONTACT THE NEAREST FAA FLIGHT SERVICE STATION OR THE /ARO/ AT THE NUMBERS LISTED ABOVE AND REQUEST A RESERVATION. USERS DEPARTING A TRANS-ATLANTIC AIRPORT FOR ARRIVAL TO A HIGH DENSITY AIRPORT SHOULD CONTINUE TO USE THE PROCEDURES OUTLINED IN ADVISORY CIRCULAR AC 90-43F PARA 5 DATED APRIL 22 1985 WHICH STATES CONTACT THE NEAREST FLIGHT SERVICE STATION.

FDC 5/2193 FI/P MTR CORRECT IR-501 MILITARY TRAINING ROUTE/POINT AJ. CHANGE FAC/RAD/DIST POINT AJ TO GLD 354/35.

FDC 5/2130.........SPECIAL NOTICE..........INTERNATIONAL FLIGHT PLAN FORM..........INSTRUCTIONS FOR USING FAA FORM 7233-4. ICAO DOCUMENT 4444 AMENDMENT 6 EFFECTIVE NOVEMBER 21 1985 SPECIFIES SEVERAL CHANGES IN ICAO INTERNATIONAL FLIGHT PLAN FORMAT. FAA WILL ACCEPT THE NEW ICAO FORMAT EXCEPT AIRCRAFT SPEED/ALTITUDE FILED IN METRIC TERMS. THEREFORE TO COMPLY AS CLOSELY AS POSSIBLE WITH AMENDMENT 6 THE FOLLOWING ADDITIONAL PROCEDURES WILL APPLY BEGINNING NOVEMBER 21 WHEN USING FAA FORM 7233-4.... .....1. FAA FORM 7233-4, ITEM 13, HAS A SPACE FOR FIR BOUNDARIES AND ESTIMATED TIMES. FAA REQUIRES FILED FIR BOUNDARIES AND ESTIMATED TIMES, HOWEVER, PUT THAT INFORMATION IN ITEM 18, OTHER INFORMATION AS SPECIFIED IN ICAO FORMAT.......2. CONCERNING FAA FORM 7233-4, ITEM 15, THE U.S. AIR TRAFFIC SERVICE DOES NOT ACCEPT AIRCRAFT SPEED/ALTITUDE FILED IN METRIC TERMS.......3. IN ITEM 17, IN THE SECTION LABELED ETA, INSTEAD PUT TOTAL ESTIMATED ELASPED TIME/TOTAL EET/.......THE PRESENT SUPPLY OF FAA FORM 7233-4 WILL BE USED UNTIL EXHAUSTED AND REPLACED BY A NEW REVISED FAA INTERNATIONAL FLIGHT PLAN FORM.....DETAILED FAA POLICY, EXPLANATION OF CHANGES, DEFINITIONS, AND RESPONSIBILITIES CONCERNING THESE ICAO FLIGHT PLAN FORMAT CHANGES WILL BE ISSUED TO FAA AIR TRAFFIC PERSONNEL IN THE NATIONAL HEADQUARTERS DIRECTIVE NEAR THE END OF SEPTEMBER.

FDC 5/594 AIRPORT RESERVATION OFFICE/ARO/OPERATIONS... EFF APR 1, 1985...THE FOLLOWING GUIDELINES SHALL BE IN EFFECT... /ARO/WILL ACCEPT RSVNS FOR WASHINGTON NATIONAL AIRPORT /DCA, JOHN F. KENNEDY INTL ARPT /JFK, LA GUARDIA ARPT/LGA, AND CHICAGO O HARE INTL ARPT /ORD BEGINNING 48 HRS PRIOR TO THE PROPOSED TIME OF OPERATION AT THE AFFECTED ARPT. E.G REQ FOR 11 A.M. OPERATION ON THURSDAY WILL BE ACCEPTED STARTING 11 A.M. ON THE PRECEDING TUESDAY. AN EXCEPTION TO THE 48 HR LIMITATION IS MADE FOR WEEKENDS TO RECOGNIZE NORMAL BUSINESS HOURS. A RSVN REQ FOR AN IFR OPERATION ON MONDAY WILL BE ACCEPTED ON THE PREVIOUS THURSDAY STARTING AT THE PROPOSED HR OF OPERATION. REQUESTS FOR IFR OPERATION ON TUESDAY WILL BE ACCEPTED ON THE PREVIOUS FRIDAY STARTING AT THE PROPOSED HR OF OPERATION. E.G. REQ FOR 11 A.M. RSVN ON TUESDAY WOULD BE ACCEPTED BEGINNING 11 A.M. ON FRIDAY. IF THE PREVIOUS FRIDAY IS AN OBSERVED HOLIDAY THE PROCEDURE WILL BE IN EFFECT ON THURSDAY. A MAXIMUM OF TWO RSVNS PER PHONE CALL WILL BE ACCEPTED. E.G. A PILOT MAY REQ A RSVN FOR ARRIVAL AND DEPARTURE DURING THE SAME PHONE CALL PROVIDING BOTH FALL ON THE SAME CALENDAR DAY. E.G. A RSVN REQ FOR 11 A.M. ARRIVAL ON FRIDAY AND 4 P.M. DEPARTURE ON THE SAME DAY MAY BE MADE BEGINNING AT 11 A.M. ON WEDNESDAY.

FDC 4/3277 NOTAM /D/REGARDING RWY SNOW CONDITIONS AND BRAKING ACTION REPORTS FOR CANADIAN AIRPORTS WILL NO LONGER BE ENTERED INTO THE DOMESTIC NOTAM SYSTEM ON SERVICE A BY NFDC. CONTACT THE ASSOCIATED CANADIAN FLIGHT SERVICE STATION FOR THESE REPORTS.

FDC 4/1728 FDC U.S. NOTAM OFFICE POLICY ON FDC NOTAM STORAGE IN CONSOLIDATED NOTAM SYSTEM /CNS/DATA BASE/. ALL CURRENT FDC NOTAMS ARE STORED AND AVAILABLE UPON REQUEST. FDC NOTAMS WHICH ARE STRAIGHT CANCELLATIONS ARE STORED FOR THREE /3/ DAYS. BASED ON COMPUTER DEMANDS SIGNIFICANT TIME DELAYS ON RETRIEVALS CAN BE EXPECTED.
NOTE...REPEATED REQUESTS WILL FURTHER COMPOUND DELAYS. THEREFORE FSS AND USER GROUPS ARE ADVISED TO COLLECT AND STORE REQUIRED FDC NOTAM/S ON INITIAL SERVICE /A/ DISTRIBUTION SUPPLEMENTED BY CLASS 2 NOTAM PUBLICATION.

HAZARDOUS INFLIGHT WEATHER ADVISORY SERVICE (HIWAS)

HIWAS is a national program for broadcasting hazardous weather information (SIGMET's, convective SIGMET's, Center Weather Advisories (CWA), AIRMET's, and urgent PIREP's) on a continuous basis over selected VOR's. The program is operational in the Jacksonville, Miami, and Houston Air Route Traffic Control Center (ARTCC) areas. The chart on the following page identifies the current broadcast outlet locations and frequencies. Frequencies shown in the Atlanta ARTCC area are for planning purposes only. HIWAS will be expanded on an ARTCC by ARTCC basis.

Pilots should be aware that:

- Flight service stations broadcast information on hazardous weather not yet covered by an advisory and make an announcement on their frequencies that new HIWAS information is available.

- Controllers in ARTCC's and air traffic control terminals announce updates to HIWAS information on all appropriate frequencies.

- Controllers and specialists will not routinely broadcast SIGMET's, convective SIGMET's, CWA's, AIRMET's, and urgent PIREP's in the commissioned HIWAS areas.

User comments regarding the effectiveness of the HIWAS program and any proposed revision to HIWAS procedures are solicited.

Mail comments to:

Department of Transportation
Federal Aviation Administration
ATTN: ATO-360
800 Independence Ave. S.W.
Washington, DC 20591

Note: For further information on the HIWAS program, refer to the Airman's Information Manual (AIM) and Airport/Facility Directory (AFD). Operational sites are published in the AFD under radio aids to navigation.

The Interim Voice Response System

The Federal Aviation Administration has leased an Interim Voice Response System (IVRS) that enables pilots throughout the country to obtain selected weather information directly from a computer. The pilot enters requests for specific weather reports for locations of interest by depressing the keys on a Touchtone (R) telephone or keypad adapter on non-Touchtone (R) telephones. The computer will "listen" to telephone signalling tones and will respond with a spoken message derived from stored human speech.

The IVRS is a national system consisting of a network of 16 locations with "speaking" computers, and prepaid telephone access from an additional 8. The locations and telephone numbers are listed below. Call the telephone number nearest you at any time day or night, using any standard 12-key touch-tone phone. For long distance numbers outside your area code, call 1 plus Area Code and number. For assistance or trouble reporting call toll free 1-800-FOR-IVRS at any time.

IVRS Weather Products

1. SEVERE WEATHER FORECAST ALERTS (AWW) inform pilots of forthcoming severe thunderstorms or tornadoes. They are available automatically when you enter a location identifier (LOCID) or TWEB route number for a state in which a Severe Weather Forecast Alert is in effect.

   ISSUED: As necessary.

2. CONVECTIVE SIGMETS (WST) concern thunderstorms and related phenomena. They are available automatically when you enter a LOCID or TWEB route number for a state in which a Convective SIGMET is in effect.

   ISSUED: Hourly at 55 minutes past the hour and as needed.

3. SURFACE OBSERVATIONS (SA) provide observed surface weather conditions for the LOCIDs entered.

   ISSUED: Hourly on the hour and as needed.

4. TERMINAL FORECASTS (FT) provide a forecast of weather conditions for the LOCIDs entered.

   ISSUED: Approximately 1000, 1500, and 2200 GMT and as necessary.

5. WINDS ALOFT FORECASTS (GF) describe winds and temperatures for the LOCIDs entered. You specify the altitude and number of hours into the future and receive winds and temperatures at your requested altitude plus an altitude above and one below the requested altitude.

   ISSUED: Unscheduled, but typically at 0400 and 1600 GMT.

6. TWEB ROUTE FORECASTS (TR) provide a forecast of weather conditions within a 50-mile-wide corridor along a route and within a 50-mile radius for local vicinity forecasts.

   ISSUED: Approximately 1200, 1800, and 2400 GMT and as needed.

How to Use IVRS

The instructions on how to use IVRS are contained in A Pilot's Guide to IVRS published by the Federal Aviation Administration. You may obtain a copy from any FAA Flight Standards District Office or Flight Service Station.

COLORADO SKI COUNTRY AIRPORTS

SPECIAL AIR TRAFFIC MANAGEMENT PROGRAM

Aspen, Colorado
 Aspen-Pitkin County/Sardy Field Airport (ASE)

Eagle, Colorado
 Eagle County Airport (EGE)

Gunnison, Colorado
 Gunnison Country Airport (GUC)

In anticipation of the large number of aircraft operating into the Aspen-Pitkin County/Sardy Field, Eagle County, and Gunnison County airports during ski season, the following procedures have been implemented to enhance safety and minimize traffic delays during the period January 16 through April 6, 1986.

IFR ARRIVALS

Due to the additional volume of unscheduled IFR traffic expected to be generated within the Denver Center airspace, a special traffic management program will be in effect through April 6, 1986.

TRAFFIC MANAGEMENT PROGRAM

Unscheduled IFR flights operating into a Colorado Ski Country Airport should file an appropriate preferred route during the hours 1400 UTC and 0300 UTC (0700 MST-2000 MST) daily.

To Gunnison, Colorado (GUC)

VIA AIRWAYS
EXCEPTION: TRAFFIC WILL NOT BE ROUTED DEN
J10/J128 GUC

ADVISE ATC OF ALTERNATE AIRPORT PRIOR TO STARTING APPROACH.

Additional routing may be assigned by ATC based on weather and traffic density.

Pilots destined for ski country airports are encouraged to plan their arrivals Monday through Thursday to avoid extensive arrival delays. Extensive arrival delays can be anticipated between the hours of 1900 UTC and 0100 UTC (1200 MST-1800 MST) Friday, Saturday and Sunday.

Pilots may obtain additional traffic management information from the nearest flight service station (FSS).

FSS's can obtain traffic management information from Denver Center Traffic Management Unit, telephone FTS 323-4246 or commercial 303-651-4246.

AMENDED 1/16/86

Project GALE Meteorological Study

A large scale meteorological study will be conducted from January 15 to March 15, 1986, in the Carolinas and Southeastern Virginia including the adjacent coastal offshore airspace.

The project is known as "GALE--Genesis of Atlantic Low Experiment." The GALE study will investigate the explosive development of East Coast storms which present a serious forecasting problem and often cause severe thunderstorms over the east and northeastern United States. Particular attention will be paid to the role of the air-sea-land interactions and mesocale effects in the rapid development of coastal cyclones. Scientists, meteorologists, and aviators from some 35 or more governmental agencies and state and private universities are committed to the GALE Project.

Some ten or more research aircraft will be deployed to fly routes and flight patterns, both overland and offshore, within the GALE Project Study Area. Most of these aircraft will be based at Raleigh, North Carolina during the GALE study. Offshore activities will include dropwindsonde releases along predetermined tracks located in the United States Gulf and Atlantic offshore areas between 90° West longitude and 70° West longitude. All dropwindsonde releases will occur more than 60NM offshore.

During the study period, an Operations Office will be located at the Raleigh-Durham Airport. Phone numbers for the Gale Operations Office are (919) 783-6440 or FTS 672-4350.

Actual flight operating times will depend on developing storm conditions. Pilots operating within the GALE Project Study Area may receive status information from the appropriate ATC facility.

GALE PROJECT STUDY AREA

COORDINATED UNIVERSAL TIME (UTC)

Coordinated Universal Time (UTC) has replaced Greenwich Mean Time (GMT) as the accepted international standard for clock time. UTC is the basis for civil time in most countries of the world rather than GMT. The Federal Aviation Administration has concurred with this change and advised the International Civil Aviation Organization that the conversion would become effective January 16, 1986. The letter "Z" will be retained to indicate "UTC". All United States Government Aeronautical charts and publications that are effective on January 16, 1986, will indicate UTC vice GMT.

AIRPORT RADAR SERVICE AREAS (ARSA)

The National Airspace Review Terminal Airspace Task Group 1-2.2 recommended the ARSA Program as a replacement for the existing Terminal Radar Service Area Program and the FAA has adopted that recommendation. ARSA designations have been made, and effective dates established, for the locations listed below. The following is a summary of the pilot requirements and the ATC procedures for ARSA's. Graphic depictions of each ARSA are also included.

Unless otherwise authorized or required by ATC, the following provisions apply to aircraft operating within an ARSA:

1. Aircraft approaching that would penetrate the ARSA must establish two-way radio communications with ATC prior to entering the ARSA and maintain that communication while operating within the ARSA.
2. Aircraft departing the primary airport within the ARSA must establish two-way communications with ATC prior to departure and maintain that communication while operating within the ARSA. Aircraft departing a satellite airport within the ARSA must contact ATC as soon as practicable after takeoff.
3. Except in an emergency, all operations must be in compliance with ATC clearances and instructions.
4. All arrivals and departures within the ARSA must be in compliance with FAA arrival and departure traffic patterns.
5. Ultralight vehicles and parachute operations may not be conducted within the ARSA except under the terms of an ATC authorization.
6. NOTAM's pertaining to flight within the ARSA must be reviewed as a part of preflight action required by FAR 91.5.

Within ARSA's, ATC will provide the following services:

1. Radar sequencing of all arrivals.
2. Standard separation between all instrument flight rules (IFR) flights.
3. Traffic advisories and safety advisories to all aircraft.
4. Resolve any potential conflict between an aircraft operating IFR and an aircraft operating under visual flight rules by application of conflict resolution procedures.

ARSA's have been designated at the following locations to be effective December 19, 1985.

Albany County Airport, NY
Anchorage International Airport, AK
Bradley International Airport, Windsor Locks, CT
Corpus Christi International Airport, TX
Long Island MacArthur Airport, Islip, NY
Pensacola Naval Air Station, FL
Pensacola Regional Airport, FL
San Antonio International Airport, TX
Syracuse Hancock International Airport, NY
Tulsa International Airport, OK
Whiting Naval Air Station, FL

ARSA's have been designated at the following locations to be effective January 16, 1986.

SUPER BOWL XX

SPECIAL TRAFFIC MANAGEMENT PROGRAM

NEW ORLEANS, LOUISIANA

JANUARY 23 THROUGH 27, 1986

In anticipation of the large number of aircraft operating to/from the New Orleans, Louisiana, area during the week of Super Bowl XX, special traffic management procedures will be used to enhance safety and minimize air traffic delays at New Orleans International/Moisant Field (MSY) and New Orleans Lakefront (NEW) Airports .

TRAFFIC MANAGEMENT PROGRAM

Traffic management EDCT's are to be obtained prior to filing an IFR flight plan to MSY or NEW for arrivals with ETA's between the hours of 1300-0300 UTC (0700 CST-2100 CST) daily. EDCT's may be obtained from the the nearest flight service station or by calling Houston Center 713-230-5561 or 713-230-5566 during the hours 1300 -0300 UTC (0700 CST-2100 CST), January 22 through January 26. EDCT's will not be assigned more than 48 hours in advance of proposed time of departure.

Adherence to an EDCT within plus or minus 10 minutes is essential to preclude substantial delays.

Flight plans should be filed with the nearest flight service station (FSS) AFTER receiving an EDCT and at least 4 hours prior to the proposed time of departure. Include the EDCT in the remarks section of the flight plan. (Flight Plans may be filed concurrently with EDCT requests made with flight service stations.)

Except for emergency situations, Houston Center will not accept IFR flight plans to New Orleans airports from airborne aircraft while this program is in effect. Airborne IFR flight plans filed with other facilities may experience extensive delays awaiting integration into the IFR system.

IFR ARRIVAL

Due to the expected increased volume of IFR traffic within Houston Center airspace, a special traffic management program will be in effect from January 23 through January 26, 1986. Houston Center will assign an Expected Departure Clearance Time (EDCT) for each unscheduled flight destined for New Orleans International/Moisant Field or New Orleans Lakefront Airports. Turbojet can expect speed and altitude crossing restrictions within 30 miles of New Orleans (MSY) VORTAC

ATIS

Monitor ATIS prior to initial contact inbound and engine start up outbound.

Moisant 126.7mHz Lakefront 124.9mHz

VFR ARRIVALS

NEW ORLEANS TERMINAL CONTROL AREA (TCA)

Due to the anticipated increased volume of traffic, enroute aircraft desiring to traverse the TCA may expect delays, alternate route outside the TCA are recommended (See New Orleans VFR Terminal Area Chart). Contact New Orleans Approach Control between 30-40 miles of MSY VORTAC for advisories and/or TCA clearance.

IFR/VFR DEPARTURES

POST GAME

DO NOT request IFR departure clearance prior to 20 minutes before estimated time of departure (ETD).

Expect gate hold procedures to be in effect.

Do not begin taxiing until clearance is received from Ground Control.

Do not contact tower for take off until in the #1 position for take off.
(State complete aircraft identification and departure runway.)

FLIGHT SERVICE STATION INFORMATION

VFR aircraft are encouraged to cancel/activate flight plans with DeRidder Flight Service Station (FSS) when approaching/departing the City of New Orleans.

FREQUENCIES

122.6 mHz transmit/receive
255.4 mHz transmit/receive

FLIGHT PLAN AND PILOT BRIEFING TELEPHONE NUMBERS

504-528-9393
800-522-3325

Departure flight plans should be filed with DeRidder Flight Service Station at least 4 hours prior to proposed time of departure.

OVERFLIGHT

Aircraft not landing in the New Orleans area are requested to avoid overflight below 16,000 feet within 40 nautical miles of MSY VORTAC between the hours of 1300-0300 UTC (0700 CST-2100 CST) January 23 through January 27.

WAKE TURBULENCE ADVISORY

Due to the numbers of large aircraft operating in the vicinity of New Orleans International and Lakefront Airports, pilots should be aware that wake turbulence may exist. Pilots are urged to be vigilant and exercise extreme caution when operating within 30 nautical miles of New Orleans.

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAMS AND ARRIVAL/DEPARTURE PROCEDURES PRIOR TO CONDUCTING FLIGHT.

DAYTONA 500

SPECIAL TRAFFIC MANAGEMENT PROGRAM

DAYTONA BEACH, FLORIDA

FEBRUARY 9 THROUGH 17, 1986

In anticipation of the large number of aircraft traveling to and from the Daytona Beach area during the Daytona 500 race week, the following procedures will be used to enhance safety and minimize air traffic delays.

****TRAFFIC MANAGEMENT PROGRAM****

A Special Traffic Management Program will be in effect February 16, 2000 UTC (1500 local) through February 17, 0100 UTC (2000 local February 16). Jacksonville Center will assign a Controlled Departure Time (CDT) for unscheduled IFR flights departing the Daytona Beach Area.

CDT's can be obtained from any Flight Service Station (FSS). Flight plans should be filed with an FSS at least 4 hours, but not more than 24 hours, prior to proposed time of departure.

Due to anticipated frequency congestion, except for emergency situations, Jacksonville Center (Daytona Beach sector), Orlando FSS, and Daytona Beach Approach Control will not accept air filed flight plans to/from the Daytona Beach Area while this program is in effect.

****DAYTON BEACH AREA****

For the purpose of this Special Traffic Management Program, the Daytona Beach Area includes the following airports:

Daytona Beach Regional - DAB
Deland Municipal/Taylor - DED
New Smyrna Beach Municipal - 34J
Ormond Beach Municipal - OMN

****ATIS****

Monitor ATIS prior to initial contact inbound and engine start up outbound.

Daytona Beach Regional 120.05 mHz

Page revised 1/13/86

****VFR ARRIVALS****

Terminal Radar Service Area (TRSA)

Pilot participation in Stage III radar service is recommended and will be provided to aircraft landing at airports within the lateral limits of the Daytona Beach TRSA. Contact Daytona Beach Approach Control at least 15 miles from Daytona Beach Regional Airport. Pilots are urged to remain clear of the TRSA until clearance is received.

VFR arriving aircraft are requested to cancel flight plans with Orlando FSS before landing.

FREQUENCIES

122.4 mHz	Transmit/Receive
122.1 mHz	Transmit
Ormond Beach VOR 112.6 mHz	Receive

****IFR/VFR DEPARTURES****

ALL DAYTONA BEACH AREA AIRPORTS

DO NOT request IFR departure clearance prior to 20 minutes before estimated time of departure (ETD).

Expect gate hold procedures to be in effect February 16.

DAYTONA BEACH REGIONAL AIRPORT

Monitor ATIS for traffic flow information.

DO NOT begin taxiing until clearance is received from ground control. Observe taxi signs posted near runways.

DO NOT contact tower until in the #1 position for take off. (State complete aircraft identification and departure runway.)

OTHER DAYTONA BEACH AREA AIRPORTS

Plan departure path so as to remain clear of the Daytona Beach Regional Airport.

If VFR radar service is desired contact Daytona Beach Approach Control or Jacksonville Center as appropriate.

****FLIGHT PLANS****

Pilots are urged to file flight plans at least 4 hours in advance, but not more than 24 hours, prior to ETD. Pilots arriving Daytona Beach Area February 16, are encouraged to file return flight plans with their local FSS during initial preflight briefing.

****DAYTONA INTERNATIONAL SPEEDWAY ADVISORY****

Continuous aircraft operations over the Daytona International Speedway will be permitted with prior approval. Approval may be obtained from the Daytona Beach Regional Airport Traffic Control Tower.
PHONE: 904-255-3216.

CAUTION NUMEROUS AERIAL DEMONSTRATION

Aerial demonstrations may include:

Parachute Jumping
Banner Towing
Helicopter Operations
Hot Air Balloons
Military Fly-bys
Blimps

****WARNING AND RESTRICTED AREA ADVISORY****

R2906
R2907 A/B
R2910

W158 A/D

Pilots should be aware of the existence of restricted airspace to the east, south, west, and northwest of Daytona Beach. Penetration of Restricted Areas without authorization from the using or controlling agency may be extremely hazardous.

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAMS AND ARRIVAL/DEPARTURE PROCEDURES PRIOR TO CONDUCTING FLIGHT.

Navigational Facilities	Commissionings (including Ident and Frequency), Decommissionings (including Ident and Frequency), Frequency Changes, Changes in Monitoring Facility and/or Status, Restrictions, Outages (with Effective Dates).
Air Traffic Control Towers, Approach Controls	Commissionings (including Frequencies), Hours of Operation, Decommissionings.
Flight Service Stations	Commissionings, Decommissionings, Hours of Operation; Commissionings, Decommissionings of RCO; Changes in Monitoring Status of RCO; Outages of RCO (with Effective Dates).
Weather	AWOS (System and Frequency).

FOREWORD

The primary references for changes to the National Airspace System (NAS) are Aeronautical Charts and Airport/Facility Directories (A/FD) published for the affected area(s). Ideally, most changes to the NAS that meet NOTAM criteria are known sufficiently in advance to allow publication in these publications. When this cannot be done, changes are carried in the Notices to Airman Class II publication, or as a last resort, on the Service A telecommunications system as a NOTAM D item.

NOTAM D information printed in this publication will not be included on the Service A system and will not be provided during pilot briefings unless specifically requested by the pilot.

National Flight Data Center (FDC) NOTAMs primarily reflect changes to Standard Instrument Approach Procedures (SIAPs), Flight Restrictions, and aeronautical chart revisions. The last FDC NOTAM included in this issue is indicated by number and date above. This information insures that subsequent FDC NOTAMs, issued after the cutoff date, can be identified.

The Class II publication contains information of a temporary nature, which is expected to remain for an extended period. This temporary information is carried until it expires or is cancelled. Data of a permanent nature is sometimes carried in the Class II publication as an interim step prior to publication on the appropriate charts or in the A/FD.

The Class II publication is issued every 14 days. The A/FD is published every 56 days. Data in the Class II publication that is current on the effective date of the next A/FD will be transferred to the A/FD and removed from the Class II publication.

Facilities are responsible for forwarding data to the National Flight Data Center (NFDC). Data, still current for the next available Class II publication date, will be published.

This publication is divided into two sections:

1. Section One contains information divided into four categories:

a. GENERAL

b. AIRWAYS

c. FLIGHT RESTRICTIONS

d. AIRPORTS / FACILITIES / PROCEDURAL NOTAMS

The first subsection is listed in descending FDC NOTAM numerical order. The second and third subsections are listed by state. The fourth subsection is ordered by state, city, and airport name.

2. The second section contains special notices that are too long or that concern a wide or unspecified geographical area (which may overlap several states) and are not suitable for inclusion in the first section.

The content of these notices vary widely and are included because of their significant impact on flight safety.

NOTES

1. All times are indicated as UTC or local. During periods of Daylight Savings Time, effective hours in local time will be one hour earlier than shown. All states observe Daylight Savings Time except Arizona, that portion of Indiana in the Eastern Time Zone, Puerto Rico, and the Virgin Islands.

2. (|) Vertical line items indicate new information.

FDC NOTAM LEGEND

FDC 6/88 OMEGA STATION B LIBERIA WILL BE OFF AIR FROM FEB 010800Z-042200Z. ALSO FROM FEB 5TH-9TH 0800-1800Z DAILY AND FROM FEB 10TH-28TH 0800-1800Z DAILY.

FDC 5/2868 FDC CHART CORRECTION OMAHA SECTIONAL 32ND EDITION DATED AUGUST 29 1985. ADD OBSTRUCTION 1392 FT MSL /275 FT AGL/AND ASSOCIATED TYPE-OVERHEAD PIPELINE 423548N 0941358W.

FDC 5/2806 AUTOMATED VOICE AIRPORT RESERVATION SYSTEM../AVARS/. IN ORDER TO IMPROVE THE AVARS CAPACITY THE FAA HAS INSTALLED TWO ADDITIONAL NON-TOLL FREE NUMBERS..617-275-4837/8. EFFECTIVE NOVEMBER 1 1985 TWO ADDITIONAL TOLL FREE LINES WILL BE AVAILABLE TO BE PART OF 1-800-FAA-1212 NUMBER. FAA PLANS TO CONTINUE THE DUAL /ARO/SYSTEM USING THE AUTOMATED SYSTEM ON 1-800-FAA-1212 AND THE MANUAL ARO SYSTEM WITH NEW YORK 718-632-7806/CHICAGO 312-263-2575 AND WASHINGTON DC 202-426-9347 UNTIL FURTHER NOTICE. IN AREAS WHERE TOUCH TONE PHONE SYSTEMS ARE NOT AVAILABLE USERS MAY EITHER CONTACT THE NEAREST FAA FLIGHT SERVICE STATION OR THE /ARO/ AT THE NUMBERS LISTED ABOVE AND REQUEST A RESERVATION. USERS DEPARTING A TRANS-ATLANTIC AIRPORT FOR ARRIVAL TO A HIGH DENSITY AIRPORT SHOULD CONTINUE TO USE THE PROCEDURES OUTLINED IN ADVISORY CIRCULAR AC 90-43F PARA 5 DATED APRIL 22 1985 WHICH STATES CONTACT THE NEAREST FLIGHT SERVICE STATION.

FDC 5/2193 FI/P MTR CORRECT IR-501 MILITARY TRAINING ROUTE/POINT AJ. CHANGE FAC/RAD/DIST POINT AJ TO GLD 354/35.

FDC 5/2130.........SPECIAL NOTICE..........INTERNATIONAL FLIGHT PLAN FORM..........INSTRUCTIONS FOR USING FAA FORM 7233-4. ICAO DOCUMENT 4444 AMENDMENT 6 EFFECTIVE NOVEMBER 21 1985 SPECIFIES SEVERAL CHANGES IN ICAO INTERNATIONAL FLIGHT PLAN FORMAT. FAA WILL ACCEPT THE NEW ICAO FORMAT EXCEPT AIRCRAFT SPEED/ALTITUDE FILED IN METRIC TERMS. THEREFORE TO COMPLY AS CLOSELY AS POSSIBLE WITH AMENDMENT 6 THE FOLLOWING ADDITIONAL PROCEDURES WILL APPLY BEGINNING NOVEMBER 21 WHEN USING FAA FORM 7233-4.... .....1. FAA FORM 7233-4, ITEM 13, HAS A SPACE FOR FIR BOUNDARIES AND ESTIMATED TIMES. FAA REQUIRES FILED FIR BOUNDARIES AND ESTIMATED TIMES, HOWEVER, PUT THAT INFORMATION IN ITEM 18, OTHER INFORMATION AS SPECIFIED IN ICAO FORMAT.......2. CONCERNING FAA FORM 7233-4, ITEM 15, THE U.S. AIR TRAFFIC SERVICE DOES NOT ACCEPT AIRCRAFT SPEED/ALTITUDE FILED IN METRIC TERMS.......3. IN ITEM 17, IN THE SECTION LABELED ETA, INSTEAD PUT TOTAL ESTIMATED ELASPED TIME/TOTAL EET/.......THE PRESENT SUPPLY OF FAA FORM 7233-4 WILL BE USED UNTIL EXHAUSTED AND REPLACED BY A NEW REVISED FAA INTERNATIONAL FLIGHT PLAN FORM.....DETAILED FAA POLICY, EXPLANATION OF CHANGES, DEFINITIONS, AND RESPONSIBILITIES CONCERNING THESE ICAO FLIGHT PLAN FORMAT CHANGES WILL BE ISSUED TO FAA AIR TRAFFIC PERSONNEL IN THE NATIONAL HEADQUARTERS DIRECTIVE NEAR THE END OF SEPTEMBER.

FDC 5/584 AIRPORT RESERVATION OFFICE/ARO/OPERATIONS... EFF APR 1, 1985...THE FOLLOWING GUIDELINES SHALL BE IN EFFECT... /ARO/WILL ACCEPT RSVNS FOR WASHINGTON NATIONAL AIRPORT /DCA, JOHN F. KENNEDY INTL ARPT /JFK, LA GUARDIA ARPT/LGA, AND CHICAGO O HARE INTL ARPT /ORD BEGINNING 48 HRS PRIOR TO THE PROPOSED TIME OF OPERATION AT THE AFFECTED ARPT. E.G REQ FOR 11 A.M. OPERATION ON THURSDAY WILL BE ACCEPTED STARTING 11 A.M. ON THE PRECEDING TUESDAY. AN EXCEPTION TO THE 48 HR LIMITATION IS MADE FOR WEEKENDS TO RECOGNIZE NORMAL BUSINESS HOURS. A RSVN REQ FOR AN IFR OPERATION ON MONDAY WILL BE ACCEPTED ON THE PREVIOUS THURSDAY STARTING AT THE PROPOSED HR OF OPERATION. REQUESTS FOR IFR OPERATION ON TUESDAY WILL BE ACCEPTED ON THE PREVIOUS FRIDAY STARTING AT THE PROPOSED HR OF OPERATION. E.G. REQ FOR 11 A.M. RSVN ON TUESDAY WOULD BE ACCEPTED BEGINNING 11 A.M. ON FRIDAY. IF THE PREVIOUS FRIDAY IS AN OBSERVED HOLIDAY THE PROCEDURE WILL BE IN EFFECT ON THURSDAY. A MAXIMUM OF TWO RSVNS PER PHONE CALL WILL BE ACCEPTED. E.G. A PILOT MAY REQ A RSVN FOR ARRIVAL AND DEPARTURE DURING THE SAME PHONE CALL PROVIDING BOTH FALL ON THE SAME CALENDAR DAY. E.G. A RSVN REQ FOR 11 A.M. ARRIVAL ON FRIDAY AND 4 P.M. DEPARTURE ON THE SAME DAY MAY BE MADE BEGINNING AT 11 A.M. ON WEDNESDAY.

FDC 4/3277 NOTAM /D/REGARDING RWY SNOW CONDITIONS AND BRAKING ACTION REPORTS FOR CANADIAN AIRPORTS WILL NO LONGER BE ENTERED INTO THE DOMESTIC NOTAM SYSTEM ON SERVICE A BY NFDC. CONTACT THE ASSOCIATED CANADIAN FLIGHT SERVICE STATION FOR THESE REPORTS.

FDC 4/1725 FDC U.S. NOTAM OFFICE POLICY ON FDC NOTAM STORAGE IN CONSOLIDATED NOTAM SYSTEM /CNS/DATA BASE/. ALL CURRENT FDC NOTAMS ARE STORED AND AVAILABLE UPON REQUEST. FDC NOTAMS WHICH ARE STRAIGHT CANCELLATIONS ARE STORED FOR THREE /3/ DAYS. BASED ON COMPUTER DEMANDS SIGNIFICANT TIME DELAYS ON RETRIEVALS CAN BE EXPECTED. NOTE...REPEATED REQUESTS WILL FURTHER COMPOUND DELAYS. THEREFORE FSS AND USER GROUPS ARE ADVISED TO COLLECT AND STORE REQUIRED FDC NOTAM/S ON INITIAL SERVICE /A/ DISTRIBUTION SUPPLEMENTED BY CLASS 2 NOTAM PUBLICATION.

HAZARDOUS INFLIGHT WEATHER ADVISORY SERVICE (HIWAS)

HIWAS is a national program for broadcasting hazardous weather information (SIGMET's, convective SIGMET's, Center Weather Advisories (CWA), AIRMET's, and urgent PIREP's) on a continuous basis over selected VOR's. The program is operational in the Jacksonville, Miami, and Houston Air Route Traffic Control Center (ARTCC) areas. The chart on the following page identifies the current broadcast outlet locations and frequencies. Frequencies shown in the Atlanta ARTCC area are for planning purposes only. HIWAS will be expanded on an ARTCC by ARTCC basis.

Pilots should be aware that:

* Flight service stations broadcast information on hazardous weather not yet covered by an advisory and make an announcement on their frequencies that new HIWAS information is available.

* Controllers in ARTCC's and air traffic control terminals announce updates to HIWAS information on all appropriate frequencies.

* Controllers and specialists will not routinely broadcast SIGMET's, convective SIGMET's, CWA's, AIRMET's, and urgent PIREP's in the commissioned HIWAS areas.

User comments regarding the effectiveness of the HIWAS program and any proposed revision to HIWAS procedures are solicited.

Mail comments to:

Department of Transportation
Federal Aviation Administration
ATTN: ATO-360
800 Independence Ave. S.W.
Washington, DC 20591

Note: For further information on the HIWAS program, refer to the Airman's Information Manual (AIM) and Airport/Facility Directory (AFD). Operational sites are published in the AFD under radio aids to navigation.

The Interim Voice Response System

The Federal Aviation Administration has leased an Interim Voice Response System (IVRS) that enables pilots throughout the country to obtain selected weather information directly from a computer. The pilot enters requests for specific weather reports for locations of interest by depressing the keys on a Touchtone $^{(R)}$ telephone or keypad adapter on non-Touchtone $^{(R)}$ telephones. The computer will "listen" to telephone signalling tones and will respond with a spoken message derived from stored human speech.

The IVRS is a national system consisting of a network of 16 locations with "speaking" computers, and prepaid telephone access from an additional 8. The locations and telephone numbers are listed below. Call the telephone number nearest you at any time day or night, using any standard 12-key touch-tone phone. For long distance numbers outside your area code, call 1 plus Area Code and number. For assistance or trouble reporting call toll free 1-800-FOR-IVRS at any time.

	Area Code Number

IVRS Weather Products

1. SEVERE WEATHER FORECAST ALERTS (AWW) inform pilots of forthcoming severe thunderstorms or tornadoes. They are available automatically when you enter a location identifier (LOCID) or TWEB route number for a state in which a Severe Weather Forecast Alert is in effect.

   ISSUED: As necessary.

2. CONVECTIVE SIGMETS (WST) concern thunderstorms and related phenomena. They are available automatically when you enter a LOCID or TWEB route number for a state in which a Convective SIGMET is in effect.

   ISSUED: Hourly at 55 minutes past the hour and as needed.

3. SURFACE OBSERVATIONS (SA) provide observed surface weather conditions for the LOCIDs entered.

   ISSUED: Hourly on the hour and as needed.

4. TERMINAL FORECASTS (FT) provide a forecast of weather conditions for the LOCIDs entered.

   ISSUED: Approximately 1000, 1500, and 2200 GMT and as necessary.

5. WINDS ALOFT FORECASTS (GF) describe winds and temperatures for the LOCIDs entered. You specify the altitude and number of hours into the future and receive winds and temperatures at your requested altitude plus an altitude above and one below the requested altitude.

   ISSUED: Unscheduled, but typically at 0400 and 1600 GMT.

6. TWEB ROUTE FORECASTS (TR) provide a forecast of weather conditions within a 50-mile-wide corridor along a route and within a 50-mile radius for local vicinity forecasts.

   ISSUED: Approximately 1200, 1800, and 2400 GMT and as needed.

How to Use IVRS

The instructions on how to use IVRS are contained in A Pilot's Guide to IVRS published by the Federal Aviation Administration. You may obtain a copy from any FAA Flight Standards District Office or Flight Service Station.

COLORADO SKI COUNTRY AIRPORTS

SPECIAL AIR TRAFFIC MANAGEMENT PROGRAM

Aspen, Colorado
Aspen-Pitkin County/Sardy Field Airport (ASE)

Eagle, Colorado
Eagle County Airport (EGE)

Gunnison, Colorado
Gunnison Country Airport (GUC)

In anticipation of the large number of aircraft operating into the Aspen-Pitkin County/Sardy Field, Eagle County, and Gunnison County airports during ski season, the following procedures have been implemented to enhance safety and minimize traffic delays during the period January 16 through April 6, 1986.

IFR ARRIVALS

Due to the additional volume of unscheduled IFR traffic expected to be generated within the Denver Center airspace, a special traffic management program will be in effect through April 6, 1986.

TRAFFIC MANAGEMENT PROGRAM

Unscheduled IFR flights operating into a Colorado Ski Country Airport should file an appropriate preferred route during the hours 1400 UTC and 0300 UTC (0700 MST-2000 MST) daily.

To Aspen, Colorado (ASE)

Route 1....FROM OVER FIXES BETWEEN DEN
CLOCKWISE TO COS: FILE VIA
DEN..DBL..ASE

To Gunnison, Colorado (GUC)

VIA AIRWAYS
EXCEPTION: TRAFFIC WILL NOT BE ROUTED DEN J10/J128 GUC

ADVISE ATC OF ALTERNATE AIRPORT PRIOR TO STARTING APPROACH.

Additional routing may be assigned by ATC based on weather and traffic density.

Pilots destined for ski country airports are encouraged to plan their arrivals Monday through Thursday to avoid extensive arrival delays.
Extensive arrival delays can be anticipated between the hours of 1900 UTC and 0100 UTC (1200 MST-1800 MST) Friday, Saturday and Sunday.

Pilots may obtain additional traffic management information from the nearest flight service station (FSS).

FSS's can obtain traffic management information from Denver Center Traffic Management Unit, telephone FTS 323-4246 or commercial 303-651-4246.

AMENDED 1/16/86

Project GALE Meteorological Study

A large scale meteorological study will be conducted from January 15 to March 15, 1986, in the Carolinas and Southeastern Virginia including the adjacent coastal offshore airspace.

The project is known as "GALE--Genesis of Atlantic Low Experiment." The GALE study will investigate the explosive development of East Coast storms which present a serious forecasting problem and often cause severe thunderstorms over the east and northeastern United States. Particular attention will be paid to the role of the air-sea-land interactions and mesocale effects in the rapid development of coastal cyclones. Scientists, meteorologists, and aviators from some 35 or more governmental agencies and state and private universities are committed to the GALE Project.

Some ten or more research aircraft will be deployed to fly routes and flight patterns, both overland and offshore, within the GALE Project Study Area. Most of these aircraft will be based at Raleigh, North Carolina during the GALE study. Offshore activities will include dropwindsonde releases along predetermined tracks located in the United States Gulf and Atlantic offshore areas between 90° West longitude and 70° West longitude. All dropwindsonde releases will occur more than 60NM offshore.

During the study period, an Operations Office will be located at the Raleigh-Durham Airport. Phone numbers for the Gale Operations Office are (919) 783-6440 or FTS 672-4350.

Actual flight operating times will depend on developing storm conditions. Pilots operating within the GALE Project Study Area may receive status information from the appropriate ATC facility.

COORDINATED UNIVERSAL TIME (UTC)

Coordinated Universal Time (UTC) has replaced Greenwich Mean Time (GMT) as the accepted international standard for clock time. UTC is the basis for civil time in most countries of the world rather than GMT. The Federal Aviation Administration has concurred with this change and advised the International Civil Aviation Organization that the conversion would become effective January 16, 1986. The letter "Z" will be retained to indicate "UTC". All United States Government Aeronautical charts and publications that are effective on January 16, 1986, will indicate UTC vice GMT.

AIRPORT RADAR SERVICE AREAS (ARSA)

The National Airspace Review Terminal Airspace Task Group 1-2.2 recommended the ARSA Program as a replacement for the existing Terminal Radar Service Area Program and the FAA has adopted that recommendation. ARSA designations have been made, and effective dates established, for the locations listed below. The following is a summary of the pilot requirements and the ATC procedures for ARSA's. Graphic depictions of each ARSA are also included.

Unless otherwise authorized or required by ATC, the following provisions apply to aircraft operating within an ARSA:

1. Aircraft approaching that would penetrate the ARSA must establish two-way radio communications with ATC prior to entering the ARSA and maintain that communication while operating within the ARSA.
2. Aircraft departing the primary airport within the ARSA must establish two-way communications with ATC prior to departure and maintain that communication while operating within the ARSA. Aircraft departing a satellite airport within the ARSA must contact ATC as soon as practicable after takeoff.
3. Except in an emergency, all operations must be in compliance with ATC clearances and instructions.
4. All arrivals and departures within the ARSA must be in compliance with FAA arrival and departure traffic patterns.
5. Ultralight vehicles and parachute operations may not be conducted within the ARSA except under the terms of an ATC authorization.
6. NOTAM's pertaining to flight within the ARSA must be reviewed as a part of preflight action required by FAR 91.5.

Within ARSA's, ATC will provide the following services:

1. Radar sequencing of all arrivals.
2. Standard separation between all instrument flight rules (IFR) flights.
3. Traffic advisories and safety advisories to all aircraft.
4. Resolve any potential conflict between an aircraft operating IFR and an aircraft operating under visual flight rules by application of conflict resolution procedures.

ARSA's have been designated at the following locations to be effective December 19, 1985.

Albany County Airport, NY
Anchorage International Airport, AK
Bradley International Airport, Windsor Locks, CT
Corpus Christi International Airport, TX
Long Island MacArthur Airport, Islip, NY
Pensacola Naval Air Station, FL
Pensacola Regional Airport, FL
San Antonio International Airport, TX
Syracuse Hancock International Airport, NY
Tulsa International Airport, OK
Whiting Naval Air Station, FL

ARSA's have been designated at the following locations to be effective January 16, 1986.

Burbank-Glendale-Pasadena Airport, CA
El Toro Marine Corps Air Station, CA
Greensboro-High Point-Winston-Salem Regional Airport, NC
James M. Cox Dayton International Airport, OH
Lubbock International Airport, TX

DAYTONA 500

SPECIAL TRAFFIC MANAGEMENT PROGRAM

DAYTONA BEACH, FLORIDA

FEBRUARY 9 THROUGH 17, 1986

In anticipation of the large number of aircraft traveling to and from the Daytona Beach area during the Daytona 500 race week, the following procedures will be used to enhance safety and minimize air traffic delays.

****TRAFFIC MANAGEMENT PROGRAM****

A Special Traffic Management Program will be in effect February 16, 2000 UTC (1500 local) through February 17, 0100 UTC (2000 local February 16). Jacksonville Center will assign a Controlled Departure Time (CDT) for unscheduled IFR flights departing the Daytona Beach Area.

CDT's can be obtained from any Flight Service Station (FSS). Flight plans should be filed with an FSS at least 4 hours, but not more than 24 hours, prior to proposed time of departure.

Due to anticipated frequency congestion, except for emergency situations, Jacksonville Center (Daytona Beach sector), Orlando FSS, and Daytona Beach Approach Control will not accept air filed flight plans to/from the Daytona Beach Area while this program is in effect.

****DAYTON BEACH AREA****

For the purpose of this Special Traffic Management Program, the Daytona Beach Area includes the following airports:

Daytona Beach Regional - DAB
Deland Municipal/Taylor - DED
New Smyrna Beach Municipal - 34J
Ormond Beach Municipal - OMN

****ATIS****

Monitor ATIS prior to initial contact inbound and engine start up outbound.

Daytona Beach Regional 120.05 mHz

Page revised 1/13/86

****VFR ARRIVALS****

Terminal Radar Service Area (TRSA)

Pilot participation in Stage III radar service is recommended and will be provided to aircraft landing at airports within the lateral limits of the Daytona Beach TRSA. Contact Daytona Beach Approach Control at least 15 miles from Daytona Beach Regional Airport. Pilots are urged to remain clear of the TRSA until clearance is received.

VFR arriving aircraft are requested to cancel flight plans with Orlando FSS before landing.

FREQUENCIES

122.4 mHz	Transmit/Receive
122.1 mHz	Transmit
Ormond Beach VOR 112.6 mHz	Receive

****IFR/VFR DEPARTURES****

ALL DAYTONA BEACH AREA AIRPORTS

DO NOT request IFR departure clearance prior to 20 minutes before estimated time of departure (ETD).

Expect gate hold procedures to be in effect February 16.

DAYTONA BEACH REGIONAL AIRPORT

Monitor ATIS for traffic flow information.

DO NOT begin taxiing until clearance is received from ground control. Observe taxi signs posted near runways.

DO NOT contact tower until in the #1 position for take off. (State complete aircraft identification and departure runway.)

OTHER DAYTONA BEACH AREA AIRPORTS

Plan departure path so as to remain clear of the Daytona Beach Regional Airport.

If VFR radar service is desired contact Daytona Beach Approach Control or Jacksonville Center as appropriate.

****FLIGHT PLANS****

Pilots are urged to file flight plans at least 4 hours in advance, but not more than 24 hours, prior to ETD. Pilots arriving Daytona Beach Area February 16, are encouraged to file return flight plans with their local FSS during initial preflight briefing.

****DAYTONA INTERNATIONAL SPEEDWAY ADVISORY****

Continuous aircraft operations over the Daytona International Speedway will be permitted with prior approval. Approval may be obtained from the Daytona Beach Regional Airport Traffic Control Tower. PHONE: 904-255-3216.

CAUTION NUMEROUS AERIAL DEMONSTRATION

Aerial demonstrations may include:

Parachute Jumping
Banner Towing
Helicopter Operations
Hot Air Balloons
Military Fly-bys
Blimps

****WARNING AND RESTRICTED AREA ADVISORY****

R2906
R2907 A/B
R2910

W158 A/D

Pilots should be aware of the existence of restricted airspace to the east, south, west, and northwest of Daytona Beach. Penetration of Restricted Areas without authorization from the using or controlling agency may be extremely hazardous.

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAMS AND ARRIVAL/DEPARTURE PROCEDURES PRIOR TO CONDUCTING FLIGHT.

SPECIAL USE AIRSPACE
(Military Operations Area)

Effective February 23 - March 9, 1986

Pinon Canyon, CO, Temporary MOA

WASHINGTON HELICOPTER ROUTE CHART

A new Washington Helicopter Route Chart is available with a February 13 effective date. This chart is a joint FAA/DOD effort and is an updated version of the DOD chart of June 14, 1982.

Major helicopter and transition routes along with narrative descriptions are included. Pictorial symbols of prominent landmarks, tower frequencies, altitude changeover points, reporting points, and transponder codes are other features depicted on this chart. Further, this chart shows selected cultural features such as power transmission lines and prominent buildings which are depicted for landmark value only. The chart does not depict complete obstacle information due to the high concentration of objects in the area.

Military personnel may obtain copies from their appropriate authority. Civilians may obtain a free chart by writing:

THE EAA SUN 'n FUN FLY-IN

LAKELAND MUNICIPAL AIRPORT, FLORIDA

MARCH 16 - 22, 1986

In anticipation of the large number of aircraft operating to and from the Lakeland Municipal Airport, Florida, during the 1986 Fly-In, the following procedures are provided to enhance safety and minimize air traffic delays.

LAKELAND MUNICIPAL AIRPORT CLOSINGS (and other general information)

°Lakeland Municipal Airport will be closed daily March 16 - 22, 1986, from 2:00 p.m. to 4:30 p.m., Eastern Standard Time, for Airshow. The Airshow operations area is from the surface to 10,000 feet MSL within a five (5) statute mile radius of Lakeland Municipal Airport, and will be used on the dates and time specified above.

°Arrival delays of up to one (1) hour can be expected daily, between 4:30 p.m. and 5:30 p.m.

°Student training flights are highly discouraged during this event. This includes student solo cross-country flights, touch-and-go landings, low approaches and practice instrument approaches.

°The ILS runway 5/23 will be shut down during the Fly-In.

°Runways 5/23 and 13/31 will be closed and so marked during this Event.

°Do not operate in the airport traffic area south of the airport without credentials received at hourly briefings held on the airport in the Sun 'n Fun area.

TEMPORARY FAA LAKELAND CONTROL TOWER

The Control Tower will be open and the control zone will be in effect:

MARCH 16 - 22, 1986 - 7:00 a.m. to 7:00 p.m., EST

Lakeland Frequencies:

Lakeland VOR - 116.0 MHz.
Lakeland ATIS - 124.2 MHz.
Lakeland Tower - 124.5 MHz. (if unable 119.8 MHz) 380.1 MHz.
Lakeland Ground Control - 121.4 MHz.

NOTE: ATC may assign 123.7 MHz., or 118.95 MHz., as appropriate.

VFR ARRIVALS TO LAKELAND MUNICIPAL AIRPORT

All aircraft must use the Sun 'n Fun Lake Parker arrival procedure (see graphic). When you are twenty (20) to thirty (30) miles from Lakeland listen to the ATIS 124.2 MHz., for landing and special information. When volume exceeds the airport's acceptance rate, VFR holding will be required prior to or over Lake Parker. As you approach Lake Parker (Lakeland VORTAC 040/6), turn your TRANSPONDER "OFF" MONITOR Lakeland Tower on 124.5 and fly westerly over the power plant smokestack with white strobe lights which is located at the north end of Lake Parker. Expect heavy air traffic, some without radios, in this area. All aircraft should maintain 100 m.p.h., at 1,000 feet MSL inbound from Lake Parker. Aircraft unable to slow to this speed should maintain 150 m.p.h. at 1,500 feet.

Controllers located on the ground at Lake Parker will contact you, using your aircraft "color" and "type" to provide sequencing and other arrival and traffic pattern information - they will contact you in the vicinity of the north power plant and may ask you to "rock the wings" as an acknowledgment for instructions.

IMPORTANT: REMAIN IN TRAIL to the airport - no side-by-side separation.

TRAFFIC PATTERN

All arriving traffic enter the airport traffic area only via the Sun 'n Fun Lake Parker arrival procedure as indicated above and on the attached graphic. Only left traffic for runway 9L or right traffic for runway 27R will be used with downwind leg entry close to the airport over Airport Road. NOTE: This runway is a narrow strip 75 feet wide which is usually a taxiway. DO NOT land on the main, wide, runway 9R/27L unless specifically instructed by the Control Tower. Use caution for other Special Events and Flyby aircraft which after special face-to-face briefings are authorized to use the main runway with opposite-direction base leg to final approach turns. All landing traffic must remain alert for possible radio or light signal wave-off from the Tower. Red smoke OR hand signals from controllers located near the approach end of the runway in use may also be used to signal wave-off. When landing on runway 9L DO NOT TOUCH DOWN until beyond the first taxiway at the marked threshold (4,500 feet remaining) which has been displaced because of tall trees off the approach end of the runway. Plan landing so as to clear the runway as soon as possible on a hard surface.

AFTER TOUCHDOWN

Aircraft landing on runway 9L, turn off to the left; on 27R, turn to the right. When landing on the narrow runway (9L or 27R) DO NOT TURN OFF TOWARD THE SOUTH. CAUTION: Remain on hard surface at all times unless specifically directed by the Tower or Flagman to do otherwise. Expeditious clearing of the runway is absolutely essential because of continuous arriving and departing aircraft behind you. Ground Controllers will direct you to the parking area.

VFR DEPARTURE

Before taxiing, monitor Lakeland ATIS on 124.2 MHz., for taxi information and follow Flagman's directions and other traffic to the advertised active runway. Radio-equipped aircraft should monitor Ground Control on 121.4 MHz., while taxiing, and contact the controller ONLY if you need further information. To expedite traffic, you will be directed for an intersection departure on runway 9 (5,000 feet remaining), or for the full length only on runway 27. The ATIS will inform you whether to call the Tower or watch the FAA controller at the runway for takeoff clearance. After departure, proceed straight out for three (3) miles before proceeding on course. Be very alert for numerous aircraft departing (particularly after 4:30 p.m.) and for special flight activity south and arrival traffic north. Monitor the Frequency given on the ATIS, but DO NOT CALL unless an EMERGENCY exists.

NONRADIO-EQUIPPED AIRCRAFT - "SPECIAL NOTICE"

All pilots flying an aircraft WITHOUT a radio into Lakeland shall follow the Sun 'n Fun-Lake Parker Arrival Procedures (see attached graphic). When approaching Lake Parker, be alert for other aircraft inbound to Lakeland and follow that traffic to the airport. Land ONLY on runway 9L or 27R. See the preceding paragraphs with emphasis on: ***VFR arrivals to Lakeland Municipal Airport***/***Traffic Pattern*** and ***After Touchdown***.

If RED SMOKE is being emitted near the approach end of the landing runway, or if a RED LIGHT is observed from the Control Tower located on the north side of the airport, nonradio-equipped aircraft are TO LEAVE the traffic pattern and REENTER over Lake Parker. Be extremely alert for numerous aircraft operating in the vicinity of Lakeland. If there is any possibility that you might be coming to Sun 'n Fun in an aircraft WITHOUT A RADIO, it is important that you place your - Name/Aircraft Type/Identification Number/Address, and the word "NONRADIO," on a postcard, and mail it to:

Sarasota ATC Tower, DOT/FAA,
P.O. Box 13065
Sarasota, FL., 33578

The receipt of the card will validate your Authorization to operate without a radio, excluding local flights which require a Briefing, while the temporary ATC Tower is in operation. The card also indicates that YOU HAVE READ AND UNDERSTAND ALL OF THE ABOVE PROCEDURES. It is suggested that you sign and fill in the following, and carry this "NONRADIO-EQUIPPED" procedure page with you while exercising this Authorization:

____
(Pilot's Signature)

____
(Date card mailed)

____
(Aircraft Identification)

Because of the temporary nature of the Control Tower, considerable delay may be encountered getting Authorization, by telephone, to operate without a radio.

VFR FLIGHT PLANS

Pilots are encouraged to file a Flight Plan. Flight Plans should be closed by radio with St. Petersburg FSS, transmit on 122.1 MHz., listen on the Lakeland VOR 116.0 MHz. If unable, call St. Petersburg FSS by telephone (local call - 682-3258), or, by interphones, which are located at Lakeland, and in the Sun 'n Fun area.

IFR TRAFFIC

Due to the expected increase in the volume of traffic generated by the Sun 'n Fun Fly-In, some delays may be encountered for IFR arrival and departing traffic. Be familiar with the Sun 'n Fun-Lake Parker Arrival and Departure Procedures (1986) that will be used by the temporary Control Tower at Lakeland.

IFR ARRIVALS

Be prepared to discontinue your approach and to enter a VFR traffic pattern for landing sequence. When the ceiling and visibility at Lakeland is reported at or above 3,000 feet and five (5) miles, expect a vector to the vicinity of Lake Parker for a visual approach following the published Sun 'n Fun-Lake Parker Arrival Procedures (see attached graphic). Be extremely alert for a high volume of traffic with a wide variance of performance characteristics operating in the vicinity of Lakeland.

IFR DEPARTURES

File your Flight Plan at least one (1) hour prior to proposed departure time. IFR Flight Plans which have not been used will be cancelled two (2) hours after the filed proposed departure time. Contact Lakeland Ground Control on 121.4 MHz., for your clearance. DO NOT TAXI until receiving your en route clearance. If you have not received initial departure instructions prior to reaching the runway, attempt to taxi your aircraft to a position where other VFR aircraft can pass you for departure. In any case, DO NOT accept the FAA Flagman's instructions to enter the runway or take off unless you have received a departure release by radio.

NOTE: Airport closed daily from 2:00 p.m. - 4:30 p.m. EST for Airshow. The Airshow Operations Area is from the surface to 10,000 feet MSL within a 5-mile radius of the Airport. Arrival delays expected between 4:30 p.m. and 5:30 p.m.

ATIS 124.2
TOWER . . . 124.5
C/C 121.4
VOR 116.0

NOTE: Unless receiving radar service squawk standby within 15 miles of Lakeland Airport

ALTITUDE
1000 ft. MSL
(130 kts. or less)

1500 ft. MSL
(over 130 kts.)

REMAIN CLEAR
DO NOT operate in the airport traffic area south of Runway 9/27 without current credentials received at hourly Briefings at Sun 'n Fun.

ARRIVALS

- *Monitor ATIS 124.2 MHz. 15 miles out remain clear of the airport traffic area below 3000 ft. AGL within 5 miles en route to LAKE PARKER.
- *All aircraft with radio contact Lakeland Tower on 124.5 MHz. at least 5 miles from LAKE PARKER.
- *Remain in trail after LAKE PARKER.
- *Be extremely alert for non-radio aircraft arriving from over LAKE PARKER.
- *Runway 9R and 27L SHALL NOT be used unless specific clearance is received from TOWER.
- *Remain on hard surfaces unless otherwise directed.
- *GROUND CONTROL frequency 121.4MHz only as directed by the TOWER.

NO-RADIO AIRCRAFT must have prior Athorization. See SUN 'n Fun procedure ***Nonradio-equipped aircraft - "Special Notice"***

DEPARTURES

- *Monitor ATIS 124.2 MHz. (After Airshow do not start engines until ATIS advises that the Airport is open)
- *Follow Flagman for out of parking areas
- *Monitor Ground Control 121.4
- *Watch FAA Flagman for clearance onto the runway and for takeoff
- *Fly straight out for 3 miles as shown on graphic above
- *IFR departures contact Ground Control before you taxi for en route clearance
- *IFR do not accept Flagman's clearance for takeoff unless a departure release has been received from Ground Control

SUBSCRIPTION INFORMATION

HOW TO ORDER

The Notices to Airmen publication is available by subscription through the Superintendent of Documents. Subscriptions are accepted for a 1 year period. Remittance must be made in advance of shipment. Your check or money order must be made payable to the Superintendent of Documents. Orders can also be charged to your VISA or MASTERCARD account. Orders should be addressed to:

Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402,

or

Phone: (202)783-3238 (Order Desk).

For sale by the Superintendent of Documents, U.S. Government Printing Office Washington, D.C. 20402

TD 4.12/2:

FOREWORD

The primary references for changes to the National Airspace System (NAS) are Aeronautical Charts and Airport/Facility Directories (A/FD) published for the affected area(s). Ideally, most changes to the NAS that meet NOTAM criteria are known sufficiently in advance to allow publication in these publications. When this cannot be done, changes are carried in the Notices to Airman Class II publication, or as a last resort, on the Service A telecommunications system as a NOTAM D item.

NOTAM D information printed in this publication will not be included on the Service A system and will not be provided during pilot briefings unless specifically requested by the pilot.

National Flight Data Center (FDC) NOTAMs primarily reflect changes to Standard Instrument Approach Procedures (SIAPs), Flight Restrictions, and aeronautical chart revisions. The last FDC NOTAM included in this issue is indicated by number and date above. This information insures that subsequent FDC NOTAMs, issued after the cutoff date, can be identified.

The Class II publication contains information of a temporary nature, which is expected to remain for an extended period. This temporary information is carried until it expires or is cancelled. Data of a permanent nature is sometimes carried in the Class II publication as an interim step prior to publication on the appropriate charts or in the A/FD.

The Class II publication is issued every 14 days. The A/FD is published every 56 days. Data in the Class II publication that is current on the effective date of the next A/FD will be transferred to the A/FD and removed from the Class II publication.

Facilities are responsible for forwarding data to the National Flight Data Center (NFDC). Data, still current for the next available Class II publication date, will be published.

This publication is divided into two sections:

1. Section One contains information divided into four categories:

a. GENERAL

b. AIRWAYS

c. FLIGHT RESTRICTIONS

d. AIRPORTS / FACILITIES / PROCEDURAL NOTAMS

The first subsection is listed in descending FDC NOTAM numerical order. The second and third subsections are listed by state. The fourth subsection is ordered by state, city, and airport name.

2. The second section contains special notices that are too long or that concern a wide or unspecified geographical area (which may overlap several states) and are not suitable for inclusion in the first section.

The content of these notices vary widely and are included because of their significant impact on flight safety.

NOTES

1. All times are indicated as UTC or local. During periods of Daylight Savings Time, effective hours in local time will be one hour earlier than shown. All states observe Daylight Savings Time except Arizona, that portion of Indiana in the Eastern Time Zone, Puerto Rico, and the Virgin Islands.

2. (¦) Vertical line items indicate new information.

FDC NOTAM LEGEND

Code	Explanation
5/103	Accountability number assigned to the message originator.
FI/T	Flight information of a temporary nature.
FI/P	Flight information of a permanent nature.

inop	inoperative
int	intersection
intl	international
intst	intensity
ISMLS	Interim Standard Microwave Landing System
J	
J-bar	jet runway barrier
K	
kHz	kilohertz
L	
L	left (used only to designate rwys) eg. rwy 12L
lat	latitude
lb	pounds (weight)
lctd	located
LDA	Localizer type directional aid
LDIN	Lead-in Lighting System
lgtd	lighted
LMM	compass locator at middle marker ILS
lndg	landing
loc	localizer
LOM	compass locator at outer marker ILS
long	longitude
M	
MAA	maximum authorized altitude
mag	magnetic
maint	maintain, maintenance
MALS	Medium Intensity Approach Light System
MALSR	Medium Intensity Approach Light System with Runway Alignment Indicator Lights
MAP	missed approach point
max	maximum
MCA	minimum crossing altitude
MDA	minimum descent altitude
MEA	minimum enroute IFR altitude
MHz	megahertz
min	minimum or minute
MIRL	Medium Intensity Runway Edge Lights
MLS	Microwave Landing System
MM	middle marker ILS
MOCA	minimum obstruction clearance altitude
MRA	minimum reception altitude
MSA	minimum safe altitude
MSL	mean sea level
muni	municipal
N	
N	north
N/A	not authorized
natl	national
navaid	navigational aid
NDB	Non-directional Radio Beacon
NM	nautical mile(s)
NOPT	no procedure turn required
Nr	number
O	
obstn	obstruction
ODALS	Omnidirectional Approach Lighting System
OM	outer marker ILS

wt	weight
Z	
Z	Greenwich mean time

GENERAL

| FDC 6/201 FI/P CORRECT U.S. GOVT WORLD AERONAUTICAL CHART CG21, 16TH EDITION DTD OCT 24, 1985. CHANGED HARRIS VORTAC /HRS/ FREQ 111.6 CHANNEL 053 TO FREQ 109.8 CHANNEL 035.

FDC 6/89 OMEGA STATION F ARGENTINA WILL BE OFF AIR FROM MARCH 101200Z-171200Z AND FROM MARCH 17TH-24TH 1200-2100Z DAILY.

FDC 6/88 OMEGA STATION B LIBERIA WILL BE OFF AIR FROM FEB 010800Z-042200Z. ALSO FROM FEB 5TH-9TH 0800-1800Z DAILY AND FROM FEB 10TH-28TH 0800-1600Z DAILY.

FDC 5/2668 FDC CHART CORRECTION OMAHA SECTIONAL 32ND EDITION DATED AUGUST 29 1985. ADD OBSTRUCTION 1392 FT MSL /278 FT AGL/AND ASSOCIATED TYPE-OVERHEAD PIPELINE 423548N 964135W.

FDC 5/2508 AUTOMATED VOICE AIRPORT RESERVATION SYSTEM../AVARS/. IN ORDER TO IMPROVE THE AVARS CAPACITY THE FAA HAS INSTALLED TWO ADDITIONAL NON-TOLL FREE NUMBERS..617-275-4837/8. EFFECTIVE NOVEMBER 1 1985 TWO ADDITIONAL TOLL FREE LINES WILL BE AVAILABLE TO BE PART OF 1-800-FAA-1212 NUMBER. FAA PLANS TO CONTINUE THE DUAL /ARO/SYSTEM USING THE AUTOMATED SYSTEM ON 1-800-FAA-1212 AND THE MANUAL ARO SYSTEM WITH NEW YORK 718-632-7806/CHICAGO 312-263-2575 AND WASHINGTON DC 202-426-9347 UNTIL FURTHER NOTICE. IN AREAS WHERE TOUCH TONE PHONE SYSTEMS ARE NOT AVAILABLE USERS MAY EITHER CONTACT THE NEAREST FAA FLIGHT SERVICE STATION OR THE /ARO/ AT THE NUMBERS LISTED ABOVE AND REQUEST A RESERVATION. USERS DEPARTING A TRANS-ATLANTIC AIRPORT FOR ARRIVAL TO A HIGH DENSITY AIRPORT SHOULD CONTINUE TO USE THE PROCEDURES OUTLINED IN ADVISORY CIRCULAR AC 90-43F PARA 5 DATED APRIL 22 1985 WHICH STATES CONTACT THE NEAREST FLIGHT SERVICE STATION.

FDC 5/2193 FI/P MTR CORRECT IR-501 MILITARY TRAINING ROUTE/POINT AJ. CHANGE FAC/RAD/DIST POINT AJ TO GLD 354/35.

FDC 5/2130........SPECIAL NOTICE..........INTERNATIONAL FLIGHT PLAN FORM..........INSTRUCTIONS FOR USING FAA FORM 7233-4. ICAO DOCUMENT 4444 AMENDMENT 6 EFFECTIVE NOVEMBER 21 1985 SPECIFIES SEVERAL CHANGES IN ICAO INTERNATIONAL FLIGHT PLAN FORMAT. FAA WILL ACCEPT THE NEW ICAO FORMAT EXCEPT AIRCRAFT SPEED/ALTITUDE FILED IN METRIC TERMS. THEREFORE TO COMPLY AS CLOSELY AS POSSIBLE WITH AMENDMENT 6 THE FOLLOWING ADDITIONAL PROCEDURES WILL APPLY BEGINNING NOVEMBER 21 WHEN USING FAA FORM 7233-4... .....1. FAA FORM 7233-4, ITEM 13, HAS A SPACE FOR FIR BOUNDARIES AND ESTIMATED TIMES. FAA REQUIRES FILED FIR BOUNDARIES AND ESTIMATED TIMES, HOWEVER, PUT THAT INFORMATION IN ITEM 18, OTHER INFORMATION AS SPECIFIED IN ICAO FORMAT.......2. CONCERNING FAA FORM 7233-4, ITEM 15, THE U.S. AIR TRAFFIC SERVICE DOES NOT ACCEPT AIRCRAFT SPEED/ALTITUDE FILED IN METRIC TERMS.......3. IN ITEM 17, IN THE SECTION LABELED ETA, INSTEAD PUT TOTAL ESTIMATED ELASPED TIME/TOTAL EET/.......THE PRESENT SUPPLY OF FAA FORM 7233-4 WILL BE USED UNTIL EXHAUSTED AND REPLACED BY A NEW REVISED FAA INTERNATIONAL FLIGHT PLAN FORM.....DETAILED FAA POLICY, EXPLANATION OF CHANGES, DEFINITIONS, AND RESPONSIBILITIES CONCERNING THESE ICAO FLIGHT PLAN FORMAT CHANGES WILL BE ISSUED TO FAA AIR TRAFFIC PERSONNEL IN THE NATIONAL HEADQUARTERS DIRECTIVE NEAR THE END OF SEPTEMBER.

FDC 5/994 AIRPORT RESERVATION OFFICE/ARO/OPERATIONS... EFF APR 1, 1985...THE FOLLOWING GUIDELINES SHALL BE IN EFFECT... /ARO/WILL ACCEPT RSVNS FOR WASHINGTON NATIONAL AIRPORT /DCA, JOHN F. KENNEDY INTL ARPT /JFK, LA GUARDIA ARPT/LGA, AND CHICAGO O HARE INTL ARPT /ORD BEGINNING 48 HRS PRIOR TO THE PROPOSED TIME OF OPERATION AT THE AFFECTED ARPT. E.G REQ FOR 11 A.M. OPERATION ON THURSDAY WILL BE ACCEPTED STARTING 11 A.M. ON THE PRECEDING TUESDAY. AN EXCEPTION TO THE 48 HR LIMITATION IS MADE FOR WEEKENDS TO RECOGNIZE NORMAL BUSINESS HOURS. A RSVN REQ FOR AN IFR OPERATION ON MONDAY WILL BE ACCEPTED ON THE PREVIOUS THURSDAY STARTING AT THE PROPOSED HR OF OPERATION. REQUESTS FOR IFR OPERATION ON TUESDAY WILL BE ACCEPTED ON THE PREVIOUS FRIDAY STARTING AT THE PROPOSED HR OF OPERATION. E.G. REQ FOR 11 A.M. RSVN ON TUESDAY WOULD BE ACCEPTED BEGINNING 11 A.M. ON FRIDAY. IF THE PREVIOUS FRIDAY IS AN OBSERVED HOLIDAY THE PROCEDURE WILL BE IN EFFECT ON THURSDAY. A MAXIMUM OF TWO RSVNS PER PHONE CALL WILL BE ACCEPTED. E.G. A PILOT MAY REQ A RSVN FOR ARRIVAL AND DEPARTURE DURING THE SAME PHONE CALL PROVIDING BOTH FALL ON THE SAME CALENDAR DAY. E.G. A RSVN REQ FOR 11 A.M. ARRIVAL ON FRIDAY AND 4 P.M. DEPARTURE ON THE SAME DAY MAY BE MADE BEGINNING AT 11 A.M. ON WEDNESDAY.

FDC 4/3277 NOTAM /D/REGARDING RWY SNOW CONDITIONS AND BRAKING ACTION REPORTS FOR CANADIAN AIRPORTS WILL NO LONGER BE ENTERED INTO THE DOMESTIC NOTAM SYSTEM ON SERVICE A BY NFDC. CONTACT THE ASSOCIATED CANADIAN FLIGHT SERVICE STATION FOR THESE REPORTS.

FDC 4/1725 FDC U.S. NOTAM OFFICE POLICY ON FDC NOTAM STORAGE IN CONSOLIDATED NOTAM SYSTEM /CNS/DATA BASE/. ALL CURRENT FDC NOTAMS ARE STORED AND AVAILABLE UPON REQUEST. FDC NOTAMS WHICH ARE STRAIGHT CANCELLATIONS ARE STORED FOR THREE /3/ DAYS. BASED ON COMPUTER DEMANDS SIGNIFICANT TIME DELAYS ON RETRIEVALS CAN BE EXPECTED.
NOTE...REPEATED REQUESTS WILL FURTHER COMPOUND DELAYS. THEREFORE FSS AND USER GROUPS ARE ADVISED TO COLLECT AND STORE REQUIRED FDC NOTAM/S ON INITIAL SERVICE /A/ DISTRIBUTION SUPPLEMENTED BY CLASS 2 NOTAM PUBLICATION.

HAZARDOUS INFLIGHT WEATHER ADVISORY SERVICE (HIWAS)

HIWAS is a national program for broadcasting hazardous weather information (SIGMET's, convective SIGMET's, Center Weather Advisories (CWA), AIRMET's, and urgent PIREP's) on a continuous basis over selected VOR's. The program is operational in the Jacksonville, Miami, and Houston Air Route Traffic Control Center (ARTCC) areas. The chart on the following page identifies the current broadcast outlet locations and frequencies. Frequencies shown in the Atlanta ARTCC area are for planning purposes only. HIWAS will be expanded on an ARTCC by ARTCC basis.

Pilots should be aware that:

* Flight service stations broadcast information on hazardous weather not yet covered by an advisory and make an announcement on their frequencies that new HIWAS information is available.

* Controllers in ARTCC's and air traffic control terminals announce updates to HIWAS information on all appropriate frequencies.

* Controllers and specialists will not routinely broadcast SIGMET's, convective SIGMET's, CWA's, AIRMET's, and urgent PIREP's in the commissioned HIWAS areas.

User comments regarding the effectiveness of the HIWAS program and any proposed revision to HIWAS procedures are solicited.

Mail comments to:

Department of Transportation
Federal Aviation Administration
ATTN: ATO-360
800 Independence Ave. S.W.
Washington, DC 20591

Note: For further information on the HIWAS program, refer to the Airman's Information Manual (AIM) and Airport/Facility Directory (AFD). Operational sites are published in the AFD under radio aids to navigation.

The Interim Voice Response System

The Federal Aviation Administration has leased an Interim Voice Response System (IVRS) that enables pilots throughout the country to obtain selected weather information directly from a computer. The pilot enters requests for specific weather reports for locations of interest by depressing the keys on a Touchtone (R) telephone or keypad adapter on non-Touchtone (R) telephones. The computer will "listen" to telephone signalling tones and will respond with a spoken message derived from stored human speech.

The IVRS is a national system consisting of a network of 16 locations with "speaking" computers, and prepaid telephone access from an additional 8. The locations and telephone numbers are listed below. Call the telephone number nearest you at any time day or night, using any standard 12-key touch-tone phone. For long distance numbers outside your area code, call 1 plus Area Code and number. For assistance or trouble reporting call toll free 1-800-FOR-IVRS at any time.

IVRS Weather Products

1. SEVERE WEATHER FORECAST ALERTS (AWW) inform pilots of forthcoming severe thunderstorms or tornadoes. They are available automatically when you enter a location identifier (LOCID) or TWEB route number for a state in which a Severe Weather Forecast Alert is in effect.

   ISSUED: As necessary.

2. **CONVECTIVE SIGMETS (WST) concern thunderstorms and related phenomena. They are available automatically when you enter a LOCID or TWEB route number for a state in which a Convective SIGMET is in effect.**

   ISSUED: Hourly at 55 minutes past the hour and as needed.

3. **SURFACE OBSERVATIONS (SA) provide observed surface weather conditions for the LOCIDs entered.**

   ISSUED: Hourly on the hour and as needed.

4. **TERMINAL FORECASTS (FT) provide a forecast of weather conditions for the LOCIDs entered.**

   ISSUED: Approximately 1000, 1500, and 2200 GMT and as necessary.

5. **WINDS ALOFT FORECASTS (GF) describe winds and temperatures for the LOCIDs entered. You specify the altitude and number of hours into the future and receive winds and temperatures at your requested altitude plus an altitude above and one below the requested altitude.**

   ISSUED: Unscheduled, but typically at 0400 and 1600 GMT.

6. **TWEB ROUTE FORECASTS (TR) provide a forecast of weather conditions within a 50-mile-wide corridor along a route and within a 50-mile radius for local vicinity forecasts.**

   ISSUED: Approximately 1200, 1800, and 2400 GMT and as needed.

How to Use IVRS

The instructions on how to use IVRS are contained in A Pilot's Guide to IVRS published by the Federal Aviation Administration. You may obtain a copy from any FAA Flight Standards District Office or Flight Service Station.

Comments, questions and requests for more information may also be directed to :

COLORADO SKI COUNTRY AIRPORTS

SPECIAL AIR TRAFFIC MANAGEMENT PROGRAM

Aspen, Colorado
Aspen-Pitkin County/Sardy Field Airport (ASE)

Eagle, Colorado
Eagle County Airport (EGE)

Gunnison, Colorado
Gunnison Country Airport (GUC)

In anticipation of the large number of aircraft operating into the Aspen-Pitkin County/Sardy Field, Eagle County, and Gunnison County airports during ski season, the following procedures have been implemented to enhance safety and minimize traffic delays during the period January 16 through April 6, 1986.

IFR ARRIVALS

Due to the additional volume of unscheduled IFR traffic expected to be generated within the Denver Center airspace, a special traffic management program will be in effect through April 6, 1986.

TRAFFIC MANAGEMENT PROGRAM

Unscheduled IFR flights operating into a Colorado Ski Country Airport should file an appropriate preferred route during the hours 1400 UTC and 0300 UTC (0700 MST-2000 MST) daily.

To Aspen, Colorado (ASE)

Route 1....FROM OVER FIXES BETWEEN DEN CLOCKWISE TO COS: FILE VIA DEN..DBL..ASE

Route 2....FROM OVER FIXES BETWEEN COS CLOCKWISE TO GUC: FILE VIA GUC..DBL..ASE

Route 3....FROM OVER FIXES BETWEEN GUC CLOCKWISE TO DEN: FILE VIA DBL..ASE

To Eagle, Colorado (EGE)

Route 1....FROM OVER FIXES BETWEEN CHE
CLOCKWISE TO IOC: FILE VIA
RLG.RLG189R.STUPE..EGE

Route 2....FROM OVER FIXES BETWEEN IOC
CLOCKWISE TO FMN: FILE VIA
GUC.V421.HAMPS..EGE

Route 3....FROM OVER FIXES BETWEEN FMN
CLOCKWISE TO PUC: FILE VIA
JNC.V134.DBL.V421.HAMPS..EGE

Route 4....FROM OVER FIXES BETWEEN PUC
CLOCKWISE TO CHE: FILE VIA
EKR.V200.RLG.RLG189R.STUPE..EGE

To Gunnison, Colorado (GUC)

VIA AIRWAYS
EXCEPTION: TRAFFIC WILL NOT BE ROUTED DEN J10/J128 GUC

ADVISE ATC OF ALTERNATE AIRPORT PRIOR TO STARTING APPROACH.

Additional routing may be assigned by ATC based on weather and traffic density.

Pilots destined for ski country airports are encouraged to plan their arrivals Monday through Thursday to avoid extensive arrival delays.
Extensive arrival delays can be anticipated between the hours of 1900 UTC and 0100 UTC (1200 MST-1800 MST) Friday, Saturday and Sunday.

Pilots may obtain additional traffic management information from the nearest flight service station (FSS).

FSS's can obtain traffic management information from Denver Center Traffic Management Unit, telephone FTS 323-4246 or commercial 303-651-4246.

AMENDED 1/16/86

Project GALE Meteorological Study

A large scale meteorological study will be conducted from January 15 to March 15, 1986, in the Carolinas and Southeastern Virginia including the adjacent coastal offshore airspace.

The project is known as "GALE--Genesis of Atlantic Low Experiment." The GALE study will investigate the explosive development of East Coast storms which present a serious forecasting problem and often cause severe thunderstorms over the east and northeastern United States. Particular attention will be paid to the role of the air-sea-land interactions and mesocale effects in the rapid development of coastal cyclones. Scientists, meteorologists, and aviators from some 35 or more governmental agencies and state and private universities are committed to the GALE Project.

Some ten or more research aircraft will be deployed to fly routes and flight patterns, both overland and offshore, within the GALE Project Study Area. Most of these aircraft will be based at Raleigh, North Carolina during the GALE study. Offshore activities will include dropwindsonde releases along predetermined tracks located in the United States Gulf and Atlantic offshore areas between 90° West longitude and 70° West longitude. All dropwindsonde releases will occur more than 60NM offshore.

During the study period, an Operations Office will be located at the Raleigh-Durham Airport. Phone numbers for the Gale Operations Office are (919) 783-6440 or FTS 672-4350.

Actual flight operating times will depend on developing storm conditions. Pilots operating within the GALE Project Study Area may receive status information from the appropriate ATC facility.

COORDINATED UNIVERSAL TIME (UTC)

Coordinated Universal Time (UTC) has replaced Greenwich Mean Time (GMT) as the accepted international standard for clock time. UTC is the basis for civil time in most countries of the world rather than GMT. The Federal Aviation Administration has concurred with this change and advised the International Civil Aviation Organization that the conversion would become effective January 16, 1986. The letter "Z" will be retained to indicate "UTC". All United States Government Aeronautical charts and publications that are effective on January 16, 1986, will indicate UTC vice GMT.

AIRPORT RADAR SERVICE AREAS (ARSA)

The National Airspace Review Terminal Airspace Task Group 1-2.2 recommended the ARSA Program as a replacement for the existing Terminal Radar Service Area Program and the FAA has adopted that recommendation. ARSA designations have been made, and effective dates established, for the locations listed below. The following is a summary of the pilot requirements and the ATC procedures for ARSA's. Graphic depictions of each ARSA are also included.

Unless otherwise authorized or required by ATC, the following provisions apply to aircraft operating within an ARSA:

1. Aircraft approaching that would penetrate the ARSA must establish two-way radio communications with ATC prior to entering the ARSA and maintain that communication while operating within the ARSA.
2. Aircraft departing the primary airport within the ARSA must establish two-way communications with ATC prior to departure and maintain that communication while operating within the ARSA. Aircraft departing a satellite airport within the ARSA must contact ATC as soon as practicable after takeoff.
3. Except in an emergency, all operations must be in compliance with ATC clearances and instructions.
4. All arrivals and departures within the ARSA must be in compliance with FAA arrival and departure traffic patterns.
5. Ultralight vehicles and parachute operations may not be conducted within the ARSA except under the terms of an ATC authorization.
6. NOTAM's pertaining to flight within the ARSA must be reviewed as a part of preflight action required by FAR 91.5.

Within ARSA's, ATC will provide the following services:

1. Radar sequencing of all arrivals.
2. Standard separation between all instrument flight rules (IFR) flights.
3. Traffic advisories and safety advisories to all aircraft.
4. Resolve any potential conflict between an aircraft operating IFR and an aircraft operating under visual flight rules by application of conflict resolution procedures.

ARSA's have been designated at the following locations to be effective December 19, 1985.

Albany County Airport, NY
Anchorage International Airport, AK
Bradley International Airport, Windsor Locks, CT
Corpus Christi International Airport, TX
Long Island MacArthur Airport, Islip, NY
Pensacola Naval Air Station, FL
Pensacola Regional Airport, FL
San Antonio International Airport, TX
Syracuse Hancock International Airport, NY
Tulsa International Airport, OK
Whiting Naval Air Station, FL

ARSA's have been designated at the following locations to be effective January 16, 1986.

Burbank-Glendale-Pasadena Airport, CA
El Toro Marine Corps Air Station, CA
Greensboro-High Point-Winston-Salem Regional Airport, NC
James M. Cox Dayton International Airport, OH
Lubbock International Airport, TX
March Air Force Base, CA
Norton Air Force Base, CA

WASHINGTON HELICOPTER ROUTE CHART

A new Washington Helicopter Route Chart is available with a February 13 effective date. This chart is a joint FAA/DOD effort and is an updated version of the DOD chart of June 14, 1982.

Major helicopter and transition routes along with narrative descriptions are included. Pictorial symbols of prominent landmarks, tower frequencies, altitude changeover points, reporting points, and transponder codes are other features depicted on this chart. Further, this chart shows selected cultural features such as power transmission lines and prominent buildings which are depicted for landmark value only. The chart does not depict complete obstacle information due to the high concentration of objects in the area.

Military personnel may obtain copies from their appropriate authority. Civilians may obtain a free chart by writing:

THE EAA SUN 'n FUN FLY-IN

LAKELAND MUNICIPAL AIRPORT, FLORIDA

MARCH 16 - 22, 1986

In anticipation of the large number of aircraft operating to and from the Lakeland Municipal Airport, Florida, during the 1986 Fly-In, the following procedures are provided to enhance safety and minimize air traffic delays.

LAKELAND MUNICIPAL AIRPORT CLOSINGS (and other general information)

°Lakeland Municipal Airport will be closed daily March 16 - 22, 1986, from 2:00 p.m. to 4:30 p.m., Eastern Standard Time, for Airshow. The Airshow operations area is from the surface to 10,000 feet MSL within a five (5) statute mile radius of Lakeland Municipal Airport, and will be used on the dates and time specified above.

°Arrival delays of up to one (1) hour can be expected daily, between 4:30 p.m. and 5:30 p.m.

°Student training flights are highly discouraged during this event. This includes student solo cross-country flights, touch-and-go landings, low approaches and practice instrument approaches.

°The ILS runway 5/23 will be shut down during the Fly-In.

°Runways 5/23 and 13/31 will be closed and so marked during this Event.

°Do not operate in the airport traffic area south of the airport without credentials received at hourly briefings held on the airport in the Sun 'n Fun area.

TEMPORARY FAA LAKELAND CONTROL TOWER

The Control Tower will be open and the control zone will be in effect:

MARCH 16 - 22, 1986 - 7:00 a.m. to 7:00 p.m., EST

Lakeland Frequencies:

Lakeland VOR - 116.0 MHz.
Lakeland ATIS - 124.2 MHz.
Lakeland Tower - 124.5 MHz. (if unable 119.8 MHz) 380.1 MHz.
Lakeland Ground Control - 121.4 MHz.

NOTE: ATC may assign 123.7 MHz., or 118.95 MHz., as appropriate.

VFR ARRIVALS TO LAKELAND MUNICIPAL AIRPORT

All aircraft must use the Sun 'n Fun Lake Parker arrival procedure (see graphic). When you are twenty (20) to thirty (30) miles from Lakeland listen to the ATIS 124.2 MHz., for landing and special information. When volume exceeds the airport's acceptance rate, VFR holding will be required prior to or over Lake Parker. As you approach Lake Parker (Lakeland VORTAC 040/6), turn your TRANSPONDER "OFF" MONITOR Lakeland Tower on 124.5 and fly westerly over the power plant smokestack with white strobe lights which is located at the north end of Lake Parker. Expect heavy air traffic, some without radios, in this area. All aircraft should maintain 100 m.p.h., at 1,000 feet MSL inbound from Lake Parker. Aircraft unable to slow to this speed should maintain 150 m.p.h. at 1,500 feet.

Controllers located on the ground at Lake Parker will contact you, using your aircraft "color" and "type" to provide sequencing and other arrival and traffic pattern information - they will contact you in the vicinity of the north power plant and may ask you to "rock the wings" as an acknowledgment for instructions.

IMPORTANT: REMAIN IN TRAIL to the airport - no side-by-side separation.

TRAFFIC PATTERN

All arriving traffic enter the airport traffic area only via the Sun 'n Fun Lake Parker arrival procedure as indicated above and on the attached graphic. Only left traffic for runway 9L or right traffic for runway 27R will be used with downwind leg entry close to the airport over Airport Road. NOTE: This runway is a narrow strip 75 feet wide which is usually a taxiway. DO NOT land on the main, wide, runway 9R/27L unless specifically instructed by the Control Tower. Use caution for other Special Events and Flyby aircraft which after special face-to-face briefings are authorized to use the main runway with opposite-direction base leg to final approach turns. All landing traffic must remain alert for possible radio or light signal wave-off from the Tower. Red smoke OR hand signals from controllers located near the approach end of the runway in use may also be used to signal wave-off. When landing on runway 9L DO NOT TOUCH DOWN until beyond the first taxiway at the marked threshold (4,500 feet remaining) which has been displaced because of tall trees off the approach end of the runway. Plan landing so as to clear the runway as soon as possible on a hard surface.

AFTER TOUCHDOWN

Aircraft landing on runway 9L, turn off to the left; on 27R, turn to the right. When landing on the narrow runway (9L or 27R) DO NOT TURN OFF TOWARD THE SOUTH. CAUTION: Remain on hard surface at all times unless specifically directed by the Tower or Flagman to do otherwise. Expeditious clearing of the runway is absolutely essential because of continuous arriving and departing aircraft behind you. Ground Controllers will direct you to the parking area.

VFR DEPARTURE

Before taxiing, monitor Lakeland ATIS on 124.2 MHz., for taxi information and follow Flagman's directions and other traffic to the advertised active runway. Radio-equipped aircraft should monitor Ground Control on 121.4 MHz., while taxiing, and contact the controller ONLY if you need further information. To expedite traffic, you will be directed for an intersection departure on runway 9 (5,000 feet remaining), or for the full length only on runway 27. The ATIS will inform you whether to call the Tower or watch the FAA controller at the runway for takeoff clearance. After departure, proceed straight out for three (3) miles before proceeding on course. Be very alert for numerous aircraft departing (particularly after 4:30 p.m.) and for special flight activity south and arrival traffic north. Monitor the Frequency given on the ATIS, but DO NOT CALL unless an EMERGENCY exists.

NONRADIO-EQUIPPED AIRCRAFT - "SPECIAL NOTICE"

All pilots flying an aircraft WITHOUT a radio into Lakeland shall follow the Sun 'n Fun-Lake Parker Arrival Procedures (see attached graphic). When approaching Lake Parker, be alert for other aircraft inbound to Lakeland and follow that traffic to the airport. Land ONLY on runway 9L or 27R. See the preceding paragraphs with emphasis on: ***VFR arrivals to Lakeland Municipal Airport***/***Traffic Pattern*** and ***After Touchdown***

If RED SMOKE is being emitted near the approach end of the landing runway, or if a RED LIGHT is observed from the Control Tower located on the north side of the airport, nonradio-equipped aircraft are TO LEAVE the traffic pattern and REENTER over Lake Parker. Be extremely alert for numerous aircraft operating in the vicinity of Lakeland. If there is any possibility that you might be coming to Sun 'n Fun in an aircraft WITHOUT A RADIO, it is important that you place your - Name/Aircraft Type/Identification Number/Address, and the word "NONRADIO," on a postcard, and mail it to:

Sarasota ATC Tower, DOT/FAA,
P.O. Box 13065
Sarasota, FL., 33578

The receipt of the card will validate your Authorization to operate without a radio, excluding local flights which require a Briefing, while the temporary ATC Tower is in operation. The card also indicates that YOU HAVE READ AND UNDERSTAND ALL OF THE ABOVE PROCEDURES. It is suggested that you sign and fill in the following, and carry this "NONRADIO-EQUIPPED" procedure page with you while exercising this Authorization:

____
(Pilot's Signature)

____
(Date card mailed)

____
(Aircraft Identification)

Because of the temporary nature of the Control Tower, considerable delay may be encountered getting Authorization, by telephone, to operate without a radio.

VFR FLIGHT PLANS

Pilots are encouraged to file a Flight Plan. Flight Plans should be closed by radio with St. Petersburg FSS, transmit on 122.1 MHz., listen on the Lakeland VOR 116.0 MHz. If unable, call St. Petersburg FSS by telephone (local call - 682-3258), or, by interphones, which are located at Lakeland, and in the Sun 'n Fun area.

IFR TRAFFIC

Due to the expected increase in the volume of traffic generated by the Sun 'n Fun Fly-In, some delays may be encountered for IFR arrival and departing traffic. Be familiar with the Sun 'n Fun-Lake Parker Arrival and Departure Procedures (1986) that will be used by the temporary Control Tower at Lakeland.

IFR ARRIVALS

Be prepared to discontinue your approach and to enter a VFR traffic pattern for landing sequence. When the ceiling and visibility at Lakeland is reported at or above 3,000 feet and five (5) miles, expect a vector to the vicinity of Lake Parker for a visual approach following the published Sun 'n Fun-Lake Parker Arrival Procedures (see attached graphic). Be extremely alert for a high volume of traffic with a wide variance of performance characteristics operating in the vicinity of Lakeland.

IFR DEPARTURES

File your Flight Plan at least one (1) hour prior to proposed departure time. IFR Flight Plans which have not been used will be cancelled two (2) hours after the filed proposed departure time. Contact Lakeland Ground Control on 121.4 MHz., for your clearance. DO NOT TAXI until receiving your en route clearance. If you have not received initial departure instructions prior to reaching the runway, attempt to taxi your aircraft to a position where other VFR aircraft can pass you for departure. In any case, DO NOT accept the FAA Flagman's instructions to enter the runway or take off unless you have received a departure release by radio.

NOTE: Airport closed daily from 2:00 p.m. - 4:30 p.m. EST for Airshow. The Airshow Operations Area is from the surface to 10,000 feet MSL within a 5-mile radius of the Airport. Arrival delays expected between 4:30 p.m. and 5:30 p.m.

ATIS 124.2
TOWER . . . 124.5
C/C 121.4
VOR 116.0

NOTE: Unless receiving radar service squawk standby within 15 miles of Lakeland Airport

ALTITUDE
1000 ft. MSL
(130 kts. or less)

1500 ft. MSL
(over 130 kts.)

REMAIN CLEAR
DO NOT operate in the airport traffic area south of Runway 9/27 without current credentials received at hourly Briefings at Sun 'n Fun.

ARRIVALS

- Monitor ATIS 124.2 MHz. 15 miles out remain clear of the airport traffic area below 3000 ft. AGL within 5 miles en route to LAKE PARKER.
- All aircraft with radio contact Lakeland Tower on 124.5 MHz. at least 5 miles from LAKE PARKER.
- Remain in trail after LAKE PARKER.
- Be extremely alert for non-radio aircraft arriving from over LAKE PARKER.
- Runway 9R and 27L SHALL NOT be used unless specific clearance is received from TOWER.
- Remain on hard surfaces unless otherwise directed.
- GROUND CONTROL frequency 121.4MHz only as directed by the TOWER.

NO-RADIO AIRCRAFT must have prior Athorisation. See SUN 'n Fun procedure ***Nonradio-equipped aircraft - "Special Notice"***

DEPARTURES

- Monitor ATIS 124.2 MHz. (After Airshow do not start engines until ATIS advises that the Airport is open)
- Follow Flagman for out of parking areas
- Monitor Ground Control 121.4
- Watch FAA Flagman for clearance onto the runway and for takeoff
- Fly straight out for 3 miles as shown on graphic above
- IFR departures contact Ground Control before you taxi for en route clearance
- IFR do not accept Flagman's clearance for takeoff unless a departure release has been received from Ground Control

ULTRALIGHT VEHICLES

Special Arrival and Departure Procedures have been developed (see graphic below) to allow for the arrival and departure of Ultralight vehicles at the Lakeland Municipal Airport in conjunction with the 1986 EAA Sun 'n Fun Fly-In.

> "These procedures are AUTHORIZED only from March 16 - 22, 1986, between Sunrise and 2:00 p.m., and from 4:30 p.m., until Sunset. The airport and Ultralight area closed daily from 2:00 p.m. to 4:30 p.m., during the Fly-In."

PIPER ROAD
PIPER WATER TANK
(ORANGE & WHITE STRIPED)
TO
5 miles South
FROM
5 miles South.

- Enter and depart from the SOUTH only.
- DO NOT ENTER the area marked with Diagonal lines.
- Departing vehicles have the right-of-way.
- Remain at or below 500 feet.
- Determine direction of traffic before entry.
- DO NOT overfly houses-livestock-people, etc., closer than 500 ft. laterally.
- Use extreme caution when RED FLAGS are flying near the landing area.

Compliance with these procedures satisfies the authorization requirements of FAR 103.17. Any deviation from these procedures or authorized operating times will be subject to enforcement action by the FAA.

SPECIAL USE AIRSPACE
(Military Operations Area)

Effective March 16-22, 1986

1. Grande Low Temporary MOA, NM

    Boundaries. That airspace between R-5107A and R-5103B from lat. 32°16'00"N. to lat. 32°27'00"N.

    Altitudes. 500 feet AGL to and including 1,500 AGL excluding that airspace below 1,500 feet AGL over Oro Grande, NM.

    Times of use. 0830 MST to 1600 MST.

    Controlling agency. FAA, Albuquerque ARTCC, Albuquerque, NM

    Using agency. 49th Tactical Fighter Wing DOOS, Holloman Air Force Base, NM

2. Grande High Temporary MOA, NM

    Boundaries. That airspace between R-5107A and R-5103B from lat. 32°16'00"N. to lat. 32°27'00"N.

    Altitudes. 12,500 feet MSL to but not including FL 180.

    Times of use. 0830 MST to 1600 MST.

    Controlling agency. FAA, Albuquerque ARTCC, Albuquerque, NM

    Using agency. 49th Tactical Fighter Wing DOOS, Holloman Air Force Base, NM

NOTICES TO AIRMEN
CONTENT CRITERIA
Revised 1985

ALL AIRPORTS

TABLE 1

Information Category	Content Criteria
Airports	Abandonments (If currently listed in Airport/Facility Directory), Openings, Closings.
Runways	Openings, Closings, Commissionings, Permanent Closures.

NOTAM D AIRPORTS

TABLE 2

Information Category	Content Criteria
Airport Operating Restriction	CFR, ACR, etc.
Approach Light Systems	Commissionings, Changes, Decommissionings, Outages (with Effective Dates), Pilot Control (Commissionings, Decommissionings, Outages (with Effective Dates)).
Control Zones	Hours of Operation (in Local Time).
Displaced Thresholds	Implementation and Changes.
Runways	Ident Changes, Length, Width, Surface Composition Changes.
Runway Light Systems	Commissionings, Changes, Outages (with Effective Dates), Pilot Control (Commissionings, Decommissionings, Outages (with Effective Dates)).

NAVAIDS, COMMUNICATIONS, OTHER SERVICES

TABLE 3

Information Category	Content Criteria
Navigational Facilities	Commissionings (including Ident and Frequency), Decommissionings (including Ident and Frequency), Frequency Changes, Changes in Monitoring Facility and/or Status, Restrictions, Outages (with Effective Dates).
Air Traffic Control Towers, Approach Controls	Commissionings (including Frequencies), Hours of Operation, Decommissionings.
Flight Service Stations	Commissionings, Decommissionings, Hours of Operation; Commissionings, Decommissionings of RCO; Changes in Monitoring Status of RCO; Outages of RCO (with Effective Dates).
Weather	AWOS (System and Frequency).

FOREWORD

The primary references for changes to the National Airspace System (NAS) are Aeronautical Charts and Airport/Facility Directories (A/FD) published for the affected area(s). Ideally, most changes to the NAS that meet NOTAM criteria are known sufficiently in advance to allow publication in these publications. When this cannot be done, changes are carried in the Notices to Airman Class II publication, or as a last resort, on the Service A telecommunications system as a NOTAM D item.

NOTAM D information printed in this publication will not be included on the Service A system and will not be provided during pilot briefings unless specifically requested by the pilot.

National Flight Data Center (FDC) NOTAMs primarily reflect changes to Standard Instrument Approach Procedures (SIAPs), Flight Restrictions, and aeronautical chart revisions. The last FDC NOTAM included in this issue is indicated by number and date above. This information insures that subsequent FDC NOTAMs, issued after the cutoff date, can be identified.

The Class II publication contains information of a temporary nature, which is expected to remain for an extended period. This temporary information is carried until it expires or is cancelled. Data of a permanent nature is sometimes carried in the Class II publication as an interim step prior to publication on the appropriate charts or in the A/FD.

The Class II publication is issued every 14 days. The A/FD is published every 56 days. Data in the Class II publication that is current on the effective date of the next A/FD will be transferred to the A/FD and removed from the Class II publication.

Facilities are responsible for forwarding data to the National Flight Data Center (NFDC). Data, still current for the next available Class II publication date, will be published.

This publication is divided into two sections:

1. Section One contains information divided into four categories:

a. GENERAL

b. AIRWAYS

c. FLIGHT RESTRICTIONS

d. AIRPORTS / FACILITIES / PROCEDURAL NOTAMS

The first subsection is listed in descending FDC NOTAM numerical order. The second and third subsections are listed by state. The fourth subsection is ordered by state, city, and airport name.

2. The second section contains special notices that are too long or that concern a wide or unspecified geographical area (which may overlap several states) and are not suitable for inclusion in the first section.

The content of these notices vary widely and are included because of their significant impact on flight safety.

NOTES

1. All times are indicated as UTC or local. During periods of Daylight Savings Time, effective hours in local time will be one hour earlier than shown. All states observe Daylight Savings Time except Arizona, that portion of Indiana in the Eastern Time Zone, Puerto Rico, and the Virgin Islands.

2. (|) Vertical line items indicate new information.

FDC NOTAM LEGEND

Code	Explanation
5/103	Accountability number assigned to the message originator.
FI/T	Flight information of a temporary nature.
FI/P	Flight information of a permanent nature.

FDC 5/2508 AUTOMATED VOICE AIRPORT RESERVATION SYSTEM../AVARS/. IN ORDER TO IMPROVE THE AVARS CAPACITY THE FAA HAS INSTALLED TWO ADDITIONAL NON-TOLL FREE NUMBERS..617-375-4837/8. EFFECTIVE NOVEMBER 1 1985 TWO ADDITIONAL TOLL FREE LINES WILL BE AVAILABLE TO BE PART OF 1-800-FAA-1212 NUMBER. FAA PLANS TO CONTINUE THE DUAL /ARO/SYSTEM USING THE AUTOMATED SYSTEM ON 1-800-FAA-1212 AND THE MANUAL ARO SYSTEM WITH NEW YORK 718-632-7806/CHICAGO 312-263-2578 AND WASHINGTON DC 202-426-9347 UNTIL FURTHER NOTICE. IN AREAS WHERE TOUCH TONE PHONE SYSTEMS ARE NOT AVAILABLE USERS MAY EITHER CONTACT THE NEAREST FAA FLIGHT SERVICE STATION OR THE /ARO/ AT THE NUMBERS LISTED ABOVE AND REQUEST A RESERVATION. USERS DEPARTING A TRANS-ATLANTIC AIRPORT FOR ARRIVAL TO A HIGH DENSITY AIRPORT SHOULD CONTINUE TO USE THE PROCEDURES OUTLINED IN ADVISORY CIRCULAR AC 90-43F PARA 5 DATED APRIL 22 1985 WHICH STATES CONTACT THE NEAREST FLIGHT SERVICE STATION.

FDC 5/2193 FI/P MTR CORRECT IR-501 MILITARY TRAINING ROUTE/POINT AJ. CHANGE FAC/RAD/DIST POINT AJ TO GLD 354/35.

FDC 5/2130........SPECIAL NOTICE..........INTERNATIONAL FLIGHT PLAN FORM..........INSTRUCTIONS FOR USING FAA FORM 7233-4. ICAO DOCUMENT 4444 AMENDMENT 6 EFFECTIVE NOVEMBER 21 1985 SPECIFIES SEVERAL CHANGES IN ICAO INTERNATIONAL FLIGHT PLAN FORMAT. FAA WILL ACCEPT THE NEW ICAO FORMAT EXCEPT AIRCRAFT SPEED/ALTITUDE FILED IN METRIC TERMS. THEREFORE TO COMPLY AS CLOSELY AS POSSIBLE WITH AMENDMENT 6 THE FOLLOWING ADDITIONAL PROCEDURES WILL APPLY BEGINNING NOVEMBER 21 WHEN USING FAA FORM 7233-4... .....1. FAA FORM 7233-4, ITEM 13, HAS A SPACE FOR FIR BOUNDARIES AND ESTIMATED TIMES. FAA REQUIRES FILED FIR BOUNDARIES AND ESTIMATED TIMES, HOWEVER, PUT THAT INFORMATION IN ITEM 18, OTHER INFORMATION AS SPECIFIED IN ICAO FORMAT.......2. CONCERNING FAA FORM 7233-4, ITEM 15, THE U.S. AIR TRAFFIC SERVICE DOES NOT ACCEPT AIRCRAFT SPEED/ALTITUDE FILED IN METRIC TERMS.......3. IN ITEM 17, IN THE SECTION LABELED ETA, INSTEAD PUT TOTAL ESTIMATED ELASPED TIME/TOTAL EET/.......THE PRESENT SUPPLY OF FAA FORM 7233-4 WILL BE USED UNTIL EXHAUSTED AND REPLACED BY A NEW REVISED FAA INTERNATIONAL FLIGHT PLAN FORM.....DETAILED FAA POLICY, EXPLANATION OF CHANGES, DEFINITIONS, AND RESPONSIBILITIES CONCERNING THESE ICAO FLIGHT PLAN FORMAT CHANGES WILL BE ISSUED TO FAA AIR TRAFFIC PERSONNEL IN THE NATIONAL HEADQUARTERS DIRECTIVE NEAR THE END OF SEPTEMBER.

FDC 5/594 AIRPORT RESERVATION OFFICE/ARO/OPERATIONS... EFF APR 1, 1985...THE FOLLOWING GUIDELINES SHALL BE IN EFFECT... /ARO/WILL ACCEPT RSVNS FOR WASHINGTON NATIONAL AIRPORT /DCA, JOHN F. KENNEDY INTL ARPT /JFK, LA GUARDIA ARPT/LGA, AND CHICAGO O HARE INTL ARPT /ORD BEGINNING 48 HRS PRIOR TO THE PROPOSED TIME OF OPERATION AT THE AFFECTED ARPT. E.G REQ FOR 11 A.M. OPERATION ON THURSDAY WILL BE ACCEPTED STARTING 11 A.M. ON THE PRECEDING TUESDAY. AN EXCEPTION TO THE 48 HR LIMITATION IS MADE FOR WEEKENDS TO RECOGNIZE NORMAL BUSINESS HOURS. A RSVN REQ FOR AN IFR OPERATION ON MONDAY WILL BE ACCEPTED ON THE PREVIOUS THURSDAY STARTING AT THE PROPOSED HR OF OPERATION. REQUESTS FOR IFR OPERATION ON TUESDAY WILL BE ACCEPTED ON THE PREVIOUS FRIDAY STARTING AT THE PROPOSED HR OF OPERATION. E.G. REQ FOR 11 A.M. RSVN ON TUESDAY WOULD BE ACCEPTED BEGINNING 11 A.M. ON FRIDAY. IF THE PREVIOUS FRIDAY IS AN OBSERVED HOLIDAY THE PROCEDURE WILL BE IN EFFECT ON THURSDAY. A MAXIMUM OF TWO RSVNS PER PHONE CALL WILL BE ACCEPTED. E.G. A PILOT MAY REQ A RSVN FOR ARRIVAL AND DEPARTURE DURING THE SAME PHONE CALL PROVIDING BOTH FALL ON THE SAME CALENDAR DAY. E.G. A RSVN REQ FOR 11 A.M. ARRIVAL ON FRIDAY AND 4 P.M. DEPARTURE ON THE SAME DAY MAY BE MADE BEGINNING AT 11 A.M. ON WEDNESDAY.

FDC 4/3277 NOTAM /D/REGARDING RWY SNOW CONDITIONS AND BRAKING ACTION REPORTS FOR CANADIAN AIRPORTS WILL NO LONGER BE ENTERED INTO THE DOMESTIC NOTAM SYSTEM ON SERVICE A BY NFDC. CONTACT THE ASSOCIATED CANADIAN FLIGHT SERVICE STATION FOR THESE REPORTS.

FDC 4/1725 FDC U.S. NOTAM OFFICE POLICY ON FDC NOTAM STORAGE IN CONSOLIDATED NOTAM SYSTEM /CNS/DATA BASE/. ALL CURRENT FDC NOTAMS ARE STORED AND AVAILABLE UPON REQUEST. FDC NOTAMS WHICH ARE STRAIGHT CANCELLATIONS ARE STORED FOR THREE /3/ DAYS. BASED ON COMPUTER DEMANDS SIGNIFICANT TIME DELAYS ON RETRIEVALS CAN BE EXPECTED.
NOTE...REPEATED REQUESTS WILL FURTHER COMPOUND DELAYS. THEREFORE FSS AND USER GROUPS ARE ADVISED TO COLLECT AND STORE REQUIRED FDC NOTAM/S ON INITIAL SERVICE /A/ DISTRIBUTION SUPPLEMENTED BY CLASS 2 NOTAM PUBLICATION.

HAZARDOUS INFLIGHT WEATHER ADVISORY SERVICE (HIWAS)

HIWAS is a national program for broadcasting hazardous weather information (SIGMET's, convective SIGMET's, Center Weather Advisories (CWA), AIRMET's, and urgent PIREP's) on a continuous basis over selected VOR's. The program is operational in the Jacksonville, Miami, and Houston Air Route Traffic Control Center (ARTCC) areas. The chart on the following page identifies the current broadcast outlet locations and frequencies. Frequencies shown in the Atlanta ARTCC area are for planning purposes only. HIWAS will be expanded on an ARTCC by ARTCC basis.

Pilots should be aware that:

- Flight service stations broadcast information on hazardous weather not yet covered by an advisory and make an announcement on their frequencies that new HIWAS information is available.

- Controllers in ARTCC's and air traffic control terminals announce updates to HIWAS information on all appropriate frequencies.

- Controllers and specialists will not routinely broadcast SIGMET's, convective SIGMET's, CWA's, AIRMET's, and urgent PIREP's in the commissioned HIWAS areas.

User comments regarding the effectiveness of the HIWAS program and any proposed revision to HIWAS procedures are solicited.

Mail comments to:

Department of Transportation
Federal Aviation Administration
ATTN: ATO-360
800 Independence Ave. S.W.
Washington, DC 20591

Note: For further information on the HIWAS program, refer to the Airman's Information Manual (AIM) and Airport/Facility Directory (AFD). Operational sites are published in the AFD under radio aids to navigation.

The Interim Voice Response System

The Federal Aviation Administration has leased an Interim Voice Response System (IVRS) that enables pilots throughout the country to obtain selected weather information directly from a computer. The pilot enters requests for specific weather reports for locations of interest by depressing the keys on a Touchtone$^{(R)}$ telephone or keypad adapter on non-Touchtone$^{(R)}$ telephones. The computer will "listen" to telephone signalling tones and will respond with a spoken message derived from stored human speech.

The IVRS is a national system consisting of a network of 16 locations with "speaking" computers, and prepaid telephone access from an additional 8. The locations and telephone numbers are listed below. Call the telephone number nearest you at any time day or night, using any standard 12-key touch-tone phone. For long distance numbers outside your area code, call 1 plus Area Code and number. For assistance or trouble reporting call toll free 1-800-FOR-IVRS at any time.

IVRS Weather Products

1. SEVERE WEATHER FORECAST ALERTS (AWW) inform pilots of forthcoming severe thunderstorms or tornadoes. They are available automatically when you enter a location identifier (LOCID) or TWEB route number for a state in which a Severe Weather Forecast Alert is in effect.

   ISSUED: As necessary.

2. **CONVECTIVE SIGMETS (WST) concern thunderstorms and related phenomena. They are available automatically when you enter a LOCID or TWEB route number for a state in which a Convective SIGMET is in effect.**

   ISSUED: Hourly at 55 minutes past the hour and as needed.

3. **SURFACE OBSERVATIONS (SA) provide observed surface weather conditions for the LOCIDs entered.**

   ISSUED: Hourly on the hour and as needed.

4. **TERMINAL FORECASTS (FT) provide a forecast of weather conditions for the LOCIDs entered.**

   ISSUED: Approximately 1000, 1500, and 2200 GMT and as necessary.

5. **WINDS ALOFT FORECASTS (GF) describe winds and temperatures for the LOCIDs entered. You specify the altitude and number of hours into the future and receive winds and temperatures at your requested altitude plus an altitude above and one below the requested altitude.**

   ISSUED: Unscheduled, but typically at 0400 and 1600 GMT.

6. **TWEB ROUTE FORECASTS (TR) provide a forecast of weather conditions within a 50-mile-wide corridor along a route and within a 50-mile radius for local vicinity forecasts.**

   ISSUED: Approximately 1200, 1800, and 2400 GMT and as needed.

How to Use IVRS

The instructions on how to use IVRS are contained in A Pilot's Guide to IVRS published by the Federal Aviation Administration. You may obtain a copy from any FAA Flight Standards District Office or Flight Service Station.

COLORADO SKI COUNTRY AIRPORTS

SPECIAL AIR TRAFFIC MANAGEMENT PROGRAM

Aspen, Colorado
Aspen-Pitkin County/Sardy Field Airport (ASE)

Eagle, Colorado
Eagle County Airport (EGE)

Gunnison, Colorado
Gunnison Country Airport (GUC)

In anticipation of the large number of aircraft operating into the Aspen-Pitkin County/Sardy Field, Eagle County, and Gunnison County airports during ski season, the following procedures have been implemented to enhance safety and minimize traffic delays during the period January 16 through April 6, 1986.

IFR ARRIVALS

Due to the additional volume of unscheduled IFR traffic expected to be generated within the Denver Center airspace, a special traffic management program will be in effect through April 6, 1986.

TRAFFIC MANAGEMENT PROGRAM

Unscheduled IFR flights operating into a Colorado Ski Country Airport should file an appropriate preferred route during the hours 1400 UTC and 0300 UTC (0700 MST-2000 MST) daily.

To Aspen, Colorado (ASE)

Route 1....FROM OVER FIXES BETWEEN DEN CLOCKWISE TO COS: FILE VIA DEN..DBL..ASE

To Gunnison, Colorado (GUC)

VIA AIRWAYS

EXCEPTION: TRAFFIC WILL NOT BE ROUTED DEN J10/J128 GUC

ADVISE ATC OF ALTERNATE AIRPORT PRIOR TO STARTING APPROACH.

Additional routing may be assigned by ATC based on weather and traffic density.

Pilots destined for ski country airports are encouraged to plan their arrivals Monday through Thursday to avoid extensive arrival delays.
Extensive arrival delays can be anticipated between the hours of 1900 UTC and 0100 UTC (1200 MST-1800 MST) Friday, Saturday and Sunday.

Pilots may obtain additional traffic management information from the nearest flight service station (FSS).

FSS's can obtain traffic management information from Denver Center Traffic Management Unit, telephone FTS 323-4246 or commercial 303-651-4246.

AMENDED 1/16/86

Project GALE Meteorological Study

A large scale meteorological study will be conducted from January 15 to March 15, 1986, in the Carolinas and Southeastern Virginia including the adjacent coastal offshore airspace.

The project is known as "GALE--Genesis of Atlantic Low Experiment." The GALE study will investigate the explosive development of East Coast storms which present a serious forecasting problem and often cause severe thunderstorms over the east and northeastern United States. Particular attention will be paid to the role of the air-sea-land interactions and mesocale effects in the rapid development of coastal cyclones. Scientists, meteorologists, and aviators from some 35 or more governmental agencies and state and private universities are committed to the GALE Project.

Some ten or more research aircraft will be deployed to fly routes and flight patterns, both overland and offshore, within the GALE Project Study Area. Most of these aircraft will be based at Raleigh, North Carolina during the GALE study. Offshore activities will include dropwindsonde releases along predetermined tracks located in the United States Gulf and Atlantic offshore areas between 90° West longitude and 70° West longitude. All dropwindsonde releases will occur more than 60NM offshore.

During the study period, an Operations Office will be located at the Raleigh-Durham Airport. Phone numbers for the Gale Operations Office are (919) 783-6440 or FTS 672-4350.

Actual flight operating times will depend on developing storm conditions. Pilots operating within the GALE Project Study Area may receive status information from the appropriate ATC facility.

COORDINATED UNIVERSAL TIME (UTC)

Coordinated Universal Time (UTC) has replaced Greenwich Mean Time (GMT) as the accepted international standard for clock time. UTC is the basis for civil time in most countries of the world rather than GMT. The Federal Aviation Administration has concurred with this change and advised the International Civil Aviation Organization that the conversion would become effective January 16, 1986. The letter "Z" will be retained to indicate "UTC". All United States Government Aeronautical charts and publications that are effective on January 16, 1986, will indicate UTC vice GMT.

AIRPORT RADAR SERVICE AREAS (ARSA)

The National Airspace Review Terminal Airspace Task Group 1-2.2 recommended the ARSA Program as a replacement for the existing Terminal Radar Service Area Program and the FAA has adopted that recommendation. ARSA designations have been made, and effective dates established, for the locations listed below. The following is a summary of the pilot requirements and the ATC procedures for ARSA's. Graphic depictions of each ARSA are also included.

Unless otherwise authorized or required by ATC, the following provisions apply to aircraft operating within an ARSA:

1. Aircraft approaching that would penetrate the ARSA must establish two-way radio communications with ATC prior to entering the ARSA and maintain that communication while operating within the ARSA.
2. Aircraft departing the primary airport within the ARSA must establish two-way communications with ATC prior to departure and maintain that communication while operating within the ARSA. Aircraft departing a satellite airport within the ARSA must contact ATC as soon as practicable after takeoff.
3. Except in an emergency, all operations must be in compliance with ATC clearances and instructions.
4. All arrivals and departures within the ARSA must be in compliance with FAA arrival and departure traffic patterns.
5. Ultralight vehicles and parachute operations may not be conducted within the ARSA except under the terms of an ATC authorization.
6. NOTAM's pertaining to flight within the ARSA must be reviewed as a part of preflight action required by FAR 91.5.

Within ARSA's, ATC will provide the following services:

1. Radar sequencing of all arrivals.
2. Standard separation between all instrument flight rules (IFR) flights.
3. Traffic advisories and safety advisories to all aircraft.
4. Resolve any potential conflict between an aircraft operating IFR and an aircraft operating under visual flight rules by application of conflict resolution procedures.

ARSA's have been designated at the following locations to be effective December 19, 1985.

Albany County Airport, NY
Anchorage International Airport, AK
Bradley International Airport, Windsor Locks, CT
Corpus Christi International Airport, TX
Long Island MacArthur Airport, Islip, NY
Pensacola Naval Air Station, FL
Pensacola Regional Airport, FL
San Antonio International Airport, TX
Syracuse Hancock International Airport, NY
Tulsa International Airport, OK
Whiting Naval Air Station, FL

ARSA's have been designated at the following locations to be effective January 16, 1986.

Burbank-Glendale-Pasadena Airport, CA
El Toro Marine Corps Air Station, CA
Greensboro-High Point-Winston-Salem Regional Airport, NC
James M. Cox Dayton International Airport, OH
Lubbock International Airport, TX

WASHINGTON HELICOPTER ROUTE CHART

A new Washington Helicopter Route Chart is available with a February 13 effective date. This chart is a joint FAA/DOD effort and is an updated version of the DOD chart of June 14, 1982.

Major helicopter and transition routes along with narrative descriptions are included. Pictorial symbols of prominent landmarks, tower frequencies, altitude changeover points, reporting points, and transponder codes are other features depicted on this chart. Further, this chart shows selected cultural features such as power transmission lines and prominent buildings which are depicted for landmark value only. The chart does not depict complete obstacle information due to the high concentration of objects in the area.

Military personnel may obtain copies from their appropriate authority. Civilians may obtain a free chart by writing:

THE EAA SUN 'n FUN FLY-IN

LAKELAND MUNICIPAL AIRPORT, FLORIDA

MARCH 16 - 22, 1986

In anticipation of the large number of aircraft operating to and from the Lakeland Municipal Airport, Florida, during the 1986 Fly-In, the following procedures are provided to enhance safety and minimize air traffic delays.

LAKELAND MUNICIPAL AIRPORT CLOSINGS
(and other general information)

°Lakeland Municipal Airport will be closed daily March 16 - 22, 1986, from 2:00 p.m. to 4:30 p.m., Eastern Standard Time, for Airshow. The Airshow operations area is from the surface to 10,000 feet MSL within a five (5) statute mile radius of Lakeland Municipal Airport, and will be used on the dates and time specified above.

°Arrival delays of up to one (1) hour can be expected daily, between 4:30 p.m. and 5:30 p.m.

°Student training flights are highly discouraged during this event. This includes student solo cross-country flights, touch-and-go landings, low approaches and practice instrument approaches.

°The ILS runway 5/23 will be shut down during the Fly-In.

°Runways 5/23 and 13/31 will be closed and so marked during this Event.

°Do not operate in the airport traffic area south of the airport without credentials received at hourly briefings held on the airport in the Sun 'n Fun area.

TEMPORARY FAA LAKELAND CONTROL TOWER

The Control Tower will be open and the control zone will be in effect:

MARCH 16 - 22, 1986 - 7:00 a.m. to 7:00 p.m., EST

Lakeland Frequencies:

Lakeland VOR - 116.0 MHz.
Lakeland ATIS - 124.2 MHz.
Lakeland Tower - 124.5 MHz. (if unable 119.8 MHz) 380.1 MHz.
Lakeland Ground Control - 121.4 MHz.

NOTE: ATC may assign 123.7 MHz., or 118.95 MHz., as appropriate.

VFR ARRIVALS TO LAKELAND MUNICIPAL AIRPORT

All aircraft must use the Sun 'n Fun Lake Parker arrival procedure (see graphic). When you are twenty (20) to thirty (30) miles from Lakeland listen to the ATIS 124.2 MHz., for landing and special information. When volume exceeds the airport's acceptance rate, VFR holding will be required prior to or over Lake Parker. As you approach Lake Parker (Lakeland VORTAC 040/6), turn your TRANSPONDER "OFF" MONITOR Lakeland Tower on 124.5 and fly westerly over the power plant smokestack with white strobe lights which is located at the north end of Lake Parker. Expect heavy air traffic, some without radios, in this area. All aircraft should maintain 100 m.p.h., at 1,000 feet MSL inbound from Lake Parker. Aircraft unable to slow to this speed should maintain 150 m.p.h. at 1,500 feet.

Controllers located on the ground at Lake Parker will contact you, using your aircraft "color" and "type" to provide sequencing and other arrival and traffic pattern information - they will contact you in the vicinity of the north power plant and may ask you to "rock the wings" as an acknowledgment for instructions.

IMPORTANT: REMAIN IN TRAIL to the airport - no side-by-side separation.

TRAFFIC PATTERN

All arriving traffic enter the airport traffic area only via the Sun 'n Fun Lake Parker arrival procedure as indicated above and on the attached graphic. Only left traffic for runway 9L or right traffic for runway 27R will be used with downwind leg entry close to the airport over Airport Road. NOTE: This runway is a narrow strip 75 feet wide which is usually a taxiway. DO NOT land on the main, wide, runway 9R/27L unless specifically instructed by the Control Tower. Use caution for other Special Events and Flyby aircraft which after special face-to-face briefings are authorized to use the main runway with opposite-direction base leg to final approach turns. All landing traffic must remain alert for possible radio or light signal wave-off from the Tower. Red smoke OR hand signals from controllers located near the approach end of the runway in use may also be used to signal wave-off. When landing on runway 9L DO NOT TOUCH DOWN until beyond the first taxiway at the marked threshold (4,500 feet remaining) which has been displaced because of tall trees off the approach end of the runway. Plan landing so as to clear the runway as soon as possible on a hard surface.

AFTER TOUCHDOWN

Aircraft landing on runway 9L, turn off to the left; on 27R, turn to the right. When landing on the narrow runway (9L or 27R) DO NOT TURN OFF TOWARD THE SOUTH. CAUTION: Remain on hard surface at all times unless specifically directed by the Tower or Flagman to do otherwise. Expeditious clearing of the runway is absolutely essential because of continuous arriving and departing aircraft behind you. Ground Controllers will direct you to the parking area.

VFR DEPARTURE

Before taxiing, monitor Lakeland ATIS on 124.2 MHz., for taxi information and follow Flagman's directions and other traffic to the advertised active runway. Radio-equipped aircraft should monitor Ground Control on 121.4 MHz., while taxiing, and contact the controller ONLY if you need further information. To expedite traffic, you will be directed for an intersection departure on runway 9 (5,000 feet remaining), or for the full length only on runway 27. The ATIS will inform you whether to call the Tower or watch the FAA controller at the runway for takeoff clearance. After departure, proceed straight out for three (3) miles before proceeding on course. Be very alert for numerous aircraft departing (particularly after 4:30 p.m.) and for special flight activity south and arrival traffic north. Monitor the Frequency given on the ATIS, but DO NOT CALL unless an EMERGENCY exists.

NONRADIO-EQUIPPED AIRCRAFT - "SPECIAL NOTICE"

All pilots flying an aircraft WITHOUT a radio into Lakeland shall follow the Sun 'n Fun-Lake Parker Arrival Procedures (see attached graphic). When approaching Lake Parker, be alert for other aircraft inbound to Lakeland and follow that traffic to the airport. Land ONLY on runway 9L or 27R. See the preceding paragraphs with emphasis on: ***VFR arrivals to Lakeland Municipal Airport***/***Traffic Pattern*** and ***After Touchdown***.

If RED SMOKE is being emitted near the approach end of the landing runway, or if a RED LIGHT is observed from the Control Tower located on the north side of the airport, nonradio-equipped aircraft are TO LEAVE the traffic pattern and REENTER over Lake Parker. Be extremely alert for numerous aircraft operating in the vicinity of Lakeland. If there is any possibility that you might be coming to Sun 'n Fun in an aircraft WITHOUT A RADIO, it is important that you place your - Name/Aircraft Type/Identification Number/Address, and the word "NONRADIO," on a postcard, and mail it to:

Sarasota ATC Tower, DOT/FAA,
P.O. Box 13065
Sarasota, FL., 33578

The receipt of the card will validate your Authorization to operate without a radio, excluding local flights which require a Briefing, while the temporary ATC Tower is in operation. The card also indicates that YOU HAVE READ AND UNDERSTAND ALL OF THE ABOVE PROCEDURES. It is suggested that you sign and fill in the following, and carry this "NONRADIO-EQUIPPED" procedure page with you while exercising this Authorization:

____
(Pilot's Signature)

____
(Date card mailed)

____
(Aircraft Identification)

Because of the temporary nature of the Control Tower, considerable delay may be encountered getting Authorization, by telephone, to operate without a radio.

VFR FLIGHT PLANS

Pilots are encouraged to file a Flight Plan. Flight Plans should be closed by radio with St. Petersburg FSS, transmit on 122.1 MHz., listen on the Lakeland VOR 116.0 MHz. If unable, call St. Petersburg FSS by telephone (local call - 682-3258), or, by interphones, which are located at Lakeland, and in the Sun 'n Fun area.

IFR TRAFFIC

Due to the expected increase in the volume of traffic generated by the Sun 'n Fun Fly-In, some delays may be encountered for IFR arrival and departing traffic. Be familiar with the Sun 'n Fun-Lake Parker Arrival and Departure Procedures (1986) that will be used by the temporary Control Tower at Lakeland.

IFR ARRIVALS

Be prepared to discontinue your approach and to enter a VFR traffic pattern for landing sequence. When the ceiling and visibility at Lakeland is reported at or above 3,000 feet and five (5) miles, expect a **vector to** the vicinity of Lake Parker for a visual approach following the published Sun 'n Fun-Lake Parker Arrival Procedures (see attached graphic). Be extremely alert for a high volume of traffic with a wide variance of performance characteristics operating in the vicinity of Lakeland.

IFR DEPARTURES

File your Flight Plan at least one (1) hour prior to proposed departure time. IFR Flight Plans which have not been used will be cancelled two (2) hours after the filed proposed departure time. Contact Lakeland Ground Control on 121.4 MHz., for your clearance. DO NOT TAXI until receiving your en route clearance. If you have not received initial departure instructions prior to reaching the runway, attempt to taxi your aircraft to a position where other VFR aircraft can pass you for departure. In any case, DO NOT accept the FAA Flagman's instructions to enter the runway or take off unless you have received a departure release by radio.

1000 ft. MSL
(130 kts. or less)

1500 ft. MSL
(over 130 kts.)

REMAIN CLEAR
DO NOT operate in the airport traffic area south of Runway 9/27 without current credentials received at hourly Briefings at Sun 'n Fun.

ARRIVALS

- Monitor ATIS 124.2 MHz. 15 miles out remain clear of the airport traffic area below 3000 ft. AGL within 5 miles en route to LAKE PARKER.
- All aircraft with radio contact Lakeland Tower on 124.5 MHz. at least 5 miles from LAKE PARKER.
- Remain in trail after LAKE PARKER.
- Be extremely alert for non-radio aircraft arriving from over LAKE PARKER.
- Runway 9R and 27L SHALL NOT be used unless specific clearance is received from TOWER.
- Remain on hard surfaces unless otherwise directed.
- GROUND CONTROL frequency 121.4MHz only as directed by the TOWER.

NO-RADIO AIRCRAFT must have prior Athorization. See SUN 'n Fun procedure ***Nonradio-equipped aircraft - "Special Notice"***

DEPARTURES

- Monitor ATIS 124.2 MHz. (After Airshow do not start engines until ATIS advises that the Airport is open)
- Follow Flagman for out of parking areas
- Monitor Ground Control 121.4
- Watch FAA Flagman for clearance onto the runway and for takeoff
- Fly straight out for 3 miles as shown on graphic above
- IFR departures contact Ground Control before you taxi for en route clearance
- IFR do not accept Flagman's clearance for takeoff unless a departure release has been received from Ground Control

ULTRALIGHT VEHICLES

Special Arrival and Departure Procedures have been developed (see graphic below) to allow for the arrival and departure of Ultralight vehicles at the Lakeland Municipal Airport in conjunction with the 1986 EAA Sun 'n Fun Fly-In.

> "These procedures are AUTHORIZED only from March 16 - 22, 1986, between Sunrise and 2:00 p.m., and from 4:30 p.m., until Sunset. The airport and Ultralight area closed daily from 2:00 p.m. to 4:30 p.m., during the Fly-In."

TO 5 miles South
FROM 5 miles South

- Enter and depart from the SOUTH only.
- DO NOT ENTER the area marked with Diagonal lines.
- Departing vehicles have the right-of-way.
- Remain at or below 500 feet.
- Determine direction of traffic before entry.
- DO NOT overfly houses-livestock-people, etc., closer than 500 ft. laterally.
- Use extreme caution when RED FLAGS are flying near the landing area.

Compliance with these procedures satisfies the authorization requirements of FAR 103.17. Any deviation from these procedures or authorized operating times will be subject to enforcement action by the FAA.

SPECIAL USE AIRSPACE
(Military Operations Area)

Effective March 16-22, 1986

1. Grande Low Temporary MOA, NM

   Boundaries. That airspace between R-5107A and R-5103B from lat. 32°16'00"N. to lat. 32°27'00"N.

   Altitudes. 500 feet AGL to and including 1,500 AGL excluding that airspace below 1,500 feet AGL over Oro Grande, NM.

   Times of use. 0830 MST to 1600 MST.

   Controlling agency. FAA, Albuquerque ARTCC, Albuquerque, NM

   Using agency. 49th Tactical Fighter Wing DOOS, Holloman Air Force Base, NM

2. Grande High Temporary MOA, NM

   Boundaries. That airspace between R-5107A and R-5103B from lat. 32°16'00"N. to lat. 32°27'00"N.

   Altitudes. 12,500 feet MSL to but not including FL 180.

   Times of use. 0830 MST to 1600 MST.

   Controlling agency. FAA, Albuquerque ARTCC, Albuquerque, NM

   Using agency. 49th Tactical Fighter Wing DOOS, Holloman Air Force Base, NM

MASTERS GOLF TOURNAMENT

SPECIAL TRAFFIC MANAGEMENT PROGRAM

AUGUSTA, GEORGIA

APRIL 9 through 14, 1986

In anticipation of the large number of aircraft traveling to and from the Augusta, Georgia, area during the Masters Golf Tournament, the following procedures will be used to enhance safety and minimize air traffic delays.

****TRAFFIC MANAGEMENT PROGRAM****

A Special Traffic Management Program will be in effect daily April 9, 1200-2359 UTC (0700-1900 local) through April 14. Atlanta Center will assign Controlled Departure Times (CDT) for unscheduled IFR flights arriving the Augusta, Georgia, area. CDT's will be assigned to departing IFR flights April 13, 1700 UTC to April 14, 0400 UTC (1200-2300 April 14. (Rain date April 14 1700 UTC to April 15, 0400 UTC 1200-2300 local April 14.)

CDT's can be obtained from any Flight Service Station (FSS) 4 hours but not more than 12 hours prior to proposed time of departure. Include CDT in remarks section of the flight plan filed with a flight service station.

Due to anticipated frequency congestion, Atlanta Center and Augusta Approach Control, except for emergency situations, will not accept air filed flight plans to/from the Augusta Area while this program is in effect. Airborne IFR flight plans filed with other facilities may experience extensive delays awaiting integration into the IFR system.

****OVERFLIGHTS AUGUSTA AREA****

Aircraft not landing in the Augusta area are requested to avoid overflight below 12,000 feet within the lateral limits of the August Terminal Radar Service Area (TRSA). IFR overflights can expect routings to avoid the Augusta area.

****AUGUSTA AREA****

For the purpose of this Special Traffic Management Program, the Augusta Area includes the following airports:

Augusta, Georgia	
Bush Field Airport	- AGS
Daniel Field Airport	- DNL
Thomson, Georgia	
Thomson-McDuffie County Airport	- 48J
Aiken, South Carolina	
Aiken Municipal Airport	- AIK

****TEMPORARY AIR TRAFFIC SERVICES****

The Federal Aviation Administration will operate a temporary airport traffic control tower and flight service station at Daniel Field Airport, Augusta, Georgia.

DATE/TIME OF OPERATION

April 9-12....................0800-2000 Local
April 13......................0800-2100 Local
April 14 (rain date)..........0800-2100 Local

FREQUENCIES

Daniel Tower	123.1 mHz
Ground Control	121.7 mHz
Savannah Radio	122.3 mHz

VFR aircraft are encouraged to contact Savannah Radio to activate and close VFR flight plans.

****VFR ARRIVALS****

Terminal Radar Service AREA (TRSA)
Stage III Radar Service

Bush Field Airport: Radar sequencing will be provided to all aircraft landing at Bush Field. Contact Augusta Approach Control on 126.8 mHz (170-349) or 119.15 mHz (350-169) 15-20 miles from Bush Field.

Other Augusta Area Airports: Radar service will be available to aircraft landing at other than Bush Field on a workload permitting basis. Contact Augusta Approach Control.

Pilots are urged to remain clear of the TRSA until clearance is received.

OFFSHORE TECHNOLOGY CONFERENCE

SPECIAL TRAFFIC MANAGEMENT PROGRAM

HOUSTON, TEXAS

MAY 5 THROUGH 9, 1986

In anticipation of the large number of aircraft traveling to and from Houston, Texas during the Offshore Technology Conference, the following procedures will be used to enhance safety and minimize air traffic delays at Houston Intercontinental (IAH) and William P. Hobby (HOU) Airports.

****TRAFFIC MANAGEMENT PROGRAM****

A Special Traffic Management Program will be in effect daily May 5 through 9, 1100-1659 UTC (0600-1159 local). Houston Center will assign Controlled Departure Times (CDT) for unscheduled IFR flights arriving Houston Intercontinental and William P. Hobby Airports.

CDT's may be obtained from any flight service station or by calling Houston Center (713) 230-5561 (IAH) or (713) 230-5566 (HOU) during the hours beginning Sunday May 4, 1300 - May 5 0300 UTC (0800-2200 local) and between 1000-0300 UTC (0500-2200 local) daily thereafter until 1659 UTC (1159 local) May 9. CDT's will not be assigned more than 24 hours in advance of proposed time of departure.

Adherence to CDT's within plus or minus 10 minutes is essential to the success of this program.

Except for emergency situations, Houston Center will not accept IFR flight plans from airborne aircraft while this program is in effect. Airborne IFR flight plans filed with other facilities may experience extensive delays awaiting integration into the IFR system.

****FLIGHT PLANS****

Flight plans should be filed with the nearest flight service station, after receiving a CDT and at least 4 hours prior to proposed time of departure. Include CDT in the remarks section of the flight plan. (Flight plans may be filed concurrently with CDT request made with flight service stations.)

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAMS AND ARRIVAL PROCEDURES PRIOR TO CONDUCTING FLIGHT.

TD 4.12/2:

FOREWORD

The primary references for changes to the National Airspace System (NAS) are Aeronautical Charts and Airport/Facility Directories (A/FD) published for the affected area(s). Ideally, most changes to the NAS that meet NOTAM criteria are known sufficiently in advance to allow publication in these publications. When this cannot be done, changes are carried in the Notices to Airman Class II publication, or as a last resort, on the Service A telecommunications system as a NOTAM D item.

NOTAM D information printed in this publication will not be included on the Service A system and will not be provided during pilot briefings unless specifically requested by the pilot.

National Flight Data Center (FDC) NOTAMs primarily reflect changes to Standard Instrument Approach Procedures (SIAPs), Flight Restrictions, and aeronautical chart revisions. The last FDC NOTAM included in this issue is indicated by number and date above. This information insures that subsequent FDC NOTAMs, issued after the cutoff date, can be identified.

The Class II publication contains information of a temporary nature, which is expected to remain for an extended period. This temporary information is carried until it expires or is cancelled. Data of a permanent nature is sometimes carried in the Class II publication as an interim step prior to publication on the appropriate charts or in the A/FD.

The Class II publication is issued every 14 days. The A/FD is published every 56 days. Data in the Class II publication that is current on the effective date of the next A/FD will be transferred to the A/FD and removed from the Class II publication.

Facilities are responsible for forwarding data to the National Flight Data Center (NFDC). Data, still current for the next available Class II publication date, will be published.

This publication is divided into two sections:

1. Section One contains information divided into four categories:

a. GENERAL
b. AIRWAYS
c. FLIGHT RESTRICTIONS
d. AIRPORTS / FACILITIES / PROCEDURAL NOTAMS

The first subsection is listed in descending FDC NOTAM numerical order. The second and third subsections are listed by state. The fourth subsection is ordered by state, city, and airport name.

2. The second section contains special notices that are too long or that concern a wide or unspecified geographical area (which may overlap several states) and are not suitable for inclusion in the first section.

. The content of these notices vary widely and are included because of their significant impact on flight safety.

NOTES

1. All times are indicated as UTC or local. During periods of Daylight Savings Time, effective hours in local time will be one hour earlier than shown. All states observe Daylight Savings Time except Arizona, that portion of Indiana in the Eastern Time Zone, Puerto Rico, and the Virgin Islands.

2. (|) Vertical line items indicate new information.

FDC NOTAM LEGEND

Code	Explanation
5/103	Accountability number assigned to the message originator.
FI/T	Flight information of a temporary nature.
FI/P	Flight information of a permanent nature.

FDC 6/331 FI/P CHANGE US GOVT CHARTS, ENROUTE LOW ALTITUDE /L-20 PANEL G/DATED 16 JAN 1986, R6002 CHANGE TIME OF USE TO .... INTERMITTENT 0800-2400 LCL MON-FRI, 0800-1800 LCL SAT AND OTHER TIMES BY NOTAM AT LEAST 6 HOURS IN ADVANCE.

FDC 6/231 FI/P CORRECT J.S. GOVT HAWAIIAN ISLAND SECTIONAL CHART 33RD EDITION DTD 21 NOV 85, CHANGE HONOLULU VORTAC /HNL/FREQ 115.3 CHANNEL 100 TO FREQ 114.8 CHANNEL 095X.

FDC 6/201 FI/P CORRECT U.S. GOVT WORLD AERONAUTICAL CHART CG21, 18TH EDITION DTD OCT 24, 1985, CHANGED HARRIS VORTAC /HRS/ FREQ 111.6 CHANNEL 053 TO FREQ 109.8 CHANNEL 035.

FDC 6/89 OMEGA STATION F ARGENTINA WILL BE OFF AIR FROM MARCH 101200Z-171200Z AND FROM MARCH 17TH-24TH 1200-2100Z DAILY.

FDC 5/2808 AUTOMATED VOICE AIRPORT RESERVATION SYSTEM../AVARS/. IN ORDER TO IMPROVE THE AVARS CAPACITY THE FAA HAS INSTALLED TWO ADDITIONAL NON-TOLL FREE NUMBERS..617-275-4037/8. EFFECTIVE NOVEMBER 1 1985 TWO ADDITIONAL TOLL FREE LINES WILL BE AVAILABLE TO BE PART OF 1-800-FAA-1212 NUMBER. FAA PLANS TO CONTINUE THE DUAL /ARO/SYSTEM USING THE AUTOMATED SYSTEM ON 1-800-FAA-1212 AND THE MANUAL ARO SYSTEM WITH NEW YORK 718-632-7808/CHICAGO 312-283-2575 AND WASHINGTON DC 202-426-8347 UNTIL FURTHER NOTICE. IN AREAS WHERE TOUCH TONE PHONE SYSTEMS ARE NOT AVAILABLE USERS MAY EITHER CONTACT THE NEAREST FAA FLIGHT SERVICE STATION OR THE /ARO/ AT THE NUMBERS LISTED ABOVE AND REQUEST A RESERVATION. USERS DEPARTING A TRANS-ATLANTIC AIRPORT FOR ARRIVAL TO A HIGH DENSITY AIRPORT SHOULD CONTINUE TO USE THE PROCEDURES OUTLINED IN ADVISORY CIRCULAR AC 90-43F PARA 8 DATED APRIL 22 1985 WHICH STATES CONTACT THE NEAREST FLIGHT SERVICE STATION.

FDC 5/2183 FI/P MTR CORRECT IR-501 MILITARY TRAINING ROUTE/POINT AJ. CHANGE FAC/RAD/DIST POINT AJ TO GLD 354/35.

FDC 5/2130........SPECIAL NOTICE.........INTERNATIONAL FLIGHT PLAN FORM........INSTRUCTIONS FOR USING FAA FORM 7233-4. ICAO DOCUMENT 4444 AMENDMENT 6 EFFECTIVE NOVEMBER 21 1985 SPECIFIES SEVERAL CHANGES IN ICAO INTERNATIONAL FLIGHT PLAN FORMAT. FAA WILL ACCEPT THE NEW ICAO FORMAT EXCEPT AIRCRAFT SPEED/ALTITUDE FILED IN METRIC TERMS. THEREFORE TO COMPLY AS CLOSELY AS POSSIBLE WITH AMENDMENT 6 THE FOLLOWING ADDITIONAL PROCEDURES WILL APPLY BEGINNING NOVEMBER 21 WHEN USING FAA FORM 7233-4.........1. FAA FORM 7233-4, ITEM 13, HAS A SPACE FOR FIR BOUNDARIES AND ESTIMATED TIMES. FAA REQUIRES FILED FIR BOUNDARIES AND ESTIMATED TIMES, HOWEVER, PUT THAT INFORMATION IN ITEM 18, OTHER INFORMATION AS SPECIFIED IN ICAO FORMAT.......2. CONCERNING FAA FORM 7233-4, ITEM 15, THE U.S. AIR TRAFFIC SERVICE DOES NOT ACCEPT AIRCRAFT SPEED/ALTITUDE FILED IN METRIC TERMS........3. IN ITEM 17, IN THE SECTION LABELED ETA, INSTEAD PUT TOTAL ESTIMATED ELASPED TIME/TOTAL EET/........THE PRESENT SUPPLY OF FAA FORM 7233-4 WILL BE USED UNTIL EXHAUSTED AND REPLACED BY A NEW REVISED FAA INTERNATIONAL FLIGHT PLAN FORM.....DETAILED FAA POLICY, EXPLANATION OF CHANGES, DEFINITIONS, AND RESPONSIBILITIES CONCERNING THESE ICAO FLIGHT PLAN FORMAT CHANGES WILL BE ISSUED TO FAA AIR TRAFFIC PERSONNEL IN THE NATIONAL HEADQUARTERS DIRECTIVE NEAR THE END OF SEPTEMBER.

FDC 5/594 AIRPORT RESERVATION OFFICE/ARO/OPERATIONS... EFF APR 1, 1985...THE FOLLOWING GUIDELINES SHALL BE IN EFFECT... /ARO/WILL ACCEPT RSVNS FOR WASHINGTON NATIONAL AIRPORT /DCA, JOHN F. KENNEDY INTL ARPT /JFK, LA GUARDIA ARPT/LGA, AND CHICAGO O HARE INTL ARPT /ORD BEGINNING 48 HRS PRIOR TO THE PROPOSED TIME OF OPERATION AT THE AFFECTED ARPT. E.G REQ FOR 11 A.M. OPERATION ON THURSDAY WILL BE ACCEPTED STARTING 11 A.M. ON THE PRECEDING TUESDAY. AN EXCEPTION TO THE 48 HR LIMITATION IS MADE FOR WEEKENDS TO RECOGNIZE NORMAL BUSINESS HOURS. A RSVN REQ FOR AN IFR OPERATION ON MONDAY WILL BE ACCEPTED ON THE PREVIOUS THURSDAY STARTING AT THE PROPOSED HR OF OPERATION. REQUESTS FOR IFR OPERATION ON TUESDAY WILL BE ACCEPTED ON THE PREVIOUS FRIDAY STARTING AT THE PROPOSED HR OF OPERATION. E.G. REQ FOR 11 A.M. RSVN ON TUESDAY WOULD BE ACCEPTED BEGINNING 11 A.M. ON FRIDAY. IF THE PREVIOUS FRIDAY IS AN OBSERVED HOLIDAY THE PROCEDURE WILL BE IN EFFECT ON THURSDAY. A MAXIMUM OF TWO RSVNS PER PHONE CALL WILL BE ACCEPTED. E.G. A PILOT MAY REQ A RSVN FOR ARRIVAL AND DEPARTURE DURING THE SAME PHONE CALL PROVIDING BOTH FALL ON THE SAME CALENDAR DAY. E.G. A RSVN REQ FOR 11 A.M. ARRIVAL ON FRIDAY AND 4 P.M. DEPARTURE ON THE SAME DAY MAY BE MADE BEGINNING AT 11 A.M. ON WEDNESDAY.

FDC 4/3277 NOTAM /D/REGARDING RWY SNOW CONDITIONS AND BRAKING ACTION REPORTS FOR CANADIAN AIRPORTS WILL NO LONGER BE ENTERED INTO THE DOMESTIC NOTAM SYSTEM ON SERVICE A BY NFDC. CONTACT THE ASSOCIATED CANADIAN FLIGHT SERVICE STATION FOR THESE REPORTS.

FDC 4/1728 FDC U.S. NOTAM OFFICE POLICY ON FDC NOTAM STORAGE IN CONSOLIDATED NOTAM SYSTEM /CNS/DATA BASE/. ALL CURRENT FDC NOTAMS ARE STORED AND AVAILABLE UPON REQUEST. FDC NOTAMS WHICH ARE STRAIGHT CANCELLATIONS ARE STORED FOR THREE /3/ DAYS. BASED ON COMPUTER DEMANDS SIGNIFICANT TIME DELAYS ON RETRIEVALS CAN BE EXPECTED. NOTE...REPEATED REQUESTS WILL FURTHER COMPOUND DELAYS. THEREFORE FSS AND USER GROUPS ARE ADVISED TO COLLECT AND STORE REQUIRED FDC NOTAM/S ON INITIAL SERVICE /A/ DISTRIBUTION SUPPLEMENTED BY CLASS 2 NOTAM PUBLICATION.

HAZARDOUS INFLIGHT WEATHER ADVISORY SERVICE (HIWAS)

HIWAS is a national program for broadcasting hazardous weather information (SIGMET's, convective SIGMET's, Center Weather Advisories (CWA), AIRMET's, and urgent PIREP's) on a continuous basis over selected VOR's. The program is operational in the Jacksonville, Miami, and Houston Air Route Traffic Control Center (ARTCC) areas. The chart on the following page identifies the current broadcast outlet locations and frequencies. Frequencies shown in the Atlanta ARTCC area are for planning purposes only. HIWAS will be expanded on an ARTCC by ARTCC basis.

Pilots should be aware that:

* Flight service stations broadcast information on hazardous weather not yet covered by an advisory and make an announcement on their frequencies that new HIWAS information is available.

* Controllers in ARTCC's and air traffic control terminals announce updates to HIWAS information on all appropriate frequencies.

* Controllers and specialists will not routinely broadcast SIGMET's, convective SIGMET's, CWA's, AIRMET's, and urgent PIREP's in the commissioned HIWAS areas.

User comments regarding the effectiveness of the HIWAS program and any proposed revision to HIWAS procedures are solicited.

Mail comments to:

Department of Transportation
Federal Aviation Administration
ATTN: ATO-360
800 Independence Ave. S.W.
Washington, DC 20591

Note: For further information on the HIWAS program, refer to the Airman's Information Manual (AIM) and Airport/Facility Directory (AFD). Operational sites are published in the AFD under radio aids to navigation.

The Interim Voice Response System

The Federal Aviation Administration has leased an Interim Voice Response System (IVRS) that enables pilots throughout the country to obtain selected weather information directly from a computer. The pilot enters requests for specific weather reports for locations of interest by depressing the keys on a Touchtone (R) telephone or keypad adapter on non-Touchtone (R) telephones. The computer will "listen" to telephone signalling tones and will respond with a spoken message derived from stored human speech.

The IVRS is a national system consisting of a network of 16 locations with "speaking" computers, and prepaid telephone access from an additional 8. The locations and telephone numbers are listed below. Call the telephone number nearest you at any time day or night, using any standard 12-key touch-tone phone. For long distance numbers outside your area code, call 1 plus Area Code and number. For assistance or trouble reporting call toll free 1-800-FOR-IVRS at any time.

IVRS Weather Products

1. SEVERE WEATHER FORECAST ALERTS (AWW) inform pilots of forthcoming severe thunderstorms or tornadoes. They are available automatically when you enter a location identifier (LOCID) or TWEB route number for a state in which a Severe Weather Forecast Alert is in effect.

   ISSUED: As necessary.

2. CONVECTIVE SIGMETS (WST) concern thunderstorms and related phenomena. They are available automatically when you enter a LOCID or TWEB route number for a state in which a Convective SIGMET is in effect.

   ISSUED: Hourly at 55 minutes past the hour and as needed.

3. SURFACE OBSERVATIONS (SA) provide observed surface weather conditions for the LOCIDs entered.

   ISSUED: Hourly on the hour and as needed.

4. TERMINAL FORECASTS (FT) provide a forecast of weather conditions for the LOCIDs entered.

   ISSUED: Approximately 1000, 1500, and 2200 GMT and as necessary.

5. WINDS ALOFT FORECASTS (GF) describe winds and temperatures for the LOCIDs entered. You specify the altitude and number of hours into the future and receive winds and temperatures at your requested altitude plus an altitude above and one below the requested altitude.

   ISSUED: Unscheduled, but typically at 0400 and 1600 GMT.

6. TWEB ROUTE FORECASTS (TR) provide a forecast of weather conditions within a 50-mile-wide corridor along a route and within a 50-mile radius for local vicinity forecasts.

   ISSUED: Approximately 1200, 1800, and 2400 GMT and as needed.

How to Use IVRS

The instructions on how to use IVRS are contained in A Pilot's Guide to IVRS published by the Federal Aviation Administration. You may obtain a copy from any FAA Flight Standards District Office or Flight Service Station.

COLORADO SKI COUNTRY AIRPORTS

SPECIAL AIR TRAFFIC MANAGEMENT PROGRAM

Aspen, Colorado
   Aspen-Pitkin County/Sardy Field Airport (ASE)

Eagle, Colorado
   Eagle County Airport (EGE)

Gunnison, Colorado
   Gunnison Country Airport (GUC)

In anticipation of the large number of aircraft operating into the Aspen-Pitkin County/Sardy Field, Eagle County, and Gunnison County airports during ski season, the following procedures have been implemented to enhance safety and minimize traffic delays during the period January 16 through April 6, 1986.

IFR ARRIVALS

Due to the additional volume of unscheduled IFR traffic expected to be generated within the Denver Center airspace, a special traffic management program will be in effect through April 6, 1986.

TRAFFIC MANAGEMENT PROGRAM

Unscheduled IFR flights operating into a Colorado Ski Country Airport should file an appropriate preferred route during the hours 1400 UTC and 0300 UTC (0700 MST-2000 MST) daily.

To Aspen, Colorado (ASE)

Route 1....FROM OVER FIXES BETWEEN DEN CLOCKWISE TO COS: FILE VIA DEN..DBL..ASE

Route 2....FROM OVER FIXES BETWEEN COS CLOCKWISE TO GUC: FILE VIA GUC..DBL..ASE

Route 3....FROM OVER FIXES BETWEEN GUC CLOCKWISE TO DEN: FILE VIA DBL..ASE

To Eagle, Colorado (EGE)

Route 1....FROM OVER FIXES BETWEEN CHE
CLOCKWISE TO IOC: FILE VIA
RLG.RLG189R.STUPE..EGE

Route 2....FROM OVER FIXES BETWEEN IOC
CLOCKWISE TO FMN: FILE VIA
GUC.V421.HAMPS..EGE

Route 3....FROM OVER FIXES BETWEEN FMN
CLOCKWISE TO PUC: FILE VIA
JNC.V134.DBL.V421.HAMPS..EGE

Route 4....FROM OVER FIXES BETWEEN PUC
CLOCKWISE TO CHE: FILE VIA
EKR.V200.RLG.RLG189R.STUPE..EGE

To Gunnison, Colorado (GUC)

VIA AIRWAYS

EXCEPTION: TRAFFIC WILL NOT BE ROUTED DEN J10/J128 GUC

ADVISE ATC OF ALTERNATE AIRPORT PRIOR TO STARTING APPROACH.

Additional routing may be assigned by ATC based on weather and traffic density.

Pilots destined for ski country airports are encouraged to plan their arrivals Monday through Thursday to avoid extensive arrival delays. Extensive arrival delays can be anticipated between the hours of 1900 UTC and 0100 UTC (1200 MST-1800 MST) Friday, Saturday and Sunday.

Pilots may obtain additional traffic management information from the nearest flight service station (FSS).

FSS's can obtain traffic management information from Denver Center Traffic Management Unit, telephone FTS 323-4246 or commercial 303-651-4246.

AMENDED 1/16/86

COORDINATED UNIVERSAL TIME (UTC)

Coordinated Universal Time (UTC) has replaced Greenwich Mean Time (GMT) as the accepted international standard for clock time. UTC is the basis for civil time in most countries of the world rather than GMT. The Federal Aviation Administration has concurred with this change and advised the International Civil Aviation Organization that the conversion would become effective January 16, 1986. The letter "Z" will be retained to indicate "UTC". All United States Government Aeronautical charts and publications that are effective on January 16, 1986, will indicate UTC vice GMT.

AIRPORT RADAR SERVICE AREAS (ARSA)

The National Airspace Review Terminal Airspace Task Group 1-2.2 recommended the ARSA Program as a replacement for the existing Terminal Radar Service Area Program and the FAA has adopted that recommendation. ARSA designations have been made, and effective dates established, for the locations listed below. The following is a summary of the pilot requirements and the ATC procedures for ARSA's. Graphic depictions of each ARSA are also included.

Unless otherwise authorized or required by ATC, the following provisions apply to aircraft operating within an ARSA:

1. Aircraft approaching that would penetrate the ARSA must establish two-way radio communications with ATC prior to entering the ARSA and maintain that communication while operating within the ARSA.
2. Aircraft departing the primary airport within the ARSA must establish two-way communications with ATC prior to departure and maintain that communication while operating within the ARSA. Aircraft departing a satellite airport within the ARSA must contact ATC as soon as practicable after takeoff.
3. Except in an emergency, all operations must be in compliance with ATC clearances and instructions.
4. All arrivals and departures within the ARSA must be in compliance with FAA arrival and departure traffic patterns.
5. Ultralight vehicles and parachute operations may not be conducted within the ARSA except under the terms of an ATC authorization.
6. NOTAM's pertaining to flight within the ARSA must be reviewed as a part of preflight action required by FAR 91.5.

Within ARSA's, ATC will provide the following services:

1. Radar sequencing of all arrivals.
2. Standard separation between all instrument flight rules (IFR) flights.
3. Traffic advisories and safety advisories to all aircraft.
4. Resolve any potential conflict between an aircraft operating IFR and an aircraft operating under visual flight rules by application of conflict resolution procedures.

ARSA's have been designated at the following locations to be effective January 16, 1986.

Burbank-Glendale-Pasadena Airport, CA
El Toro Marine Corps Air Station, CA
Greensboro-High Point-Winston-Salem Regional Airport, NC
James M. Cox Dayton International Airport, OH
Lubbock International Airport, TX
March Air Force Base, CA
Norton Air Force Base, CA

WASHINGTON HELICOPTER ROUTE CHART

A new Washington Helicopter Route Chart is available with a February 13 effective date. This chart is a joint FAA/DOD effort and is an updated version of the DOD chart of June 14, 1982.

Major helicopter and transition routes along with narrative descriptions are included. Pictorial symbols of prominent landmarks, tower frequencies, altitude changeover points, reporting points, and transponder codes are other features depicted on this chart. Further, this chart shows selected cultural features such as power transmission lines and prominent buildings which are depicted for landmark value only. The chart does not depict complete obstacle information due to the high concentration of objects in the area.

Military personnel may obtain copies from their appropriate authority. Civilians may obtain a free chart by writing:

MASTERS GOLF TOURNAMENT

SPECIAL TRAFFIC MANAGEMENT PROGRAM

AUGUSTA, GEORGIA

APRIL 9 through 14, 1986

In anticipation of the large number of aircraft traveling to and from the Augusta, Georgia, area during the Masters Golf Tournament, the following procedures will be used to enhance safety and minimize air traffic delays.

****TRAFFIC MANAGEMENT PROGRAM****

A Special Traffic Management Program will be in effect daily April 9, 1200-2359 UTC (0700-1900 local) through April 14. Atlanta Center will assign Controlled Departure Times (CDT) for unscheduled IFR flights arriving the Augusta, Georgia, area. CDT's will be assigned to departing IFR flights April 13, 1700 UTC to April 14, 0400 UTC (1200-2300 local April 13). (Rain date April 14 1700 UTC to April 15, 0400 UTC 1200-2300 local April 14.)

CDT's can be obtained from any Flight Service Station (FSS) 4 hours but not more than 12 hours prior to proposed time of departure. Include CDT in remarks section of the flight plan filed with a flight service station.

Due to anticipated frequency congestion, Atlanta Center and Augusta Approach Control, except for emergency situations, will not accept air filed flight plans to/from the Augusta Area while this program is in effect. Airborne IFR flight plans filed with other facilities may experience extensive delays awaiting integration into the IFR system.

****OVERFLIGHTS AUGUSTA AREA****

Aircraft not landing in the Augusta area are requested to avoid overflight below 12,000 feet within the lateral limits of the August Terminal Radar Service Area (TRSA). IFR overflights can expect routings to avoid the Augusta area.

Revised 3/17/86

****AUGUSTA AREA****

For the purpose of this Special Traffic Management Program, the Augusta Area includes the following airports:

Augusta, Georgia Bush Field Airport	AGS
Daniel Field Airport	DNL
Thomson, Georgia Thomson-McDuffie County Airport	48J
Aiken, South Carolina Aiken Municipal Airport	AIK

****TEMPORARY AIR TRAFFIC SERVICES****

The Federal Aviation Administration will operate a temporary airport traffic control tower and flight service station at Daniel Field Airport, Augusta, Georgia.

DATE/TIME OF OPERATION

April 9-12	0800-2000 Local
April 13	0800-2100 Local
April 14 (rain date)	0800-2100 Local

FREQUENCIES

Daniel Tower	123.1 mHz
Ground Control	121.7 mHz
Savannah Radio	122.3 mHz

VFR aircraft are encouraged to contact Savannah Radio to activate and close VFR flight plans.

****VFR ARRIVALS****

Terminal Radar Service AREA (TRSA)
Stage III Radar Service

Bush Field Airport: Radar sequencing will be provided to all aircraft landing at Bush Field. Contact Augusta Approach Control on 126.8 mHz (170-349) or 119.15 mHz (350-169) 15-20 miles from Bush Field.

Other Augusta Area Airports: Radar service will be available to aircraft landing at other than Bush Field on a workload permitting basis. Contact Augusta Approach Control.

Pilots are urged to remain clear of the TRSA until clearance is received.

****FLIGHT PLANS****

Pilots planning to arrive and depart the Augusta area on the same day are encouraged to file the return flight plan with their local FSS during the initial briefing.

****DEPARTURES****

PREFLIGHT BRIEFING AND FLIGHT PLANNING

Preflight briefing and flight planning services will be available in the Augusta Aviation Building at Daniel Field. Pilots may close and file flight plans in person at Daniel Field or Bush Field. Pilots landing at Thomson-McDuffie County Airport may call Savannah Flight Service Station by telephone on the published toll free number. Pilots landing at Aiken Municipal Airport may call Florence Flight Service Station by telephone on the published toll free number.

IFR/VFR DEPARTURES

BUSH FIELD AND DANIEL FIELD AIRPORTS

DO NOT TAXI FOR TAKEOFF UNTIL, taxi instructions and if appropriate IFR clearance are received. For Stage III Radar Service, advise Ground Control of: Aircraft identification, type aircraft, if transponder equipped, direction of flight and/or destination, and initial cursing altitude.

DO NOT CALL THE TOWER FOR TAKEOFF UNTIL in the number one position to take the active runway.

DANIEL FIELD AIRPORT ONLY

DO NOT CALL GROUND CONTROL FOR TAXI INSTRUCTIONS UNTIL IN THE NUMBER 1 POSITION TO ENTER A TAXIWAY FROM THE PARKING RAMP AREA.

****RESTRICTED AREA ADVISORY****

Pilots should be aware of the existence of Restricted Area (R-3004) to the southwest of Augusta VOR and plan their flight accordingly. This area is intermittently activated by NOTAM. Pilots are cautioned that penetration of Restricted Areas without authorization from the using or controlling agency may be extremely hazardous.

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAMS PRIOR TO CONDUCTING FLIGHT.

OFFSHORE TECHNOLOGY CONFERENCE

SPECIAL TRAFFIC MANAGEMENT PROGRAM

HOUSTON, TEXAS

MAY 5 THROUGH 9, 1986

In anticipation of the large number of aircraft traveling to and from Houston, Texas during the Offshore Technology Conference, the following procedures will be used to enhance safety and minimize air traffic delays at Houston Intercontinental (IAH) and William P. Hobby (HOU) Airports.

****TRAFFIC MANAGEMENT PROGRAM****

A Special Traffic Management Program will be in effect daily May 5 through 9, 1100-1659 UTC (0600-1159 local). Houston Center will assign Controlled Departure Times (CDT) for unscheduled IFR flights arriving Houston Intercontinental and William P. Hobby Airports.

CDT's may be obtained from any flight service station or by calling Houston Center (713) 230-5561 (IAH) or (713) 230-5566 (HOU) during the hours beginning Sunday May 4, 1300 - May 5 0300 UTC (0800-2200 local) and between 1000-0300 UTC (0500-2200 local) daily thereafter until 1659 UTC (1159 local) May 9. CDT's will not be assigned more than 24 hours in advance of proposed time of departure.

Adherence to CDT's within plus or minus 10 minutes is essential to the success of this program.

Except for emergency situations, Houston Center will not accept IFR flight plans from airborne aircraft while this program is in effect. Airborne IFR flight plans filed with other facilities may experience extensive delays awaiting integration into the IFR system.

****FLIGHT PLANS****

Flight plans should be filed with the nearest flight service station, after receiving a CDT and at least 4 hours prior to proposed time of departure. Include CDT in the remarks section of the flight plan. (Flight plans may be filed concurrently with CDT request made with flight service stations.)

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAMS AND ARRIVAL PROCEDURES PRIOR TO CONDUCTING FLIGHT.

Air Traffic Control Services at Hilton Head Arpt, SC

Family Circle Tennis Tournament and Heritage Golf Classic
April 7-20, 1986

The Federal Aviation Administration will provide temporary Air Traffic Control Services at the Hilton Head, South Carolina Airport during the Family Circle Tennis Tournament and the Heritage Golf Classic. The tower will be in operation April 7-20, from 9:00 a.m. EST to 7:00 p.m. EST daily. On April 13 and April 20 hours of operation will be 9:00 a.m. EST to 8:00 p.m. EST. Frequencies are: Tower - 126.7, Ground - 121.6, Radio Call - Hilton Head Tower.

Washington, D.C. 20402

TD4.12/2:

FOREWORD

The primary references for changes to the National Airspace System (NAS) are Aeronautical Charts and Airport/Facility Directories (A/FD) published for the affected area(s). Ideally, most changes to the NAS that meet NOTAM criteria are known sufficiently in advance to allow publication in these publications. When this cannot be done, changes are carried in the Notices to Airman Class II publication, or as a last resort, on the Service A telecommunications system as a NOTAM D item.

NOTAM D information printed in this publication will not be included on the Service A system and will not be provided during pilot briefings unless specifically requested by the pilot.

National Flight Data Center (FDC) NOTAMs primarily reflect changes to Standard Instrument Approach Procedures (SIAPs), Flight Restrictions, and aeronautical chart revisions. The last FDC NOTAM included in this issue is indicated by number and date above. This information insures that subsequent FDC NOTAMs, issued after the cutoff date, can be identified.

The Class II publication contains information of a temporary nature, which is expected to remain for an extended period. This temporary information is carried until it expires or is cancelled. Data of a permanent nature is sometimes carried in the Class II publication as an interim step prior to publication on the appropriate charts or in the A/FD.

The Class II publication is issued every 14 days. The A/FD is published every 56 days. Data in the Class II publication that is current on the effective date of the next A/FD will be transferred to the A/FD and removed from the Class II publication.

Facilities are responsible for forwarding data to the National Flight Data Center (NFDC). Data, still current for the next available Class II publication date, will be published.

This publication is divided into two sections:

1. Section One contains information divided into four categories:

   a. GENERAL

   b. AIRWAYS

   c. FLIGHT RESTRICTIONS

   d. AIRPORTS / FACILITIES / PROCEDURAL NOTAMS

   The first subsection is listed in descending FDC NOTAM numerical order. The second and third subsections are listed by state. The fourth subsection is ordered by state, city, and airport name.

2. The second section contains special notices that are too long or that concern a wide or unspecified geographical area (which may overlap several states) and are not suitable for inclusion in the first section.

The content of these notices vary widely and are included because of their significant impact on flight safety.

NOTES

1. All times are indicated as UTC or local. During periods of Daylight Savings Time, effective hours in local time will be one hour earlier than shown. All states observe Daylight Savings Time except Arizona, that portion of Indiana in the Eastern Time Zone, Puerto Rico, and the Virgin Islands.

2. (|) Vertical line items indicate new information.

FDC NOTAM LEGEND

Code	Explanation
5/103	Accountability number assigned to the message originator.
FI/T	Flight information of a temporary nature.
FI/P	Flight information of a permanent nature.

FDC 6/331 FI/P CHANGE US GOVT CHARTS, ENROUTE LOW ALTITUDE /L-20 PANEL G/DATED 16 JAN 1986. R6002 CHANGE TIME OF USE TO ..... INTERMITTENT 0600-2400 LCL MON-FRI, 0800-1600 LCL SAT AND OTHER TIMES BY NOTAM AT LEAST 8 HOURS IN ADVANCE.

FDC 6/231 FI/P CORRECT U.S. GOVT HAWAIIAN ISLAND SECTIONAL CHART 33RD EDITION DTD 21 NOV 85. CHANGE HONOLULU VORTAC /HNL/FREQ 115.3 CHANNEL 100 TO FREQ 114.8 CHANNEL 095X

FDC 6/201 FI/P CORRECT U.S. GOVT WORLD AERONAUTICAL CHART CG21, 16TH EDITION DTD OCT 24, 1985. CHANGED HARRIS VORTAC /HRS/ FREQ 111.6 CHANNEL 053 TO FREQ 109.8 CHANNEL 035.

FDC 5/2508 AUTOMATED VOICE AIRPORT RESERVATION SYSTEM. /AVARS/. IN ORDER TO IMPROVE THE AVARS CAPACITY THE FAA HAS INSTALLED TWO ADDITIONAL NON-TOLL FREE NUMBERS..617-275-4837/8.. EFFECTIVE NOVEMBER 1 1985 TWO ADDITIONAL TOLL FREE LINES WILL BE AVAILABLE TO BE PART OF 1-800-FAA-1212 NUMBER. FAA PLANS TO CONTINUE THE DUAL /ARO/SYSTEM USING THE AUTOMATED SYSTEM ON 1-800-FAA-1212 AND THE MANUAL ARO SYSTEM WITH NEW YORK 718-632-7806/CHICAGO 312-253-2575 AND WASHINGTON DC 202-426-9347 UNTIL FURTHER NOTICE. IN AREAS WHERE TOUCH TONE PHONE SYSTEMS ARE NOT AVAILABLE USERS MAY EITHER CONTACT THE NEAREST FAA FLIGHT SERVICE STATION OR THE /ARO/ AT THE NUMBERS LISTED ABOVE AND REQUEST A RESERVATION. USERS DEPARTING A TRANS-ATLANTIC AIRPORT FOR ARRIVAL TO A HIGH DENSITY AIRPORT SHOULD CONTINUE TO USE THE PROCEDURES OUTLINED IN ADVISORY CIRCULAR AC 90-43F PARA 5 DATED APRIL 22 1985 WHICH STATES CONTACT THE NEAREST FLIGHT SERVICE STATION.

FDC 5/2193 FI/P MTR CORRECT IR-501 MILITARY TRAINING ROUTE/POINT AJ. CHANGE FAC/RAD/DIST POINT AJ TO GLD 354/35.

FDC 5/2130........SPECIAL NOTICE.........INTERNATIONAL FLIGHT PLAN FORM..........INSTRUCTIONS FOR USING FAA FORM 7233-4. ICAO DOCUMENT 4444 AMENDMENT 6 EFFECTIVE NOVEMBER 21 1985 SPECIFIES SEVERAL CHANGES IN ICAO INTERNATIONAL FLIGHT PLAN FORMAT. FAA WILL ACCEPT THE NEW ICAO FORMAT EXCEPT AIRCRAFT SPEED/ALTITUDE FILED IN METRIC TERMS. THEREFORE TO COMPLY AS CLOSELY AS POSSIBLE WITH AMENDMENT 6 THE FOLLOWING ADDITIONAL PROCEDURES WILL APPLY BEGINNING NOVEMBER 21 WHEN USING FAA FORM 7233-4..........1. FAA FORM 7233-4, ITEM 13, HAS A SPACE FOR FIR BOUNDARIES AND ESTIMATED TIMES. FAA REQUIRES FILED FIR BOUNDARIES AND ESTIMATED TIMES, HOWEVER, PUT THAT INFORMATION IN ITEM 18, OTHER INFORMATION AS SPECIFIED IN ICAO FORMAT.......2. CONCERNING FAA FORM 7233-4, ITEM 15, THE U.S. AIR TRAFFIC SERVICE DOES NOT ACCEPT AIRCRAFT SPEED/ALTITUDE FILED IN METRIC TERMS.......3. IN ITEM 17, IN THE SECTION LABELED ETA, INSTEAD PUT TOTAL ESTIMATED ELASPED TIME/TOTAL EET/.......THE PRESENT SUPPLY OF FAA FORM 7233-4 WILL BE USED UNTIL EXHAUSTED AND REPLACED BY A NEW REVISED FAA INTERNATIONAL FLIGHT PLAN FORM.......DETAILED FAA POLICY, EXPLANATION OF CHANGES, DEFINITIONS, AND RESPONSIBILITIES CONCERNING THESE ICAO FLIGHT PLAN FORMAT CHANGES WILL BE ISSUED TO FAA AIR TRAFFIC PERSONNEL IN THE NATIONAL HEADQUARTERS DIRECTIVE NEAR THE END OF SEPTEMBER.

FDC 5/594 AIRPORT RESERVATION OFFICE/ARO/OPERATIONS.... EFF APR 1, 1985... THE FOLLOWING GUIDELINES SHALL BE IN EFFECT.... /ARO/WILL ACCEPT RSVNS FOR WASHINGTON NATIONAL AIRPORT /DCA, JOHN F. KENNEDY INTL ARPT /JFK, LA GUARDIA ARPT/LGA, AND CHICAGO O HARE INTL ARPT /ORD BEGINNING 48 HRS PRIOR TO THE PROPOSED TIME OF OPERATION AT THE AFFECTED ARPT. E.G REQ FOR 11 A.M. OPERATION ON THURSDAY WILL BE ACCEPTED STARTING 11 A.M. ON THE PRECEDING TUESDAY. AN EXCEPTION TO THE 48 HR LIMITATION IS MADE FOR WEEKENDS TO RECOGNIZE NORMAL BUSINESS HOURS. A RSVN REQ FOR AN IFR OPERATION ON MONDAY WILL BE ACCEPTED ON THE PREVIOUS THURSDAY STARTING AT THE PROPOSED HR OF OPERATION. REQUESTS FOR IFR OPERATION ON TUESDAY WILL BE ACCEPTED ON THE PREVIOUS FRIDAY STARTING AT THE PROPOSED HR OF OPERATION. E.G. REQ FOR 11 A.M. RSVN ON TUESDAY WOULD BE ACCEPTED BEGINNING 11 A.M. ON FRIDAY. IF THE PREVIOUS FRIDAY IS AN OBSERVED HOLIDAY THE PROCEDURE WILL BE IN EFFECT ON THURSDAY. A MAXIMUM OF TWO RSVNS PER PHONE CALL WILL BE ACCEPTED. E.G. A PILOT MAY REQ A RSVN FOR ARRIVAL AND DEPARTURE DURING THE SAME PHONE CALL PROVIDING BOTH FALL ON THE SAME CALENDAR DAY. E.G. A RSVN REQ FOR 11 A.M. ARRIVAL ON FRIDAY AND 4 P.M. DEPARTURE ON THE SAME DAY MAY BE MADE BEGINNING AT 11 A.M. ON WEDNESDAY.

FDC 4/3277 NOTAM /D/REGARDING RWY SNOW CONDITIONS AND BRAKING ACTION REPORTS FOR CANADIAN AIRPORTS WILL NO LONGER BE ENTERED INTO THE DOMESTIC NOTAM SYSTEM ON SERVICE A BY NFDC. CONTACT THE ASSOCIATED CANADIAN FLIGHT SERVICE STATION FOR THESE REPORTS.

FDC 4/1725 FDC U.S. NOTAM OFFICE POLICY ON FDC NOTAM STORAGE IN CONSOLIDATED NOTAM SYSTEM /CNS/DATA BASE/. ALL CURRENT FDC NOTAMS ARE STORED AND AVAILABLE UPON REQUEST. FDC NOTAMS WHICH ARE STRAIGHT CANCELLATIONS ARE STORED FOR THREE /3/ DAYS. BASED ON COMPUTER DEMANDS SIGNIFICANT TIME DELAYS ON RETRIEVALS CAN BE EXPECTED.
NOTE...REPEATED REQUESTS WILL FURTHER COMPOUND DELAYS. THEREFORE FSS AND USER GROUPS ARE ADVISED TO COLLECT AND STORE REQUIRED FDC NOTAM/S ON INITIAL SERVICE /A/ DISTRIBUTION SUPPLEMENTED BY CLASS 2 NOTAM PUBLICATION.

HAZARDOUS INFLIGHT WEATHER ADVISORY SERVICE (HIWAS)

HIWAS is a national program for broadcasting hazardous weather information (SIGMET's, convective SIGMET's, Center Weather Advisories (CWA), AIRMET's, and urgent PIREP's) on a continuous basis over selected VOR's. The program is operational in the Jacksonville, Miami, and Houston Air Route Traffic Control Center (ARTCC) areas. The chart on the following page identifies the current broadcast outlet locations and frequencies. Frequencies shown in the Atlanta ARTCC area are for planning purposes only. HIWAS will be expanded on an ARTCC by ARTCC basis.

Pilots should be aware that:

* Flight service stations broadcast information on hazardous weather not yet covered by an advisory and make an announcement on their frequencies that new HIWAS information is available.

* Controllers in ARTCC's and air traffic control terminals announce updates to HIWAS information on all appropriate frequencies.

* Controllers and specialists will not routinely broadcast SIGMET's, convective SIGMET's, CWA's, AIRMET's, and urgent PIREP's in the commissioned HIWAS areas.

User comments regarding the effectiveness of the HIWAS program and any proposed revision to HIWAS procedures are solicited.

Mail comments to:

Department of Transportation
Federal Aviation Administration
ATTN: ATO-360
800 Independence Ave. S.W.
Washington, DC 20591

Note: For further information on the HIWAS program, refer to the Airman's Information Manual (AIM) and Airport/Facility Directory (AFD). Operational sites are published in the AFD under radio aids to navigation.

The Interim Voice Response System

The Federal Aviation Administration has leased an Interim Voice Response System (IVRS) that enables pilots throughout the country to obtain selected weather information directly from a computer. The pilot enters requests for specific weather reports for locations of interest by depressing the keys on a Touchtone $^{(R)}$ telephone or keypad adapter on non-Touchtone $^{(R)}$ telephones. The computer will "listen" to telephone signalling tones and will respond with a spoken message derived from stored human speech.

The IVRS is a national system consisting of a network of 16 locations with "speaking" computers, and prepaid telephone access from an additional 8. The locations and telephone numbers are listed below. Call the telephone number nearest you at any time day or night, using any standard 12-key touch-tone phone. For long distance numbers outside your area code, call 1 plus Area Code and number. For assistance or trouble reporting call toll free 1-800-FOR-IVRS at any time.

IVRS Weather Products

1. SEVERE WEATHER FORECAST ALERTS (AWW) inform pilots of forthcoming severe thunderstorms or tornadoes. They are available automatically when you enter a location identifier (LOCID) or TWEB route number for a state in which a Severe Weather Forecast Alert is in effect.

   ISSUED: As necessary.

2. **CONVECTIVE SIGMETS (WST) concern thunderstorms and related phenomena. They are available automatically when you enter a LOCID or TWEB route number for a state in which a Convective SIGMET is in effect.**

   ISSUED: Hourly at 55 minutes past the hour and as needed.

3. **SURFACE OBSERVATIONS (SA) provide observed surface weather conditions for the LOCIDs entered.**

   ISSUED: Hourly on the hour and as needed.

4. **TERMINAL FORECASTS (FT) provide a forecast of weather conditions for the LOCIDs entered.**

   ISSUED: Approximately 1000, 1500, and 2200 GMT and as necessary.

5. **WINDS ALOFT FORECASTS (GF) describe winds and temperatures for the LOCIDs entered. You specify the altitude and number of hours into the future and receive winds and temperatures at your requested altitude plus an altitude above and one below the requested altitude.**

   ISSUED: Unscheduled, but typically at 0400 and 1600 GMT.

6. **TWEB ROUTE FORECASTS (TR) provide a forecast of weather conditions within a 50-mile-wide corridor along a route and within a 50-mile radius for local vicinity forecasts.**

   ISSUED: Approximately 1200, 1800, and 2400 GMT and as needed.

How to Use IVRS

The instructions on how to use IVRS are contained in A Pilot's Guide to IVRS published by the Federal Aviation Administration. You may obtain a copy from any FAA Flight Standards District Office or Flight Service Station.

Comments, questions and requests for more information may also be directed to :

IVRS Project Office
Federal Aviation Administration
APM-230
Washington, D.C. 20591

COORDINATED UNIVERSAL TIME (UTC)

Coordinated Universal Time (UTC) has replaced Greenwich Mean Time (GMT) as the accepted international standard for clock time. UTC is the basis for civil time in most countries of the world rather than GMT. The Federal Aviation Administration has concurred with this change and advised the International Civil Aviation Organization that the conversion would become effective January 16, 1986. The letter "Z" will be retained to indicate "UTC". All United States Government Aeronautical charts and publications that are effective on January 16, 1986, will indicate UTC vice GMT.

AIRPORT RADAR SERVICE AREAS (ARSA)

The National Airspace Review Terminal Airspace Task Group 1-2.2 recommended the ARSA Program as a replacement for the existing Terminal Radar Service Area Program and the FAA has adopted that recommendation. ARSA designations have been made, and effective dates established, for the locations listed below. The following is a summary of the pilot requirements and the ATC procedures for ARSA's. Graphic depictions of each ARSA are also included.

Unless otherwise authorized or required by ATC, the following provisions apply to aircraft operating within an ARSA:

1. Aircraft approaching that would penetrate the ARSA must establish two-way radio communications with ATC prior to entering the ARSA and maintain that communication while operating within the ARSA.
2. Aircraft departing the primary airport within the ARSA must establish two-way communications with ATC prior to departure and maintain that communication while operating within the ARSA. Aircraft departing a satellite airport within the ARSA must contact ATC as soon as practicable after takeoff.
3. Except in an emergency, all operations must be in compliance with ATC clearances and instructions.
4. All arrivals and departures within the ARSA must be in compliance with FAA arrival and departure traffic patterns.
5. Ultralight vehicles and parachute operations may not be conducted within the ARSA except under the terms of an ATC authorization.
6. NOTAM's pertaining to flight within the ARSA must be reviewed as a part of preflight action required by FAR 91.5.

Within ARSA's, ATC will provide the following services:

1. Radar sequencing of all arrivals.
2. Standard separation between all instrument flight rules (IFR) flights.
3. Traffic advisories and safety advisories to all aircraft.
4. Resolve any potential conflict between an aircraft operating IFR and an aircraft operating under visual flight rules by application of conflict resolution procedures.

ARSA's have been designated at the following locations to be effective January 16, 1986.

Burbank-Glendale-Pasadena Airport, CA
El Toro Marine Corps Air Station, CA
Greensboro-High Point-Winston-Salem Regional Airport, NC
James M. Cox Dayton International Airport, OH
Lubbock International Airport, TX

WASHINGTON HELICOPTER ROUTE CHART

A new Washington Helicopter Route Chart is available with a February 13 effective date. This chart is a joint FAA/DOD effort and is an updated version of the DOD chart of June 14, 1982.

Major helicopter and transition routes along with narrative descriptions are included. Pictorial symbols of prominent landmarks, tower frequencies, altitude changeover points, reporting points, and transponder codes are other features depicted on this chart. Further, this chart shows selected cultural features such as power transmission lines and prominent buildings which are depicted for landmark value only. The chart does not depict complete obstacle information due to the high concentration of objects in the area.

Military personnel may obtain copies from their appropriate authority. Civilians may obtain a free chart by writing:

MASTERS GOLF TOURNAMENT

SPECIAL TRAFFIC MANAGEMENT PROGRAM

AUGUSTA, GEORGIA

APRIL 9 through 14, 1986

In anticipation of the large number of aircraft traveling to and from the Augusta, Georgia, area during the Masters Golf Tournament, the following procedures will be used to enhance safety and minimize air traffic delays.

****TRAFFIC MANAGEMENT PROGRAM****

A Special Traffic Management Program will be in effect daily April 9, 1200-2359 UTC (0700-1900 local) through April 14. Atlanta Center will assign Controlled Departure Times (CDT) for unscheduled IFR flights arriving the Augusta, Georgia, area. CDT's will be assigned to departing IFR flights April 13, 1700 UTC to April 14, 0400 UTC (1200-2300 local April 13). (Rain date April 14 1700 UTC to April 15, 0400 UTC 1200-2300 local April 14.)

CDT's can be obtained from any Flight Service Station (FSS) 4 hours but not more than 12 hours prior to proposed time of departure. Include CDT in remarks section of the flight plan filed with a flight service station.

Due to anticipated frequency congestion, Atlanta Center and Augusta Approach Control, except for emergency situations, will not accept air filed flight plans to/from the Augusta Area while this program is in effect. Airborne IFR flight plans filed with other facilities may experience extensive delays awaiting integration into the IFR system.

****OVERFLIGHTS AUGUSTA AREA****

Aircraft not landing in the Augusta area are requested to avoid overflight below 12,000 feet within the lateral limits of the August Terminal Radar Service Area (TRSA). IFR overflights can expect routings to avoid the Augusta area.

Revised 3/17/86

****AUGUSTA AREA****

For the purpose of this Special Traffic Management Program, the Augusta Area includes the following airports:

Augusta, Georgia	
Bush Field Airport	- AGS
Daniel Field Airport	- DNL
Thomson, Georgia	
Thomson-McDuffie County Airport	- 48J
Aiken, South Carolina	
Aiken Municipal Airport	- AIK

****TEMPORARY AIR TRAFFIC SERVICES****

The Federal Aviation Administration will operate a temporary airport traffic control tower and flight service station at Daniel Field Airport, Augusta, Georgia.

DATE/TIME OF OPERATION

April 9-12......................0800-2000 Local
April 13......................0800-2100 Local
April 14 (rain date)..........0800-2100 Local

FREQUENCIES

Daniel Tower	123.1 mHz
Ground Control	121.7 mHz
Savannah Radio	122.3 mHz

VFR aircraft are encouraged to contact Savannah Radio to activate and close VFR flight plans.

****VFR ARRIVALS****

Terminal Radar Service AREA (TRSA)
Stage III Radar Service

Bush Field Airport: Radar sequencing will be provided to all aircraft landing at Bush Field. Contact Augusta Approach Control on 126.8 mHz (170-349) or 119.15 mHz (350-169) 15-20 miles from Bush Field.

Other Augusta Area Airports: Radar service will be available to aircraft landing at other than Bush Field on a workload permitting basis. Contact Augusta Approach Control.

Pilots are urged to remain clear of the TRSA until clearance is received.

****FLIGHT PLANS****

Pilots planning to arrive and depart the Augusta area on the same day are encouraged to file the return flight plan with their local FSS during the initial briefing.

****DEPARTURES****

PREFLIGHT BRIEFING AND FLIGHT PLANNING

Preflight briefing and flight planning services will be available in the Augusta Aviation Building at Daniel Field. Pilots may close and file flight plans in person at Daniel Field or Bush Field. Pilots landing at Thomson-McDuffie County Airport may call Savannah Flight Service Station by telephone on the published toll free number. Pilots landing at Aiken Municipal Airport may call Florence Flight Service Station by telephone on the published toll free number.

IFR/VFR DEPARTURES

BUSH FIELD AND DANIEL FIELD AIRPORTS

DO NOT TAXI FOR TAKEOFF UNTIL, taxi instructions and if appropriate IFR clearance are received. For Stage III Radar Service, advise Ground Control of: Aircraft identification, type aircraft, if transponder equipped, direction of flight and/or destination, and initial cursing altitude.

DO NOT CALL THE TOWER FOR TAKEOFF UNTIL in the number one position to take the active runway.

DANIEL FIELD AIRPORT ONLY

DO NOT CALL GROUND CONTROL FOR TAXI INSTRUCTIONS UNTIL IN THE NUMBER 1 POSITION TO ENTER A TAXIWAY FROM THE PARKING RAMP AREA.

****RESTRICTED AREA ADVISORY****

Pilots should be aware of the existence of Restricted Area (R-3004) to the southwest of Augusta VOR and plan their flight accordingly. This aroa is intermittently activated by NOTAM. Pilots are cautioned that penetration of Restricted Areas without authorization from the using or controlling agency may be extremely hazardous.

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAMS PRIOR TO CONDUCTING FLIGHT.

OFFSHORE TECHNOLOGY CONFERENCE

SPECIAL TRAFFIC MANAGEMENT PROGRAM

HOUSTON, TEXAS

MAY 5 THROUGH 9, 1986

In anticipation of the large number of aircraft traveling to and from Houston, Texas during the Offshore Technology Conference, the following procedures will be used to enhance safety and minimize air traffic delays at Houston Intercontinental (IAH) and William P. Hobby (HOU) Airports.

****TRAFFIC MANAGEMENT PROGRAM****

A Special Traffic Management Program will be in effect daily May 5 through 9, 1100-1659 UTC (0600-1159 local). Houston Center will assign Controlled Departure Times (CDT) for unscheduled IFR flights arriving Houston Intercontinental and William P. Hobby Airports.

CDT's may be obtained from any flight service station or by calling Houston Center (713) 230-5561 (IAH) or (713) 230-5566 (HOU) during the hours beginning Sunday May 4, 1300 - May 5 0300 UTC (0800-2200 local) and between 1000-0300 UTC (0500-2200 local) daily thereafter until 1659 UTC (1159 local) May 9. CDT's will not be assigned more than 24 hours in advance of proposed time of departure.

Adherence to CDT's within plus or minus 10 minutes is essential to the success of this program.

Except for emergency situations, Houston Center will not accept IFR flight plans from airborne aircraft while this program is in effect. Airborne IFR flight plans filed with other facilities may experience extensive delays awaiting integration into the IFR system.

****FLIGHT PLANS****

Flight plans should be filed with the nearest flight service station, after receiving a CDT and at least 4 hours prior to proposed time of departure. Include CDT in the remarks section of the flight plan. (Flight plans may be filed concurrently with CDT request made with flight service stations.)

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAMS AND ARRIVAL PROCEDURES PRIOR TO CONDUCTING FLIGHT.

Air Traffic Control Services at
Hilton Head Arpt, SC

Family Circle Tennis Tournament
and Heritage Golf Classic
April 7-20, 1986

The Federal Aviation Administration will provide temporary Air Traffic Control Services at the Hilton Head, South Carolina Airport during the Family Circle Tennis Tournament and the Heritage Golf Classic. The tower will be in operation April 7-20, from 9:00 a.m. EST to 7:00 p.m. EST daily. On April 13 and April 20 hours of operation will be 9:00 a.m. EST to 8:00 p.m. EST. Frequencies are: Tower - 126.7, Ground - 121.6, Radio Call - Hilton Head Tower.

KENTUCKY DERBY
SPECIAL TRAFFIC MANAGEMENT PROGRAM
LOUISVILLE, KENTUCKY

MAY 1 through 4, 1986

In anticipation of the large number of aircraft traveling to and from the Louisville, Kentucky, area during the Kentucky Derby, the following procedures will be used to enhance safety and minimize air traffic delays.

****TRAFFIC MANAGEMENT PROGRAM****

A Special Traffic Management Program will be in effect daily May 1 and 2, 1200-2259 UTC (0800-1859 local) and May 3, 1000-1959 UTC (0600-1559 local). Indianapolis Center will assign Controlled Departure Times (CDT) for unscheduled IFR flights arriving the Louisville, Kentucky area. CDT's will be assigned to departing IFR flights May 3, 2200-0259 UTC (1800-2259 local) and May 4, 1100-1759 UTC (0700-1359 local).

Beginning April 28, 1200-0259 UTC (0800-2259 local) daily, CDT's can be obtained from Indianapolis Center by calling (800) 322-5532 in Indiana (800) 922-4845, or any Flight Service Station.

****FLIGHT PLANS****

Pilots are urged to file flight plans at least 4 hours prior to proposed time of departure with the nearest flight service station. Include CDT in remarks section of the flight plan filed with a flight service station.

Due to anticipated frequency congestion, Indianapolis Center and Standiford Approach Control, except for emergency situations, will not accept air filed flight plans to/from the Louisville Area while this program is in effect. Airborne IFR flight plans filed with other facilities may experience extensive delays awaiting integration into the IFR system.

****LOUISVILLE AREA****

Louisville, Kentucky	
Standiford Field Airport	SDF
Bowman Field Airport	LOU
Jeffersonville, Indiana	
Clark County Airport	JVY

Revised 3/25/86

****ATIS****

Pilots are urged to monitor ATIS prior to initial contact with Standiford Approach Control.

Standiford Field Airport	118.15 mHz
Bowman Field Airport	112.2 mHz

****VFR ARRIVALS****

Louisville Terminal Radar Service Area (TRSA)
Stage III Radar Service

Airports within the Louisville TRSA: Pilot participation in Stage III radar service is recommended and will be provided to aircraft landing at airports within the Louisville TRSA. Radar sequencing will be provided to all aircraft landing at Standiford Field. Contact Standiford Approach Control on 124.5 mHz (050-280°) or 123.7 mHz (280-050°) prior to reaching a VFR entry point (SEE GRAPHIC). Advise approach control of destination airport and ATIS code on initial contact.

Single and twin engine propeller aircraft are encouraged to use Bowman Field Airport due to parking congestion at Standiford Field. Bowman Field is located 5 miles northeast of Standiford Field.

Other Airports within the Standiford Approach Control Area: Radar service will be available to aircraft landing at airports outside the Louisville TRSA on a workload permitting basis. Contact Standiford Approach Control.

VFR DEPARTURES

Standiford Field Airport: Aircraft departing Standiford Field VFR and requesting Stage III radar service should check with the tower representative in the lobby of Butler Aviation. Departure information (route, altitude and aircraft type) will be forwarded to the tower and a departure transponder code will be issued. Stage III radar service is recommended and will be provided to all aircraft unless specifically declined. Before starting engines, monitor Standiford ATIS 118.15 mHz for departure information. Delays may be anticipated from 2230-2400 UTC (1830-2000 local), May 3 and all day May 4.

Revised 3/25/86

****RESTRICTED AREA ADVISORY****

Pilots should be aware of the existence of Restricted Area (R3704 A/B) to the southwest of Louisville VORTAC and plan their flight accordingly. This area is intermittently activated by NOTAM. Pilots are cautioned that penetration of Restricted Areas without authorization from the using or controlling agency may be extremely hazardous.

****OVERFLIGHTS LOUISVILLE AREA****

Aircraft not landing in the Louisville Area are requested to avoid overflight below 10,000 feet within a 20 nautical mile radius of Standiford Field Airport.

****WAKE TURBULENCE ADVISORY****

Pilots should be aware that a significant amount of wake turbulence may exist due to the large number of heavy jet aircraft operating in the Louisville area. Pilots are urged to exercise caution when operating within 30 miles of Louisville.

****KENTUCKY DERBY GREAT STEAMBOAT RACE****

Caution is advised in the vicinity of the Ohio River during "The Great Steamboat Race," April 30, 2000-sunset UTC (1600-sunset local). Numerous news media helicopters and fixed wing aircraft operating in the area.

PILOTS ARE URGED TO OBTAIN A COMPLETE WEATHER BRIEFING AND REVIEW ALL APPLICABLE NOTAMS PRIOR TO CONDUCTING FLIGHT.

MONITOR SDF ATIS ON 118.15 FOR PROPER FREQUENCY ASSIGNMENT

EXPO '86

May 2, 1986, through October 13, 1986

In anticipation of a significant increase of aircraft activity to and from the Vancouver, British Columbia, Canada, area during the 1986 World Exposition, the following flight information is provided to enhance safety and minimize air traffic delays.

BELLINGHAM, WASHINGTON, AREA

The Bellingham area includes the following airports:

Bellingham International (BLI)
Blaine Municipal (WA09)
Lynden (WA33)

Bellingham International is a port of entry and customs services are available from 8 a.m. until 5 p.m., locally and at other times, upon 1 hours advance notice. U.S. Airmen departing Canadian airspace which intend to land and clear Customs at Bellingham International are reminded to annotate their Customs requests in the remarks section of their flight plan. The Customs office telephone number at Bellingham is (206) 734-5463 (local exchange). Responsibility for ensuring Customs notification rests with the pilot.

TEMPORARY FAA BELLINGHAM CONTROL TOWER

The control tower will be operated from 8 a.m. until 8 p.m., daily, from May 1, 1986, through October 25, 1986.

Bellingham frequencies:

Bellingham Tower - 124.9 MHz, 239.25 MHz
Bellingham Ground Control - 121.65 MHz

BELLINGHAM (BLI) AIRPORT TRAFFIC AREA

The Bellingham Airport Traffic Area (ATA) will be in effect during the hours of operation for the temporary tower. The ATA is described as that airspace within a 5 statute mile radius of the BLI airport up to, but not including, 3,000' AGL excluding that airspace known as the Abbotsford-Bellingham Flight Information area which lies north of the BLI airport. The Abbotsford-Bellingham Flight Information Area is delineated on aeronautical charts.

BELLINGHAM AIRPORT INFORMATION - GENERAL

The Port of Bellingham is the airport sponsor of the airport. The traffic pattern is 1,200' for fixed wing aircraft and 800' for helicopters. The sponsor has a local regulation which prohibits intersection departures at the airport. Abbotsford, British Columbia, Canada, tower provides limited traffic

information service on 119.4 MHz to VFR aircraft operating between 1,500' and 4,000' MSL in an area generally described as between the U.S./Canadian border and Ferndale, and between the shoreline and Highway 9.

VFR FLIGHT PLANS

All pilots are encouraged to file a flight plan. Arriving aircraft should close their flight plans by radio with Bellingham FSS, on 123.6 MHz or 122.3 MHz. If unable, pilots may call the Bellingham FSS at 734-6400 (local exchange) or 1-800-833-0310 upon arrival.

Canadian/U.S. rules require that all aircraft operating VFR must be on a VFR flight plan prior to crossing the Canadian/U.S. border. Airfiles are discouraged and pilots are requested to file their flight plans 1 hour in advance of proposed departure times.

Pilots departing the U.S. from the Bellingham area are reminded that significant differences exist between Canadian and U.S. rules and procedures. Canadian officials have requested all U.S. pilots be cognizant of the requirement that flight plans are mandatory while operating in Canadian airspace.

IFR TRAFFIC

Vancouver Area Control Center (ACC) is the controlling agency for IFR aircraft operating to/from the Bellingham International Airport. Due to the expected increase in the volume of traffic generated by Expo '86, some delays may be encountered for IFR arrival and departure traffic. The Vancouver ACC has requested that U.S. airmen not request VFR/IFR practice ILS Runway 16 approaches to the Bellingham International Airport during Expo '86.

IFR ARRIVALS BLI INTERNATIONAL

Be prepared to discontinue your approach based upon local traffic conditions and enter a VFR traffic pattern for landing sequence. Pilots arriving IFR are requested to be extremely vigilant as the instrument approaches serving the Bellingham International Airport enter an area of high traffic activity in the Abbotsford-Bellingham Flight Information area.

VFR FLIGHT

Aircraft landing in Vancouver, British Columbia, Canada, should be extremely alert while operating in the Vancouver Lower Mainland area. Numerous aerial demonstrations and other aviation related sport activities are planned for Expo '86. The majority of these events will take place in the Vancouver Harbour Central Zone. The following VFR egress/ingress routes are recommended for traffic operating to/from Canadian airspace:

Bellingham (BLI) to Abbotsford (YXX) northbound east of Lynden
Abbotsford (YXX) to Bellingham (BLI) southbound west of Lynden

BLI to Vancouver (YVR) via Interstate 5 (I-5) using right side separation east/west of the highway. Extreme caution should be taken in the vicinity of the Abbotsford Localizer.

U.S. Airmen desiring additional information on Canadian area airports, rules and regulations, and Custom services may request (in writing) an Air Tourist Information Guide which is available without charge from:

Transport Canada (EXPO Guide)
800 Burrard Street
P.O. Box 220
Vancouver, British Columbia, Canada V6Z2JB

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAM's ISSUED BY BOTH THE U.S. AND CANADA PRIOR TO CONDUCTING FLIGHT.

SPECIAL USE AIRSPACE
(Military Operations Area)

Effective April 25-27, 1986

Paradise Temporary MOA, ID [New]

FAA TESTING CONSUMER HOTLINE IN 24 STATES:

The FAA is testing a toll-free Consumer Hotline in its Southern, Eastern and Great Lakes regions.

Citizens with complaints or problems concerning such FAA responsibilities as carry-on baggage, airport security procedures, child safety seats -- or FAA user services including aeronautical charts, associated aeronautical information publications, pilot examinations, physicals, aircraft certification, FAA facility operations -- are encouraged to dial, toll-free (800) FAA-SURE direct to FAA Headquarters.

Consumers calling the FAA Consumer Hotline may expect a return call from an FAA official.

The Consumer Hotline operates from 8 a.m. to 4 p.m., Eastern Time, Monday through Friday, except Holidays. (In the District of Columbia, call (202) 426-9366.)

(FAA's Consumer Hotline is distinct from and supplements the FAA Safety Hotline introduced nationwide in July, 1985. The FAA toll-free Safety Hotline -- (800) 255-1111 -- is intended primarily for use by those having specific knowledge of alleged violations of the Federal Aviation Regulations. The identities of callers are held in confidence by FAA, protected from disclosure under the provisions of the Freedom of Information Act.)

NOTICES TO AIRMEN
CONTENT CRITERIA
Revised 1985

ALL AIRPORTS

TABLE 1

Information Category	Content Criteria
Airports	Abandonments (If currently listed in Airport/Facility Directory), Openings, Closings.
Runways	Openings, Closings, Commissionings, Permanent Closures.

NOTAM D AIRPORTS

TABLE 2

Information Category	Content Criteria
Airport Operating Restriction	CFR, ACR, etc.
Approach Light Systems	Commissionings, Changes, Decommissionings, Outages (with Effective Dates), Pilot Control (Commissionings, Decommissionings, Outages (with Effective Dates)).
Control Zones	Hours of Operation (in Local Time).
Displaced Thresholds	Implementation and Changes.
Runways	Ident Changes, Length, Width, Surface Composition Changes.
Runway Light Systems	Commissionings, Changes, Outages (with Effective Dates), Pilot Control (Commissionings, Decommissionings, Outages (with Effective Dates)).

NAVAIDS, COMMUNICATIONS, OTHER SERVICES

TABLE 3

Information Category	Content Criteria
Navigational Facilities	Commissionings (including Ident and Frequency), Decommissionings (including Ident and Frequency), Frequency Changes, Changes in Monitoring Facility and/or Status, Restrictions, Outages (with Effective Dates).
Air Traffic Control Towers, Approach Controls	Commissionings (including Frequencies), Hours of Operation, Decommissionings.
Flight Service Stations	Commissionings, Decommissionings, Hours of Operation; Commissionings, Decommissionings of RCO; Changes in Monitoring Status of RCO; Outages of RCO (with Effective Dates).
Weather	AWOS (System and Frequency).

For sale by the Superintendent of Documents, U.S. Government Printing Office Washington, D.C. 20402

FOREWORD

The primary references for changes to the National Airspace System (NAS) are Aeronautical Charts and Airport/Facility Directories (A/FD) published for the affected area(s). Ideally, most changes to the NAS that meet NOTAM criteria are known sufficiently in advance to allow publication in these publications. When this cannot be done, changes are carried in the Notices to Airman Class II publication, or as a last resort, on the Service A telecommunications system as a NOTAM D item.

NOTAM D information printed in this publication will not be included on the Service A system and will not be provided during pilot briefings unless specifically requested by the pilot.

National Flight Data Center (FDC) NOTAMs primarily reflect changes to Standard Instrument Approach Procedures (SIAPs), Flight Restrictions, and aeronautical chart revisions. The last FDC NOTAM included in this issue is indicated by number and date above. This information insures that subsequent FDC NOTAMs, issued after the cutoff date, can be identified.

The Class II publication contains information of a temporary nature, which is expected to remain for an extended period. This temporary information is carried until it expires or is cancelled. Data of a permanent nature is sometimes carried in the Class II publication as an interim step prior to publication on the appropriate charts or in the A/FD.

The Class II publication is issued every 14 days. The A/FD is published every 56 days. Data in the Class II publication that is current on the effective date of the next A/FD will be transferred to the A/FD and removed from the Class II publication.

Facilities are responsible for forwarding data to the National Flight Data Center (NFDC). Data, still current for the next available Class II publication date, will be published.

This publication is divided into two sections:

1. Section One contains information divided into four categories:

a. GENERAL

b. AIRWAYS

c. FLIGHT RESTRICTIONS

d. AIRPORTS / FACILITIES / PROCEDURAL NOTAMS

The first subsection is listed in descending FDC NOTAM numerical order. The second and third subsections are listed by state. The fourth subsection is ordered by state, city, and airport name.

2. The second section contains special notices that are too long or that concern a wide or unspecified geographical area (which may overlap several states) and are not suitable for inclusion in the first section.

The content of these notices vary widely and are included because of their significant impact on flight safety.

NOTES

1. All times are indicated as UTC or local. During periods of Daylight Savings Time, effective hours in local time will be one hour earlier than shown. All states observe Daylight Savings Time except Arizona, that portion of Indiana in the Eastern Time Zone, Puerto Rico, and the Virgin Islands.

2. (|) Vertical line items indicate new information.

FDC NOTAM LEGEND

Code	Explanation
5/103	Accountability number assigned to the message originator.
FI/T	Flight information of a temporary nature.
FI/P	Flight information of a permanent nature.

ABBREVIATIONS

The following abbreviations are those most commonly used within this publication. Other abbreviations may be found in the Contraction Handbook, 7340.1.

Note: An "s" may be added for plural. Abbreviations used in FDC NOTAMs are italicized.

A

&	and
AAS	Airport Advisory Service
A/C	Approach Control
acft	aircraft
ACR	Air Carrier
ADF	Automatic Direction Finder
AER	Approach End Runway
AGL	above ground level
AIM	Airman's Information Manual
ALS	Approach light system
ALSF-1	Standard 2400' High-intensity Approach Lighting System with Sequenced Flashers, Category I Configuration
ALSF-2	Standard 2400' High-intensity Approach Lighting System with Sequenced Flashers, Category II Configuration
alt	altitude
altm	altimeter
altn	alternate
ALSTG	altimeter setting
amdt	amendment
apch	approach
apchg	approaching
aprx	approximate
arpt	airport
arr	arrive or arrival
ARSR	Air Route Surveillance Radar
ARTCC	Air Route Traffic Control Center
ASDE	airport surface detection equipment
ASR	Arpt Surveillance Radar
ATC	air traffic control
ATCT	air traffic control tower
ATIS	Automatic Terminal Information Service
avbl	available
awy	airway

B

BC	back course
bcn	beacon
bcst	broadcast
bldg	building
brg	bearing
btn	between
byd	beyond

C

cat	category
CFR	crash fire rescue
clnc	clearance
clsd	closed
cmsnd	commissioned
cntr	center
cntrln	centerline
Comlo	Compass locator
const	construction
cpty	capacity
crs	course
ctc	contact
CTLZ	Control Zone

D

dalgt	daylight
dcmsnd	decommissioned
degs	degrees
dep	depart, departure
DF	direction finder
DH	decision height
DME	UHF standard TACAN compatible distance measuring equipment
dsplcd	displaced
dstc	distance
durg	during
DVFR	Defense Visual Flight Rule

E

E	east
EFAS	Enroute Flight Advisory Service
elev	elevation
emerg	emergency
equip	equipment
excp	except

F

FAF	final approach fix
FAR	Federal Aviation Regulation
FDC	Flight Data Center
FI/P	flight information (permanent)
FI/T	flight information (temporary)
FL	Flight Level
FM	from
freq	frequency
FSS	Flight Service Station
ft	feet/foot

G

govt	government
GS	glide slope
GWT	gross weight

H

HAA	height above airport
HAT	height above touchdown
HIRL	High intensity Runway Lights
hol	holiday
hwy	highway

I

IAF	initial approach fix
IAP	initial approach procedure
ident	identification
IF	intermediate fix
IFR	Instrument Flight Rules
IFSS	International Flight Service Station
ILS	instrument landing system
info	information
inop	inoperative
int	intersection
intl	international
intst	intensity
ISMLS	Interim Standard Microwave Landing System

J

J-bar	jet runway barrier

K

kHz	kilohertz

L

L	left (used only to designate rwys) eg. rwy 12L
lat	latitude
lb	pounds (weight)
lctd	located
LDA	Localizer type directional aid
LDIN	Lead-in Lighting System
lgtd	lighted
LMM	compass locator at middle marker ILS
lndg	landing
loc	localizer
LOM	compass locator at outer marker ILS
long	longitude

M

MAA	maximum authorized altitude
mag	magnetic
maint	maintain, maintenance
MALS	Medium Intensity Approach Light System
MALSR	Medium Intensity Approach Light System with Runway Alignment Indicator Lights
MAP	missed approach point
max	maximum
MCA	minimum crossing altitude
MDA	minimum descent altitude
MEA	minimum enroute IFR altitude
MHz	megahertz
min	minimum or minute
MIRL	Medium Intensity Runway Edge Lights
MLS	Microwave Landing System
MM	middle marker ILS
MOCA	minimum obstruction clearance altitude
MRA	minimum reception altitude
MSA	minimum safe altitude
MSL	mean sea level
muni	municipal

N

N	north
NA	not authorized
natl	national
navaid	navigational aid
NDB	Non-directional Radio Beacon
NM	nautical mile(s)
NOPT	no procedure turn required
Nr	number

O

obstn	obstruction
ODALS	Omnidirectional Approach Lighting System
OM	outer marker ILS
oper	operate
opn	operation
orig	original
OTS	Out of Service
ovrn	overrun

P

PAR	Precision Apch Radar
pat	pattern
permly	permanently
PPR	Prior Permission Required
proc	procedure

Q

quad	quadrant

R

R	right (used only to designate rwys) eg. rwy 19R
RAPCON	radar approach control (USAF)
RCAG	Remote Center air/ground
RCLS	Runway Centerline Lights System
RCO	Remote Communications Outlet
rcv	receive
rcvg	receiving
REIL	Runway End Identifier Lights
req	request
RNAV	Area Navigation
RRP	Runway Reference Point
rstrd	restricted
RTS	returned to service
RVR	runway visual range
RVRM	Runway Visual Range Midpoint
RVRT	Runway Visual Range Touchdown
RVRR	Runway Visual Range Rollout
RVV	runway visibility values
rwy	Runway

S

S	south/snow
SDF	Simplified Directional Facility
sec	second
sfc	surface
SFL	Sequenced Flashing Lights
SI	straight-in approach
SM	statute mile(s)
SR	sunrise
SS	sunset
SSAFL	Simplified Short Approach Lighting System with Sequenced Flashers
SSALS	Simplified Short Approach Lighting System
SSALR	Simplified Short Approach Lighting System with Runway Alignment Indicator Lights
STOL	Short take-off & landing runway
svc	service

T

T	true (after a bearing)
TAC	Terminal Area Chart
TACAN	UHF navigational facility—omnidirectional course and distance information
TCA	Terminal Control Area
TCH	Threshold Crossing Height
tfc	traffic
thr	threshold
thru	through
tkof	take-off
tmprly	temporarily
tmpry	temporary
TPA	Traffic Pattern Altitude
TRACON	Terminal Radar approach control
trml	terminal
TRSA	Terminal Radar Service Area
tsnt	transient
TWEB	transcribed weather bcst
twr	tower
twy	taxiway

U

UHF	Ultra high frequency
unavbl	unavailable
unlgtd	unlighted
unmon	unmonitored
unusbl	unusable

V

VASI	Visual Approach Slope Indicator
VDP	visual descent point
VFR	visual flight rules
VHF	Very high frequency
vis	visibility
VOR	VHF Omni-Directional Radio Range
VORTAC	Combined VOR and TACAN System
VOT	a VOR Receiver testing facility
vsby	visibility

FDC 6/505 FI/P CORRECT U.S. GOVT ENROUTE LOW ALTITUDE CHART L-18 PANEL F DTD 13 MAR 1986. CHANGE WIREGRASS VORTAC IDENT RRS FREQ 116.1 TO READ 111.6.

FDC 6/456 FI/T CLASS II NOTAM PUBLICATION DATED FEBRUARY 27, 1986 TABLE OF CONTENTS, FIRST SENTENCE SHOULD READ/NOTAM INFORMATION CURRENT/AS OF JANUARY 30, 1986 FDC NOTAMS LISTED THRU 6/210, JANUARY 29, 1986.

FDC 6/421 FI/P CORRECT U.S. GOVT ENROUTE HIGH ALTITUDE CHART /SOUTHWEST H2/PANEL F, DTD 16 JAN 1986. CHANGE TWENTYNINE PALMS TACAN IDENT /NXP/TO READ PALMS TACAN IDENT /NZP/.

FDC 6/331 FI/P CHANGE US GOVT CHARTS, ENROUTE LOW ALTITUDE /L-20 PANEL G/DATED 16 JAN 1986. R6002 CHANGE TIME OF USE TO .... INTERMITTENT 0600-2400 LCL MON-FRI, 0600-1800 LCL SAT AND OTHER TIMES BY NOTAM AT LEAST 8 HOURS IN ADVANCE.

FDC 6/231 FI/P CORRECT U.S. GOVT HAWAIIAN ISLAND SECTIONAL CHART 33RD EDITION DTD 21 NOV 85. CHANGE HONOLULU VORTAC /HNL/FREQ 115.3 CHANNEL 100 TO FREQ 114.8 CHANNEL 095X.

FDC 6/201 FI/P CORRECT U.S. GOVT WORLD AERONAUTICAL CHART CG21, 19TH EDITION DTD OCT 24, 1985. CHANGED HARRIS VORTAC /HRS/ FREQ 111.6 CHANNEL 053 TO FREQ 109.8 CHANNEL 035.

FDC 5/2506 AUTOMATED VOICE AIRPORT RESERVATION SYSTEM../AVARS/. IN ORDER TO IMPROVE THE AVARS CAPACITY THE FAA HAS INSTALLED TWO ADDITIONAL NON-TOLL FREE NUMBERS..617-275-4837/8. EFFECTIVE NOVEMBER 1 1985 TWO ADDITIONAL TOLL FREE LINES WILL BE AVAILABLE TO BE PART OF 1-800-FAA-1212 NUMBER. FAA PLANS TO CONTINUE THE DUAL /ARO/SYSTEM USING THE AUTOMATED SYSTEM ON 1-800-FAA-1212 AND THE MANUAL ARO SYSTEM WITH NEW YORK 718-632-7808/CHICAGO 312-263-2575 AND WASHINGTON DC 202-426-9347 UNTIL FURTHER NOTICE. IN AREAS WHERE TOUCH TONE PHONE SYSTEMS ARE NOT AVAILABLE USERS MAY EITHER CONTACT THE NEAREST FAA FLIGHT SERVICE STATION OR THE /ARO/ AT THE NUMBERS LISTED ABOVE AND REQUEST A RESERVATION. USERS DEPARTING A TRANS-ATLANTIC AIRPORT FOR ARRIVAL TO A HIGH DENSITY AIRPORT SHOULD CONTINUE TO USE THE PROCEDURES OUTLINED IN ADVISORY CIRCULAR AC 90-43F PARA 5 DATED APRIL 22 1985 WHICH STATES CONTACT THE NEAREST FLIGHT SERVICE STATION.

FDC 5/2193 FI/P MTR CORRECT IR-501 MILITARY TRAINING ROUTE/POINT AJ. CHANGE FAC/RAD/DIST POINT AJ TO GLD 354/35.

FDC 5/2130........SPECIAL NOTICE..........INTERNATIONAL FLIGHT PLAN FORM...........INSTRUCTIONS FOR USING FAA FORM 7233-4. ICAO DOCUMENT 4444 AMENDMENT 6 EFFECTIVE NOVEMBER 21 1985 SPECIFIES SEVERAL CHANGES IN ICAO INTERNATIONAL FLIGHT PLAN FORMAT. FAA WILL ACCEPT THE NEW ICAO FORMAT EXCEPT AIRCRAFT SPEED/ALTITUDE FILED IN METRIC TERMS. THEREFORE TO COMPLY AS CLOSELY AS POSSIBLE WITH AMENDMENT 6 THE FOLLOWING ADDITIONAL PROCEDURES WILL APPLY BEGINNING NOVEMBER 21 WHEN USING FAA FORM 7233-4........1. FAA FORM 7233-4, ITEM 13, HAS A SPACE FOR FIR BOUNDARIES AND ESTIMATED TIMES. FAA REQUIRES FILED FIR BOUNDARIES AND ESTIMATED TIMES, HOWEVER, PUT THAT INFORMATION IN ITEM 18, OTHER INFORMATION AS SPECIFIED IN ICAO FORMAT.......2. CONCERNING FAA FORM 7233-4, ITEM 15, THE U.S. AIR TRAFFIC SERVICE DOES NOT ACCEPT AIRCRAFT SPEED/ALTITUDE FILED IN METRIC TERMS........3. IN ITEM 17, IN THE SECTION LABELED ETA, INSTEAD PUT TOTAL ESTIMATED ELASPED TIME/TOTAL EET/........THE PRESENT SUPPLY OF FAA FORM 7233-4 WILL BE USED UNTIL EXHAUSTED AND REPLACED BY A NEW REVISED FAA INTERNATIONAL FLIGHT PLAN FORM.....DETAILED FAA POLICY, EXPLANATION OF CHANGES, DEFINITIONS, AND RESPONSIBILITIES CONCERNING THESE ICAO FLIGHT PLAN FORMAT CHANGES WILL BE ISSUED TO FAA AIR TRAFFIC PERSONNEL IN THE NATIONAL HEADQUARTERS DIRECTIVE NEAR THE END OF SEPTEMBER.

FDC 5/584 AIRPORT RESERVATION OFFICE/ARO/OPERATIONS... EFF APR 1, 1985...THE FOLLOWING GUIDELINES SHALL BE IN EFFECT.. /ARO/WILL ACCEPT RSVNS FOR WASHINGTON NATIONAL AIRPORT /DCA, JOHN F. KENNEDY INTL ARPT /JFK, LA GUARDIA ARPT/LGA, AND CHICAGO O HARE INTL ARPT /ORD BEGINNING 48 HRS PRIOR TO THE PROPOSED TIME OF OPERATION AT THE AFFECTED ARPT. E.G REQ FOR 11 A.M. OPERATION ON THURSDAY WILL BE ACCEPTED STARTING 11 A.M. ON THE PRECEDING TUESDAY. AN EXCEPTION TO THE 48 HR LIMITATION IS MADE FOR WEEKENDS TO RECOGNIZE NORMAL BUSINESS HOURS. A RSVN REQ FOR AN IFR OPERATION ON MONDAY WILL BE ACCEPTED ON THE PREVIOUS THURSDAY STARTING AT THE PROPOSED HR OF OPERATION. REQUESTS FOR IFR OPERATION ON TUESDAY WILL BE ACCEPTED ON THE PREVIOUS FRIDAY STARTING AT THE PROPOSED HR OF OPERATION. E.G. REQ FOR 11 A.M. RSVN ON TUESDAY WOULD BE ACCEPTED BEGINNING 11 A.M. ON FRIDAY. IF THE PREVIOUS FRIDAY IS AN OBSERVED HOLIDAY THE PROCEDURE WILL BE IN EFFECT ON THURSDAY. A MAXIMUM OF TWO RSVNS PER PHONE CALL WILL BE ACCEPTED. E.G. A PILOT MAY REQ A RSVN FOR ARRIVAL AND DEPARTURE DURING THE SAME PHONE CALL PROVIDING BOTH FALL ON THE SAME CALENDAR DAY. E.G. A RSVN REQ FOR 11 A.M. ARRIVAL ON FRIDAY AND 4 P.M. DEPARTURE ON THE SAME DAY MAY BE MADE BEGINNING AT 11 A.M. ON WEDNESDAY.

FDC 4/3277 NOTAM /D/REGARDING RWY SNOW CONDITIONS AND BRAKING ACTION REPORTS FOR CANADIAN AIRPORTS WILL NO LONGER BE ENTERED INTO THE DOMESTIC NOTAM SYSTEM ON SERVICE A BY NFDC. CONTACT THE ASSOCIATED CANADIAN FLIGHT SERVICE STATION FOR THESE REPORTS.

FDC 4/1725 FDC U.S. NOTAM OFFICE POLICY ON FDC NOTAM STORAGE IN CONSOLIDATED NOTAM SYSTEM /CNS/DATA BASE/. ALL CURRENT FDC NOTAMS ARE STORED AND AVAILABLE UPON REQUEST. FDC NOTAMS WHICH ARE STRAIGHT CANCELLATIONS ARE STORED FOR THREE /3/ DAYS. BASED ON COMPUTER DEMANDS SIGNIFICANT TIME DELAYS ON RETRIEVALS CAN BE EXPECTED. NOTE...REPEATED REQUESTS WILL FURTHER COMPOUND DELAYS. THEREFORE FSS AND USER GROUPS ARE ADVISED TO COLLECT AND STORE REQUIRED FDC NOTAM/S ON INITIAL SERVICE /A/ DISTRIBUTION SUPPLEMENTED BY CLASS 2 NOTAM PUBLICATION.

HAZARDOUS INFLIGHT WEATHER ADVISORY SERVICE (HIWAS)

HIWAS is a national program for broadcasting hazardous weather information (SIGMET's, convective SIGMET's, Center Weather Advisories (CWA), AIRMET's, and urgent PIREP's) on a continuous basis over selected VOR's. The program is operational in the Jacksonville, Miami, and Houston Air Route Traffic Control Center (ARTCC) areas. The chart on the following page identifies the current broadcast outlet locations and frequencies. Frequencies shown in the Atlanta ARTCC area are for planning purposes only. HIWAS will be expanded on an ARTCC by ARTCC basis.

Pilots should be aware that:

* Flight service stations broadcast information on hazardous weather not yet covered by an advisory and make an announcement on their frequencies that new HIWAS information is available.

* Controllers in ARTCC's and air traffic control terminals announce updates to HIWAS information on all appropriate frequencies.

* Controllers and specialists will not routinely broadcast SIGMET's, convective SIGMET's, CWA's, AIRMET's, and urgent PIREP's in the commissioned HIWAS areas.

User comments regarding the effectiveness of the HIWAS program and any proposed revision to HIWAS procedures are solicited.

Mail comments to:

Department of Transportation
Federal Aviation Administration
ATTN: ATO-360
800 Independence Ave. S.W.
Washington, DC 20591

Note: For further information on the HIWAS program, refer to the Airman's Information Manual (AIM) and Airport/Facility Directory (AFD). Operational sites are published in the AFD under radio aids to navigation.

The Interim Voice Response System

The Federal Aviation Administration has leased an Interim Voice Response System (IVRS) that enables pilots throughout the country to obtain selected weather information directly from a computer. The pilot enters requests for specific weather reports for locations of interest by depressing the keys on a Touchtone (R) telephone or keypad adapter on non-Touchtone (R) telephones. The computer will "listen" to telephone signalling tones and will respond with a spoken message derived from stored human speech.

The IVRS is a national system consisting of a network of 16 locations with "speaking" computers, and prepaid telephone access from an additional 8. The locations and telephone numbers are listed below. Call the telephone number nearest you at any time day or night, using any standard 12-key touch-tone phone. For long distance numbers outside your area code, call 1 plus Area Code and number. For assistance or trouble reporting call toll free 1-800-FOR-IVRS at any time.

	Area Code Number
Atlanta	(404) 876-2311
Boston	(617) 890-7475
Chicago	(312) 767-4800
Columbus	(614) 224-6525

Teterboro	(201) 288-4600
Washington, DC	(202) 393-1456

IVRS Weather Products

1. SEVERE WEATHER FORECAST ALERTS (AWW) inform pilots of forthcoming severe thunderstorms or tornadoes. They are available automatically when you enter a location identifier (LOCID) or TWEB route number for a state in which a Severe Weather Forecast Alert is in effect.

   ISSUED: As necessary.

2. CONVECTIVE SIGMETS (WST) concern thunderstorms and related phenomena. They are available automatically when you enter a LOCID or TWEB route number for a state in which a Convective SIGMET is in effect.

   ISSUED: Hourly at 55 minutes past the hour and as needed.

3. SURFACE OBSERVATIONS (SA) provide observed surface weather conditions for the LOCIDs entered.

   ISSUED: Hourly on the hour and as needed.

4. TERMINAL FORECASTS (FT) provide a forecast of weather conditions for the LOCIDs entered.

   ISSUED: Approximately 1000, 1500, and 2200 GMT and as necessary.

5. WINDS ALOFT FORECASTS (GF) describe winds and temperatures for the LOCIDs entered. You specify the altitude and number of hours into the future and receive winds and temperatures at your requested altitude plus an altitude above and one below the requested altitude.

   ISSUED: Unscheduled, but typically at 0400 and 1600 GMT.

6. TWEB ROUTE FORECASTS (TR) provide a forecast of weather conditions within a 50-mile-wide corridor along a route and within a 50-mile radius for local vicinity forecasts.

   ISSUED: Approximately 1200, 1800, and 2400 GMT and as needed.

How to Use IVRS

The instructions on how to use IVRS are contained in A Pilot's Guide to IVRS published by the Federal Aviation Administration. You may obtain a copy from any FAA Flight Standards District Office or Flight Service Station.

Comments, questions and requests for more information may also be directed to :

IVRS Project Office
Federal Aviation Administration
APM-230
Washington, D.C. 20591

COORDINATED UNIVERSAL TIME (UTC)

Coordinated Universal Time (UTC) has replaced Greenwich Mean Time (GMT) as the accepted international standard for clock time. UTC is the basis for civil time in most countries of the world rather than GMT. The Federal Aviation Administration has concurred with this change and advised the International Civil Aviation Organization that the conversion would become effective January 16, 1986. The letter "Z" will be retained to indicate "UTC". All United States Government Aeronautical charts and publications that are effective on January 16, 1986, will indicate UTC vice GMT.

AIRPORT RADAR SERVICE AREAS (ARSA)

The National Airspace Review Terminal Airspace Task Group 1-2.2 recommended the ARSA Program as a replacement for the existing Terminal Radar Service Area Program and the FAA has adopted that recommendation. ARSA designations have been made, and effective dates established, for the locations listed below. The following is a summary of the pilot requirements and the ATC procedures for ARSA's. Graphic depictions of each ARSA are also included.

Unless otherwise authorized or required by ATC, the following provisions apply to aircraft operating within an ARSA:

1. Aircraft approaching that would penetrate the ARSA must establish two-way radio communications with ATC prior to entering the ARSA and maintain that communication while operating within the ARSA.
2. Aircraft departing the primary airport within the ARSA must establish two-way communications with ATC prior to departure and maintain that communication while operating within the ARSA. Aircraft departing a satellite airport within the ARSA must contact ATC as soon as practicable after takeoff.
3. Except in an emergency, all operations must be in compliance with ATC clearances and instructions.
4. All arrivals and departures within the ARSA must be in compliance with FAA arrival and departure traffic patterns.
5. Ultralight vehicles and parachute operations may not be conducted within the ARSA except under the terms of an ATC authorization.
6. NOTAM's pertaining to flight within the ARSA must be reviewed as a part of preflight action required by FAR 91.5.

Within ARSA's, ATC will provide the following services:

1. Radar sequencing of all arrivals.
2. Standard separation between all instrument flight rules (IFR) flights.
3. Traffic advisories and safety advisories to all aircraft.
4. Resolve any potential conflict between an aircraft operating IFR and an aircraft operating under visual flight rules by application of conflict resolution procedures.

ARSA's have been designated at the following locations to be effective March 13, 1986.

Daytona Beach Regional Airport, FL
Des Moines Muni Airport, IA
El Paso International Airport, TX
Eppley Airfield, NE
Ft. Lauderdale-Hollywood International Airport, FL
Jacksonville International Airport, FL
Norfolk International Airport, VA
Offutt Air Force Base, NE
Orlando International Airport, FL
Richard Evelyn Byrd International Airport, VA
Tampa International Airport, FL
Palm Beach International Airport, FL

ARSA's have been designated at the following locations to be effective April 10, 1986.

Beale Air Force Base, CA
Birmingham Municipal Airport, AL
Burlington International Airport, VT
Castle Air Force Base, CA
Charlotte/Douglas International Airport, NC
Columbus Metropolitan Airport, GA
Mather Air Force Base. CA
McClellan Air Force Base, CA
Nashville Metropolitan Airport, TN
Sacramento Metropolitan Airport, CA

ARSA's have been designated at the following locations to be effective May 8, 1986.

Adams Field, Little Rock, AR
General Mitchell Field, Milwaukee, WI
Greater Buffalo International Airport, NY
Memphis International Airport, TN
Michiana Regional Airport, South Bend, IN
Salt Lake International Aitport, UT

WASHINGTON HELICOPTER ROUTE CHART

A new Washington Helicopter Route Chart is available with a February 13 effective date. This chart is a joint FAA/DOD effort and is an updated version of the DOD chart of June 14, 1982.

Major helicopter and transition routes along with narrative descriptions are included. Pictorial symbols of prominent landmarks, tower frequencies, altitude changeover points, reporting points, and transponder codes are other features depicted on this chart. Further, this chart shows selected cultural features such as power transmission lines and prominent buildings which are depicted for landmark value only. The chart does not depict complete obstacle information due to the high concentration of objects in the area.

Military personnel may obtain copies from their appropriate authority. Civilians may obtain a free chart by writing:

OFFSHORE TECHNOLOGY CONFERENCE

SPECIAL TRAFFIC MANAGEMENT PROGRAM

HOUSTON, TEXAS

MAY 5 THROUGH 9, 1986

In anticipation of the large number of aircraft traveling to and from Houston, Texas during the Offshore Technology Conference, the following procedures will be used to enhance safety and minimize air traffic delays at Houston Intercontinental (IAH) and William P. Hobby (HOU) Airports.

****TRAFFIC MANAGEMENT PROGRAM****

A Special Traffic Management Program will be in effect daily May 5 through 9, 1100-1659 UTC (0600-1159 local). Houston Center will assign Controlled Departure Times (CDT) for unscheduled IFR flights arriving Houston Intercontinental and William P. Hobby Airports.

CDT's may be obtained from any flight service station or by calling Houston Center (713) 230-5561 (IAH) or (713) 230-5566 (HOU) during the hours beginning Sunday May 4, 1300 - May 5 0300 UTC (0800-2200 local) and between 1000-0300 UTC (0500-2200 local) daily thereafter until 1659 UTC (1159 local) May 9. CDT's will not be assigned more than 24 hours in advance of proposed time of departure.

Adherence to CDT's within plus or minus 10 minutes is essential to the success of this program.

Except for emergency situations, Houston Center will not accept IFR flight plans from airborne aircraft while this program is in effect. Airborne IFR flight plans filed with other facilities may experience extensive delays awaiting integration into the IFR system.

****FLIGHT PLANS****

Flight plans should be filed with the nearest flight service station, after receiving a CDT and at least 4 hours prior to proposed time of departure. Include CDT in the remarks section of the flight plan. (Flight plans may be filed concurrently with CDT request made with flight service stations.)

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAMS AND ARRIVAL PROCEDURES PRIOR TO CONDUCTING FLIGHT.

KENTUCKY DERBY
SPECIAL TRAFFIC MANAGEMENT PROGRAM
LOUISVILLE, KENTUCKY

MAY 1 through 4, 1986

In anticipation of the large number of aircraft traveling to and from the Louisville, Kentucky, area during the Kentucky Derby, the following procedures will be used to enhance safety and minimize air traffic delays.

****TRAFFIC MANAGEMENT PROGRAM****

A Special Traffic Management Program will be in effect daily May 1 and 2, 1200-2259 UTC (0800-1859 local) and May 3, 1000-1959 UTC (0600-1559 local). Indianapolis Center will assign Controlled Departure Times (CDT) for unscheduled IFR flights arriving the Louisville, Kentucky area. CDT's will be assigned to departing IFR flights May 3, 2200-0259 UTC (1800-2259 local) and May 4, 1100-1759 UTC (0700-1359 local).

Beginning April 28, 1200-0259 UTC (0800-2259 local) daily, CDT's can be obtained from Indianapolis Center by calling (800) 322-5532 in Indiana (800) 922-4845, or any Flight Service Station.

****FLIGHT PLANS****

Pilots are urged to file flight plans at least 4 hours prior to proposed time of departure with the nearest flight service station. Include CDT in remarks section of the flight plan filed with a flight service station.

Due to anticipated frequency congestion, Indianapolis Center and Standiford Approach Control, except for emergency situations, will not accept air filed flight plans to/from the Louisville Area while this program is in effect. Airborne IFR flight plans filed with other facilities may experience extensive delays awaiting integration into the IFR system.

****LOUISVILLE AREA****

Louisville, Kentucky	
Standiford Field Airport	SDF
Bowman Field Airport	LOU
Jeffersonville, Indiana	
Clark County Airport	JVY

Revised 3/25/86

****ATIS****

Pilots are urged to monitor ATIS prior to initial contact with Standiford Approach Control.

Standiford Field Airport	118.15 mHz
Bowman Field Airport	112.2 mHz

****VFR ARRIVALS****

Louisville Terminal Radar Service Area (TRSA)
Stage III Radar Service

Airports within the Louisville TRSA: Pilot participation in Stage III radar service is recommended and will be provided to aircraft landing at airports within the Louisville TRSA. Radar sequencing will be provided to all aircraft landing at Standiford Field. Contact Standiford Approach Control on 124.5 mHz (050-280°) or 123.7 mHz (280-050°) prior to reaching a VFR entry point (SEE GRAPHIC). Advise approach control of destination airport and ATIS code on initial contact.

Single and twin engine propeller aircraft are encouraged to use Bowman Field Airport due to parking congestion at Standiford Field. Bowman Field is located 5 miles northeast of Standiford Field.

Other Airports within the Standiford Approach Control Area: Radar service will be available to aircraft landing at airports outside the Louisville TRSA on a workload permitting basis. Contact Standiford Approach Control.

VFR DEPARTURES

Standiford Field Airport: Aircraft departing Standiford Field VFR and requesting Stage III radar service should check with the tower representative in the lobby of Butler Aviation. Departure information (route, altitude and aircraft type) will be forwarded to the tower and a departure transponder code will be issued. Stage III radar service is recommended and will be provided to all aircraft unless specifically declined. Before starting engines, monitor Standiford ATIS 118.15 mHz for departure information. Delays may be anticipated from 2230-2400 UTC (1830-2000 local), May 3 and all day May 4.

Revised 3/25/86

****RESTRICTED AREA ADVISORY****

Pilots should be aware of the existence of Restricted Area (R3704 A/B) to the southwest of Louisville VORTAC and plan their flight accordingly. This area is intermittently activated by NOTAM. Pilots are cautioned that penetration of Restricted Areas without authorization from the using or controlling agency may be extremely hazardous.

****OVERFLIGHTS LOUISVILLE AREA****

Aircraft not landing in the Louisville Area are requested to avoid overflight below 10,000 feet within a 20 nautical mile radius of Standiford Field Airport.

****WAKE TURBULENCE ADVISORY****

Pilots should be aware that a significant amount of wake turbulence may exist due to the large number of heavy jet aircraft operating in the Louisville area. Pilots are urged to exercise caution when operating within 30 miles of Louisville.

****KENTUCKY DERBY GREAT STEAMBOAT RACE****

Caution is advised in the vicinity of the Ohio River during "The Great Steamboat Race," April 30, 2000-sunset UTC (1600-sunset local). Numerous news media helicopters and fixed wing aircraft operating in the area.

PILOTS ARE URGED TO OBTAIN A COMPLETE WEATHER BRIEFING AND REVIEW ALL APPLICABLE NOTAMS PRIOR TO CONDUCTING FLIGHT.

EXPO '86

May 2, 1986, through October 13, 1986

In anticipation of a significant increase of aircraft activity to and from the Vancouver, British Columbia, Canada, area during the 1986 World Exposition, the following flight information is provided to enhance safety and minimize air traffic delays.

BELLINGHAM, WASHINGTON, AREA

The Bellingham area includes the following airports:

Bellingham International (BLI)
Blaine Municipal (WA09)
Lynden (WA33)

Bellingham International is a port of entry and customs services are available from 8 a.m. until 5 p.m., locally and at other times, upon 1 hours advance notice. U.S. Airmen departing Canadian airspace which intend to land and clear Customs at Bellingham International are reminded to annotate their Customs requests in the remarks section of their flight plan. The Customs office telephone number at Bellingham is (206) 734-5463 (local exchange). Responsibility for ensuring Customs notification rests with the pilot.

TEMPORARY FAA BELLINGHAM CONTROL TOWER

The control tower will be operated from 8 a.m. until 8 p.m., daily, from May 1, 1986, through October 25, 1986.

Bellingham frequencies:

Bellingham Tower - 124.9 MHz, 239.25 MHz
Bellingham Ground Control - 121.65 MHz

BELLINGHAM (BLI) AIRPORT TRAFFIC AREA

The Bellingham Airport Traffic Area (ATA) will be in effect during the hours of operation for the temporary tower. The ATA is described as that airspace within a 5 statute mile radius of the BLI airport up to, but not including, 3,000' AGL excluding that airspace known as the Abbotsford-Bellingham Flight Information area which lies north of the BLI airport. The Abbotsford-Bellingham Flight Information Area is delineated on aeronautical charts.

BELLINGHAM AIRPORT INFORMATION - GENERAL

The Port of Bellingham is the airport sponsor of the airport. The traffic pattern is 1,200' for fixed wing aircraft and 800' for helicopters. The sponsor has a local regulation which prohibits intersection departures at the airport. Abbotsford, British Columbia, Canada, tower provides limited traffic

information service on 119.4 MHz to VFR aircraft operating between 1,500' and 4,000' MSL in an area generally described as between the U.S./Canadian border and Ferndale, and between the shoreline and Highway 9.

VFR FLIGHT PLANS

All pilots are encouraged to file a flight plan. Arriving aircraft should close their flight plans by radio with Bellingham FSS, on 123.6 MHz or 122.3 MHz. If unable, pilots may call the Bellingham FSS at 734-6400 (local exchange) or 1-800-833-0310 upon arrival.

Canadian/U.S. rules require that all aircraft operating VFR must be on a VFR flight plan prior to crossing the Canadian/U.S. border. Airfiles are discouraged and pilots are requested to file their flight plans 1 hour in advance of proposed departure times.

Pilots departing the U.S. from the Bellingham area are reminded that significant differences exist between Canadian and U.S. rules and procedures. Canadian officials have requested all U.S. pilots be cognizant of the requirement that flight plans are mandatory while operating in Canadian airspace.

IFR TRAFFIC

Vancouver Area Control Center (ACC) is the controlling agency for IFR aircraft operating to/from the Bellingham International Airport. Due to the expected increase in the volume of traffic generated by Expo '86, some delays may be encountered for IFR arrival and departure traffic. The Vancouver ACC has requested that U.S. airmen not request VFR/IFR practice ILS Runway 16 approaches to the Bellingham International Airport during Expo '86.

IFR ARRIVALS BLI INTERNATIONAL

Be prepared to discontinue your approach based upon local traffic conditions and enter a VFR traffic pattern for landing sequence. Pilots arriving IFR are requested to be extremely vigilant as the instrument approaches serving the Bellingham International Airport enter an area of high traffic activity in the Abbotsford-Bellingham Flight Information area.

VFR FLIGHT

Aircraft landing in Vancouver, British Columbia, Canada, should be extremely alert while operating in the Vancouver Lower Mainland area. Numerous aerial demonstrations and other aviation related sport activities are planned for Expo '86. The majority of these events will take place in the Vancouver Harbour Central Zone. The following VFR egress/ingress routes are recommended for traffic operating to/from Canadian airspace:

Bellingham (BLI) to Abbotsford (YXX) northbound east of Lynden
Abbotsford (YXX) to Bellingham (BLI) southbound west of Lynden

BLI to Vancouver (YVR) via interstate 5 (I-5) using right side separation east/west of the highway. Extreme caution should be taken in the vicinity of the Abbotsford Localizer.

U.S. Airmen desiring additional information on Canadian area airports, rules and regulations, and Custom services may request (in writing) an Air Tourist Information Guide which is available without charge from:

Transport Canada (EXPO Guide)
800 Burrard Street
P.O. Box 220
Vancouver, British Columbia, Canada V6Z2JB

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAM's ISSUED BY BOTH THE U.S. AND CANADA PRIOR TO CONDUCTING FLIGHT.

FAA TESTING CONSUMER HOTLINE IN 24 STATES:

The FAA is testing a toll-free Consumer Hotline in its Southern, Eastern and Great Lakes regions.

Citizens with complaints or problems concerning such FAA responsibilities as carry-on baggage, airport security procedures, child safety seats -- or FAA user services including aeronautical charts, associated aeronautical information publications, pilot examinations, physicals, aircraft certification, FAA facility operations -- are encouraged to dial, toll-free (800) FAA-SURE direct to FAA Headquarters.

Consumers calling the FAA Consumer Hotline may expect a return call from an FAA official.

The Consumer Hotline operates from 8 a.m. to 4 p.m., Eastern Time, Monday through Friday, except Holidays. (In the District of Columbia, call (202) 426-9366.)

(FAA's Consumer Hotline is distinct from and supplements the FAA Safety Hotline introduced nationwide in July, 1985. The FAA toll-free Safety Hotline -- (800) 255-1111 -- is intended primarily for use by those having specific knowledge of alleged violations of the Federal Aviation Regulations. The identities of callers are held in confidence by FAA, protected from disclosure under the provisions of the Freedom of Information Act.)

"QUICK THRUST 2-86"

Effective 4/28/86 through 5/2/86, 1200-2200z daily extensive military air operations, both high and low speeds, will be conducted in an area bounded by the SAV, SSI, and DBN VORs, plus access corridors to and from offshore Warning Areas.

The following areas will be used: R3005, R3007, Stewart MOAs B and C and Quick Thrust MOAs E F G H I J L M and N.

Aircraft operations along V1 between RUBYS and STARRY intersections and along V3-37, SAV to SSI, and V437 SAV to STARRY will be affected.

Quick Thrust MOAs M and N between SAV, SSI, R3007, and W157 will be used at altitudes between 100AGL-3000MSL and 11000MSL-12000MSL. Other Quick Thrust area altitudes are from 100 AGL to 14000MSL.

Real time exercise airspace status advisories can be obtained by contacting Savannah Approach Control or Jacksonville Air Route Traffic Control Center.

CAPE COD AND ADJACENT ISLAND AREA AIRPORTS
MAY 15 THROUGH OCTOBER 30, 1986

In anticipation of the large number of aircraft operating to and from the Cape Cod and adjacent Island areas during the period May 15 through October 30, the following procedures will be used to enhance safety and minimize air traffic delays.

****TRAFFIC MANAGEMENT PROGRAM****
CAPE COD AND ADJACENT ISLAND AREA

For the purpose of this Special Traffic Management Program, the Cape Cod and adjacent Island area includes the following airports:

Hyannis Barnstable Municipal-Boardman/Polando Field	- HYA
Nantucket Memorial Airport	- ACK
Martha's Vineyard Airport	- MVY

****VFR ENROUTE AND HOLDING****

Pilots are urged to become familiar with VFR holding and reporting points (SEE GRAPHIC).

Arriving aircraft are encouraged to monitor ATIS, where available, and then contact the appropriate tower when 10-15 miles from the airport. Advise receipt of ATIS information on initial contact. Aircraft landing Martha's Vineyard are requested to monitor tower frequency far enough out to obtain and advise the tower on initial contact, "HAVE NUMBERS".

Aircraft enroute Hyannis Airport from Sagamore Bridge, Martha's Vineyard and Cotuit areas should exercise caution due to high density military traffic on IFR approach to runway 23, Otis Air National Guard Base.

Arrival Points	Arrival Direction	Holding Direction
HYANNIS AIRPORT		
Sandy Neck	North	North
Dennis Drive In	Northeast	Northeast
Sagamore Bridge	Northwest	Northwest
Cotuit	West	Southwest
Dennisport	East	Southeast
MARTHA'S VINEYARD AIRPORT		
Woods Hole	North	Northwest
Oak Bluffs	Northeast	East
Bounre Bridge	North	West
Cuttyhunk Island	West	Southwest
Katama Airpark	Southeast	South
NANTUCKET AIRPORT		
Great Point	North	East
Tuckernuck Island	West	Southwest

****IFR ARRIVAL/DEPARTURE****

Otis Terminal Radar Approach Control (TRACON) may assign a Control Departure Time (CDT) for IFR flights arriving or departing Hyannis, Nantucket or Martha's Vineyard Airports, whenever marginal VFR or IFR weather conditions exist.

Implementation of this part of the Special Traffic Management Program will be by special notice to flight service stations and area airport traffic control towers. Pilots may obtain current delay information during preflight and inflight briefings. During marginal weather conditions pilots are encouraged to contact the tower or flight service station, prior to engine start up, to obtain latest information.

To insure the success of this Special Traffic Management Program, aircraft departing Hyannis, New Bedford, Nantucket and Martha's Vineyard Airports are urged to depart within plus or minus 5 minutes of CDT. Departures from other airports should depart within 15 minutes before and not later than 5 minutes after CDT.

****FLIGHT PLANS****

Pilots are urged to file IFR flight plans at least 4 hours prior to proposed time of departure with the nearest flight service station.

Air filed flight plans may experience extensive delays awaiting integration into the IFR system while this program is in effect.

Commercial operators are requested to file flight plans for extra flight sections no less than 1 hour prior to proposed time of departure.

Pilots are encouraged to cancel VFR flight plans with Bridgeport Flight Service Station by radio. Transmit 122.1 mHz receive on appropriate VOR frequency. If unable to cancel by radio, contact appropriate flight service station by telephone.

INDIANAPOLIS 500 MILE RACE

SPECIAL TRAFFIC MANAGEMENT PROCEDURES

INDIANAPOLIS, INDIANA

MAY 23 THROUGH 26, 1986

In anticipation of the large number of aircraft operating to and from the Indianapolis, area during the Indianapolis 500, the following procedures will be used to enhance safety and minimize air traffic delays.

****TRAFFIC MANAGEMENT PROGRAM****

A Special Traffic Management Program will be in effect daily May 23-24, 1300-2359 UTC (0800-1859 EST) and May 25, 1100-1559 UTC (0600-1059 EST). Indianapolis Center will assign a Controlled Departure time (CDT) for unscheduled IFR flights arriving the Indianapolis, Indiana area. CDT's will be assigned to departing IFR flights May 25, 2100-0359 UTC May 26 (1600-2259 EST, May 25) and May 26, 1200-1859 UTC (0700-1359 EST).

Beginning May 20, 1300-0400 UTC (0800-2300 EST) daily, CDT's can be obtained from Indianapolis Center by calling (800) 322-5532. In Indiana (800) 922-4845, or any Flight Service Station.

****OVERFLIGHTS****

Aircraft not landing in the Indianapolis area are requested to avoid overflight below 10,000 feet MSL within a 20 nautical mile radius of Indianapolis International Airport.

****INDIANAPOLIS AREA****

For the purpose of this Special Traffic Management Program, the Indianapolis area includes the following airports:

Indianapolis International Airport	- IND
Eagle Creek Airpark Airport	- I14
Speedway Airport	- 3SY
Skyway Airport	- 5I1

****FLIGHT PLANS****

Pilots are urged to file VFR and IFR flight plans at least 4 hours prior to proposed time of departure with the nearest flight service station. Include date and CDT in remarks section of IFR flight plans filed with a flight service station.

Due to anticipated frequency congestion, Indianapolis Center and Approach Control, except for emergency situations, will not accept air filed flight plans to/from the Indianapolis Area while this program is in effect. Airborne IFR flight plans filed with other facilities may experience extensive delays awaiting integration into the IFR system.

****VFR ARRIVALS****

Indianapolis Terminal Radar Service Area (TRSA)
Stage III Radar Service

May 25, 1100-1559 UTC (0600-1059 EST)

Airports within the Indianapolis TRSA: Pilot participation in Stage III radar service is recommended and will be provided to aircraft landing at airports within the Indianapolis TRSA. Radar sequencing will be provided to all aircraft landing at Indianapolis International. Contact Indianapolis VFR Arrival control on 124.65 mHz (220-070°) or 127.15 mHz (070-220°) prior to reaching an outer VFR entry point (SEE GRAPHIC).

Aircraft are requested to hold at an outer VFR entry point until advised by Indianapolis VFR Arrival Control to proceed to an inner check point. Aircraft will be cleared to depart VFR entry points on a first come, first serve basis.

After receiving clearance to an inner VFR check point, pilots should proceed at 3,000 feet MSL, VFR (weather permitting) and remain on the Indianapolis VFR Arrival Control frequency.

All aircraft will be provided Stage III radar service inbound unless specifically declined. Temporary frequencies will be used. Pilots should be alert to radio frequency assignments.

SET TRANSPONDER CODE TO 1200 AND SQUAWK ALTITUDE.

Pilots are encouraged to utilize one of the other Indianapolis area airports due to parking congestion at Indianapolis International Airport.

****IFR/VFR DEPARTURES****

May 25, 2100 through 0359 UTC May 26 (1600-2259 EST, May 25)

Indianapolis International Airport:

Stage III radar service is recommended and will be provided unless specifically declined. Before starting engines, monitor Indianapolis International Airport ATIS 125.35 mHz for departure information.

DO NOT TAXI FOR TAKEOFF UNTIL, taxi instructions and if appropriate IFR clearance are received. For Stage III radar, contact Clearance Delivery on 123.95 mHz and advise: aircraft identification, type aircraft, if transponder equipped, direction of flight and/or destination and initial cursing altitude. For IFR clearance contact Clearance Delivery on 128.75 mHz.

DO NOT CALL THE TOWER FOR TAKEOFF UNTIL in the number 1 position to take the active runway.

****RESTRICTED AREA ADVISORY****

Pilots should be aware of the existence of Restricted Area (R 3401A/B) to the southeast of Indianapolis VOR and plan their flight accordingly. These areas are intermittently activated by NOTAM. Pilots are cautioned that penetration of Restricted Areas without authorization from the using or controlling agency may be extremely hazardous.

****WAKE TURBULENCE****

Pilots should be aware that a significant amount of wake turbulence may exist due to the large number of heavy jet aircraft operating in the Indianapolis area. Pilots are urged to exercise caution when operating within 30 miles of Indianapolis.

PILOTS ARE URGED TO OBTAIN A COMPLETE WEATHER BRIEFING AND REVIEW ALL APPLICABLE NOTAMS PRIOR TO CONDUCTING FLIGHTS.

Page revised 4/8/86

VFR Arrivals

Indianapolis Intl. – Indianapolis, In.
Field Elev. 797' MSL
Monitor ATIS 125.35 MHZ

VFR aircraft landing at reliever airports and not desiring to participate in Stage III Service, may do so without contacting Indianapolis Approach or VFR Control. It is recommended they remain clear of the Indianapolis TRSA. (VFR below 2,000ft within a 15NM radius and outside the Indianapolis Control Zone.)

Weather	AWOS (System and Frequency).

D4.12/2:

FOREWORD

The primary references for changes to the National Airspace System (NAS) are Aeronautical Charts and Airport/Facility Directories (A/FD) published for the affected area(s). Ideally, most changes to the NAS that meet NOTAM criteria are known sufficiently in advance to allow publication in these publications. When this cannot be done, changes are carried in the Notices to Airman Class II publication, or as a last resort, on the Service A telecommunications system as a NOTAM D item.

NOTAM D information printed in this publication will not be included on the Service A system and will not be provided during pilot briefings unless specifically requested by the pilot.

National Flight Data Center (FDC) NOTAMs primarily reflect changes to Standard Instrument Approach Procedures (SIAPs), Flight Restrictions, and aeronautical chart revisions. The last FDC NOTAM included in this issue is indicated by number and date above. This information insures that subsequent FDC NOTAMs, issued after the cutoff date, can be identified.

The Class II publication contains information of a temporary nature, which is expected to remain for an extended period. This temporary information is carried until it expires or is cancelled. Data of a permanent nature is sometimes carried in the Class II publication as an interim step prior to publication on the appropriate charts or in the A/FD.

The Class II publication is issued every 14 days. The A/FD is published every 56 days. Data in the Class II publication that is current on the effective date of the next A/FD will be transferred to the A/FD and removed from the Class II publication.

Facilities are responsible for forwarding data to the National Flight Data Center (NFDC). Data, still current for the next available Class II publication date, will be published.

This publication is divided into two sections:

1. Section One contains information divided into four categories:

a. GENERAL

b. AIRWAYS

c. FLIGHT RESTRICTIONS

d. AIRPORTS / FACILITIES / PROCEDURAL NOTAMS

The first subsection is listed in descending FDC NOTAM numerical order. The second and third subsections are listed by state. The fourth subsection is ordered by state, city, and airport name.

2. The second section contains special notices that are too long or that concern a wide or unspecified geographical area (which may overlap several states) and are not suitable for inclusion in the first section.

The content of these notices vary widely and are included because of their significant impact on flight safety.

NOTES

1. All times are indicated as UTC or local. During periods of Daylight Savings Time, effective hours in local time will be one hour earlier than shown. All states observe Daylight Savings Time except Arizona, that portion of Indiana in the Eastern Time Zone, Puerto Rico, and the Virgin Islands.

2. (¦) Vertical line items indicate new information.

FDC NOTAM LEGEND

Code	Explanation
5/103	Accountability number assigned to the message originator.

HAZARDOUS INFLIGHT WEATHER ADVISORY SERVICE (HIWAS)

HIWAS is a national program for broadcasting hazardous weather information (SIGMET's, convective SIGMET's, Center Weather Advisories (CWA), AIRMET's, and urgent PIREP's) on a continuous basis over selected VOR's. The program is operational in the Jacksonville, Miami, and Houston Air Route Traffic Control Center (ARTCC) areas. The chart on the following page identifies the current broadcast outlet locations and frequencies. Frequencies shown in the Atlanta ARTCC area are for planning purposes only. HIWAS will be expanded on an ARTCC by ARTCC basis.

Pilots should be aware that:

- Flight service stations broadcast information on hazardous weather not yet covered by an advisory and make an announcement on their frequencies that new HIWAS information is available.
- Controllers in ARTCC's and air traffic control terminals announce updates to HIWAS information on all appropriate frequencies.
- Controllers and specialists will not routinely broadcast SIGMET's, convective SIGMET's, CWA's, AIRMET's, and urgent PIREP's in the commissioned HIWAS areas.

User comments regarding the effectiveness of the HIWAS program and any proposed revision to HIWAS procedures are solicited.

Mail comments to:

Department of Transportation
Federal Aviation Administration
ATTN: ATO-360
800 Independence Ave. S.W.
Washington, DC 20591

Note: For further information on the HIWAS program, refer to the Airman's Information Manual (AIM) and Airport/Facility Directory (AFD). Operational sites are published in the AFD under radio aids to navigation.

The Interim Voice Response System

The Federal Aviation Administration has leased an Interim Voice Response System (IVRS) that enables pilots throughout the country to obtain selected weather information directly from a computer. The pilot enters requests for specific weather reports for locations of interest by depressing the keys on a Touchtone $^{(R)}$ telephone or keypad adapter on non-Touchtone $^{(R)}$ telephones. The computer will "listen" to telephone signalling tones and will respond with a spoken message derived from stored human speech.

The IVRS is a national system consisting of a network of 16 locations with "speaking" computers, and prepaid telephone access from an additional 8. The locations and telephone numbers are listed below. Call the telephone number nearest you at any time day or night, using any standard 12-key touch-tone phone. For long distance numbers outside your area code, call 1 plus Area Code and number. For assistance or trouble reporting call toll free 1-800-FOR-IVRS at any time.

IVRS Weather Products

1. SEVERE WEATHER FORECAST ALERTS (AWW) inform pilots of forthcoming severe thunderstorms or tornadoes. They are available automatically when you enter a location identifier (LOCID) or TWEB route number for a state in which a Severe Weather Forecast Alert is in effect.

   ISSUED: As necessary.

2. CONVECTIVE SIGMETS (WST) concern thunderstorms and related phenomena. They are available automatically when you enter a LOCID or TWEB route number for a state in which a Convective SIGMET is in effect.

   ISSUED: Hourly at 55 minutes past the hour and as needed.

3. SURFACE OBSERVATIONS (SA) provide observed surface weather conditions for the LOCIDs entered.

   ISSUED: Hourly on the hour and as needed.

4. TERMINAL FORECASTS (FT) provide a forecast of weather conditions for the LOCIDs entered.

   ISSUED: Approximately 1000, 1500, and 2200 GMT and as necessary.

5. WINDS ALOFT FORECASTS (GF) describe winds and temperatures for the LOCIDs entered. You specify the altitude and number of hours into the future and receive winds and temperatures at your requested altitude plus an altitude above and one below the requested altitude.

   ISSUED: Unscheduled, but typically at 0400 and 1600 GMT.

6. TWEB ROUTE FORECASTS (TR) provide a forecast of weather conditions within a 50-mile-wide corridor along a route and within a 50-mile radius for local vicinity forecasts.

   ISSUED: Approximately 1200, 1800, and 2400 GMT and as needed.

How to Use IVRS

The instructions on how to use IVRS are contained in A Pilot's Guide to IVRS published by the Federal Aviation Administration. You may obtain a copy from any FAA Flight Standards District Office or Flight Service Station.

Washington, D.C. 20591

COORDINATED UNIVERSAL TIME (UTC)

Coordinated Universal Time (UTC) has replaced Greenwich Mean Time (GMT) as the accepted international standard for clock time. UTC is the basis for civil time in most countries of the world rather than GMT. The Federal Aviation Administration has concurred with this change and advised the International Civil Aviation Organization that the conversion would become effective January 16, 1986. The letter "Z" will be retained to indicate "UTC". All United States Government Aeronautical charts and publications that are effective on January 16, 1986, will indicate UTC vice GMT.

AIRPORT RADAR SERVICE AREAS (ARSA)

The National Airspace Review Terminal Airspace Task Group 1-2.2 recommended the ARSA Program as a replacement for the existing Terminal Radar Service Area Program and the FAA has adopted that recommendation. ARSA designations have been made, and effective dates established, for the locations listed below. The following is a summary of the pilot requirements and the ATC procedures for ARSA's. Graphic depictions of each ARSA are also included.

Unless otherwise authorized or required by ATC, the following provisions apply to aircraft operating within an ARSA:

1. Aircraft approaching that would penetrate the ARSA must establish two-way radio communications with ATC prior to entering the ARSA and maintain that communication while operating within the ARSA.
2. Aircraft departing the primary airport within the ARSA must establish two-way communications with ATC prior to departure and maintain that communication while operating within the ARSA. Aircraft departing a satellite airport within the ARSA must contact ATC as soon as practicable after takeoff.
3. Except in an emergency, all operations must be in compliance with ATC clearances and instructions.
4. All arrivals and departures within the ARSA must be in compliance with FAA arrival and departure traffic patterns.
5. Ultralight vehicles and parachute operations may not be conducted within the ARSA except under the terms of an ATC authorization.
6. NOTAM's pertaining to flight within the ARSA must be reviewed as a part of preflight action required by FAR 91.5.

Within ARSA's, ATC will provide the following services:

1. Radar sequencing of all arrivals.
2. Standard separation between all instrument flight rules (IFR) flights.
3. Traffic advisories and safety advisories to all aircraft.
4. Resolve any potential conflict between an aircraft operating IFR and an aircraft operating under visual flight rules by application of conflict resolution procedures.

ARSA's have been designated at the following locations to be effective March 13, 1986.

Daytona Beach Regional Airport, FL
Des Moines Muni Airport, IA
El Paso International Airport, TX
Eppley Airfield, NE
